# Community Engagement

- Community & City Working Groups
- iNaturalist
- Conversation Toolkit
- Virtual Creek Stomps
- Creek Stomp Journal
- Flat Stanley
- Social Pinpoint interactive map
- Creek Chats - Virtual & socially distanced Pop-ups
- Virtual Community Picnics
- Newsletters, social media, listservs
- Participatory Budget
- Creek Idea Cards

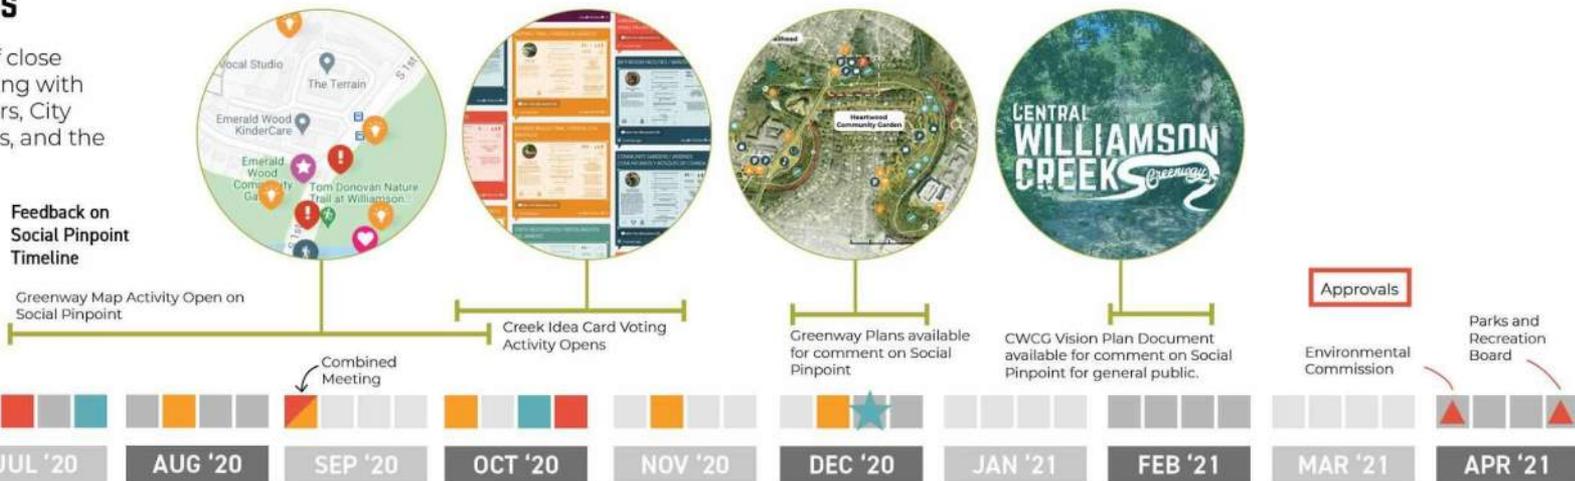

A photograph of a community engagement event at a park. In the foreground, a table covered with a striped cloth holds various items. To the left, a sign reads "SHAPE THE FUTURE OF CENTRAL WILLIAMSON CREEK GREENWAY" and "SHARE YOUR VISION TODAY!". In the center, two people wearing face masks are looking at a large map on an easel. To the right, another person in a bright yellow jacket is also looking at a map. In the background, there are trees, a building, and other people, including a child in a blue shirt. The scene is outdoors and appears to be a community meeting or a "creek stomp" event.

SHAPE THE FUTURE OF CENTRAL WILLIAMSON CREEK GREENWAY  
SHARE YOUR VISION TODAY!

# THE DESIGN PROCESS

Eleven-month period of close collaboration and visioning with key community members, City working group members, and the general public

Central Williamson Creek Vision Plan IMPLEMENTATION

# CENTRAL WILLIAMSON CREEK GREENWAY

A 3-mile stretch of publicly-owned land presents a significant opportunity to create a connected recreational greenway for a park-deficient community in South Austin.

## CENTRAL WILLIAMSON CREEK GREENWAY

# THE FUTURE CENTRAL WILLIAMSON CREEK IS...

1.

## A RESTORED, BIODIVERSE GREENWAY

### DESIGN STRATEGIES

Enhance biodiversity through floodplain restoration

Preserve the creek's wild character

Reveal ecology through environmental education experiences

Balance access with conserving floodplain ecology

3.

## AN ACCESSIBLE AND VISIBLE GREENWAY

### DESIGN STRATEGIES

Connect all communities to the creek

Orient through clear wayfinding

Reveal the creek's ecology and history

Prioritize key land acquisition for trail connectivity

2.

## A COMMUNITY-CENTERED GREENWAY

### DESIGN STRATEGIES

Support community-built projects

Create inviting gathering spaces at key nodes

Integrate community agriculture and agroforestry

4.

## AN ACTIVE AND CONNECTED GREENWAY

### DESIGN STRATEGIES

Integrate accessible creek experiences

Connect to public transportation and community resources

Create activities for all ages

# VISION PLAN ELEMENTS

These vision plan elements included in this design are a result of the "Creek Cards" community engagement process outlined in Chapters 3 and 4.

