### **Additional Backup Information:**

The contract will provide new battery backup systems (BBS) for traffic signals and replace existing BBSs as they become damaged and/or obsolete. The City maintains and operates approximately 1,100 traffic signals.

A BBS improves safety at intersections by providing battery backup power to a traffic signal allowing it to continue to operate normally in the event that power is interrupted. A BBS also notifies the City's Mobility Management Center of power disruptions. This contract will be used to provide 100% battery backup

coverage along the 2016 Mobility Bond Corridors.

This is a new contract. A previous contract that expired in 2013 allowed the City to purchase a large amount of inventory, which is now almost depleted.

**Strategic Outcome(s):**

Government that Works for All; Mobility.
