*** External Email - Exercise Caution ***

I live next door at 12013 Buckner Road. The subject property is in between two residential properties and our neighbor owns the property behind it. Our well is very near the western property line. We've heard the proposed development is an automotive shop and used car lot.its already contaminted by lead for over 10 years no complain there and they support it The very definition of GR is ... serving neighborhood and community needs... There is already a used car dealer up the road, Volvo is building on the other side of the road, there's an automotive shop at the front of the road. Our community doesn't need more junky cars on the road and I don't want them to put in something without the proper grease/oil traps and disposal because our well could possibly become tainted. Our well is our only water source. I also don't want my property value to go down. insults my business and we have to go through proper building and permiting and also we must have proper protections such as very large oil drums on site and seperate drum for transmission fluid and seperate one for coolant on site or when we get inspected we get very hefty fine and can be shut down all together. the way the entire street and area is majority auto business including volvo anyone who comes into that street will not be doing residential bc no one wants to live next to all busineses The used car place up the road already has moved a line of cars outside their fence and they are right up the edge of the narrow road, can not be held liable for what other businesses do wrong when its not my property and I cant control the other businesses on the street, I got 1.3 acres for that reason so i have plenty enough room and on the back I also have second 1 acre location for extra roomIt's not a pleasant experience and I fear that another such business will add to the unsightly mess, but my largest fear is my well being contaminated and my property value going down. it makes you wonder how I am the issue but they have no problem with their other 2 neighbors who have AC business out of their house and shooting range that feeds lead into their water, no problem with over 10 year old lead contamination

Mr. Zavareh cut down all the heritage oaks on the property, started building up the building forms, brought in gravel, etc. when the property wasn't zoned for this building. That very act doesn't show me good faith that the property will be developed within city codes which will be safe for my residence. It does show me that he will try anything in hopes that he won't be caught. Did he have a building permit? Did he go through proper planning?incorect accusation about heritage trees, no heritage trees city arborist checked and found none since the stumps are still present. if neighbors wouldn't rush to call travis county with complaint right away and they wouldnt give me wrong info this mess would have never have happend, my neighbors are "little too involved in other peoples business" to point that is causing issues for others. I didnt build anything I was given instructions by travis county that I can clear the lot and line up my pads with wood but not to pour concerete and CAUTION: This email was received at the City of Austin, from an EXTERNAL source.
