

PARD PARKING METERS

PARKS & RECREATION BOARD

October 22, 2019

PRESENTERS

Anthony Segura, Assistant Director, PARD

Jason Redfern, Parking Enterprise Manager, ATD

Parking Management Challenges

- Austin's Growing Population
- Dependency on Single Occupant Vehicles
- Limited Supply of On-Street Parking
- Structured Parking Not In Vicinity of PARD Facilities
- Drivers Exceeding Parking Time Restrictions
- Austin's 74% Drive Alone Rate

ATD Guidelines for On-Street Parking Meters

Overview

Parking meters are used as a tool to help manage the demand for parking spaces in order to achieve parking availability goals.

Determining Need

- High parking occupancy 60% - 80%
- Land-Use Types, including commercial, mixed-use areas
- Access to public facilities, parks, and recreational facilities that have high parking demand
- Major Transportation corridors

ATD Guidelines for Parking Meters

Process

- Receive a Request or Need is observed.
- Conduct Occupancy Studies within the Affected Area.
- If Warrants are met, Notify adjacent Establishments.
- Install Meters
- Issue Warnings for the First Two Weeks.

Expected Outcomes

- Spaces Turnover - Provides Consistent Availability and Positive Customer Experience
- Reduction in Congestive Behavior, Circling for Parking
- Reinvestment of Funds back into System
- Increased Presence of Enforcement Officials
- Encourages Use of Alternative Modes of Transportation.
