Thanks for sharing the map and schedule Kim. From our discussion yesterday, I've attached a presentation that went before the Parks Board for a similar type project and the MOU and Mitigation Worksheet that I create. These docs all shared with the Parks Board and City Council as part of the Ch. 26 process. I wanted to also share a link that Kim McKnight sent me re: Aldridge Place, which as you know, includes the park, & is a local historic district and any significant changes to the character of the district would need to be reviewed by the Historic Preservation Office/Historic Landmark Commission, which you guys are aware of. Here is a [link](#) to a description of the district. Here is a [map](#). The bridges, streetlamps and the decorative walls along 30th are all considered contributing resources. The park and channel are also contributing. I also confirmed that Adams Hemphill Park does not have a park plan associated with it. Let me know if you all have any further questions. Thanks.

Gregory Montes, CNU-A

Greg,

Thanks again for meeting with our team and providing the up front information. We will follow up with minutes from the meeting, but I wanted to go ahead and provide you with the attached project schedule and improvements map. The map is a little dated, but generally depicts our planned improvements as we know them today. Let me know if you have any questions.

Thanks - Kim
