

Exhibit A - Localized Flooding Inquiries

The Zoning and Platting Commission respectfully requests the following information from City staff in Watershed Protection, Housing and Planning, Public Works and other appropriate city departments to help support our work.

1. List and status of stormwater infrastructure upgrade plans and projects including funding sources and expenditures to date.
2. The extent to which stormwater infrastructure upgrades are informed by localized flooding, climate change, growth, and development.
3. Update on Regional Stormwater Management Program from Watershed Protection.
4. Number of residential, commercial, civic, and public structures in areas experiencing localized flooding.
5. Feasibility of adding a checkbox to zoning and development applications to indicate if a site is located in an area experiencing localized flooding.
6. Status of city's education efforts regarding localized flooding.
7. Best practices, processes, and programs by peer cities for preventing and mitigating localized flooding.
8. Availability and cost of flood insurance that covers localized flooding.
9. Criteria for designating areas with localized flooding and status update on the localized flooding map.
10. Equity Office's role in City localized flooding policies, programs, funding, and impacts.

The requested information may be provided by staff as it becomes available. We greatly appreciate an estimated timeframe that staff will need to provide this information.
