<b>Boards and Commission Action:</b>	December 9, 2020 -- To be reviewed by the Water and Wastewater Commission		
<b>MBE/WBE:</b>	N/A		

In 1980 the City granted consent to the creation of the Shady Hollow Municipal Utility District in order to facilitate development of the area. Terms and conditions contained in a consent agreement and provisions of related agreements between the City and the District indicate that as the area developed, the parties anticipated the District would become part of the City through annexation.

In September 1980 the City and the Shady Hollow Municipal Utility District (District), previously known as Southwest Travis County Municipal Utility District No. 1, entered into an agreement for the City to provide wholesale drinking water service to the District. The parties entered into a subsequent agreement for the City to provide wholesale wastewater service in October 1993, with an amendment executed in April 1996.

In accordance with the terms of the 2013 Strategic Partnership Agreement (SPA), the City began providing retail water and wastewater service in April 2018 to approximately 1,400 former District customers who had been previously receiving wholesale water and wastewater service from the City. This 2018 conversion also involved the transfer of the ownership of the District's water and wastewater facilities to the City.

In response to legislation approved by the Texas Legislature in 2019, the District requested amendments to the SPA. Pursuant to the Strategic Partnership Agreement (SPA) amendment that Council authorized in October 2020, and the Interlocal Agreement for the Transfer of Water and Wastewater Facilities that Council authorized in October 2020, the District will begin providing retail water and wastewater service in early 2021 to approximately 1,400 former District customers who have been receiving retail water and wastewater service from the City since 2018.

With the pending transfer of water and wastewater customers from the City back to the District, the District has requested that the City provide wholesale water and wastewater services to the District. This Council action is to authorize the negotiation and execution of a wholesale water and wastewater contract. Major provisions of the contract will include:

- A limitation on the maximum volume and flow of wholesale water provided by the City.
- A limitation on the maximum flow of District's wastewater to be treated by the City.
- Conditions under which the District will be required to obtain the raw water necessary for the City's provision of potable water.
- Collection of capital recovery fees for each service unit of new development connected to the District system.
- Water conservation provisions consistent with City water conservation requirements.
- Cooperation regarding curtailment and water use restrictions.
- An initial term length of 5-years with options to renew for three additional five-year renewals, for a total of 20 years.