Creek & Woodland Restoration

# IMPLEMENTATION STREAM

## Tier 1 Projects

**Community -led collaborations with City of Austin landowners Watershed Protection, and the Parks and Recreation Department.**

They can involve work and support with non-profits such as Austin Parks Foundation and Keep Austin Beautiful. All projects must have prior approval by City of Austin property owners.

Toolkit Items Include:

- **Nature Trails**
- **Creek and Woodland Restoration**
- **Fitness Programming**
- **Food Forest**
- **Community Gardens**
- **Mountain Bike Trails**
- **Invasive Species Removal**
- **Labyrinth**
- **Music Grove**
- **Seating**
- **Pollinator Nesting Boxes**

---

### Maintenance Considerations:

For Tier 1 community and city-partnered projects, a maintenance agreement must be developed and approved by the City of Austin.

## Tier 2 Projects

**These are City of Austin landowner projects of \$50,000 dollars or less.** They are part of the missions and plans of WPD or PARD, but require advocacy from the community. The community may also be involved for portions of these projects such as planting days.

Toolkit Items Include:

- **Nature Play**
- **Green Infrastructure**
- **Wildflower Meadows**
- **Community Message Board**
- **Bonded Wood Mulch Trail**
- **BYO Hammock Grove**

---

### Maintenance Considerations:

Tier 2 projects should be maintained per City code and operations; however, the City may partner with non-profits and community groups to perform maintenance.

## Tier 3 Projects

**Projects that require long-term study and funding by City of Austin landowners that will total more than \$50,000 dollars and require major construction.** Funds and grants may be raised on behalf of the community to implement these projects.. They will have required community engagement on their further development and route to implementation.

Toolkit Items Include:

- **Land Acquisition and Easements**
- **On-street Bicycle Lanes**
- **Sidewalk-Shared Use Path**
- **Green Infrastructure (Large Scale)**

---

### Maintenance Considerations:

Tier 3 projects should be maintained per City code and operations; however, the City may partner with non-profits and community groups to perform maintenance.

# SUSTAINABLE SITES AND CENTRAL WILLIAMSON CREEK GREENWAY

## Meets PreCertification, Targets Gold-Platinum for Implementation

SITES v2 Scorecard Summary			
YES	?	NO	
<b>1: SITE CONTEXT</b> Possible Points: 13			
10	0	0	CONTEXT P1.1 Limit development on farmland
Y			CONTEXT P1.2 Protect floodplain functions
Y			CONTEXT P1.3 Conserve aquatic ecosystems
Y			CONTEXT P1.4 Conserve habitats for threatened and endangered species
3			CONTEXT C1.5 Redevelop degraded sites 3 to 6
4			CONTEXT C1.6 Locate projects within existing developed areas 4
3			CONTEXT C1.7 Connect to multi-modal transit networks 2 to 3
<b>2: PRE-DESIGN ASSESSMENT + PLANNING</b> Possible Points: 3			
3	0	0	PRE-DESIGN P2.1 Use an integrative design process
Y			PRE-DESIGN P2.2 Conduct a pre-design site assessment
Y			PRE-DESIGN P2.3 Designate and communicate PSPZs
3			PRE-DESIGN C2.4 Engage users and stakeholders 3
<b>3: SITE DESIGN - WATER</b> Possible Points: 23			
20	0	0	WATER P3.1 Manage precipitation on site
Y			WATER P3.2 Reduce water use for landscape irrigation
5			WATER C3.3 Manage precipitation beyond baseline 4 to 6
5			WATER C3.4 Reduce outdoor water use 4 to 6
5			WATER C3.5 Design functional stormwater features as amenities 4 to 5
5			WATER C3.6 Restore aquatic ecosystems 4 to 6
<b>4: SITE DESIGN - SOIL + VEGETATION</b> Possible Points: 40			
11	4	0	SOIL-VEG P4.1 Create and communicate a soil management plan
Y			SOIL-VEG P4.2 Control and manage invasive plants
Y			SOIL-VEG P4.3 Use appropriate plants
6			SOIL-VEG C4.4 Conserve healthy soils and appropriate vegetation 4 to 6
4			SOIL-VEG C4.5 Conserve special status vegetation 4
6			SOIL-VEG C4.6 Conserve and use native plants 3 to 6
6			SOIL-VEG C4.7 Conserve and restore native plant communities 4 to 6
6			SOIL-VEG C4.8 Optimize biomass 3 to 6
4			SOIL-VEG C4.9 Reduce urban heat island effects 4
1			SOIL-VEG C4.10 Use vegetation to minimize building energy use 3 to 4
0	4		SOIL-VEG C4.11 Reduce the risk of catastrophic wildfire 4
<b>5: SITE DESIGN - MATERIALS SELECTION</b> Possible Points: 41			
2			MATERIALS P5.1 Eliminate the use of wood from threatened tree species
Y			MATERIALS C5.2 Maintain on-site structures and paving 2 to 4
4			MATERIALS C5.3 Design for durability and disassembly 3 to 4
4			MATERIALS C5.4 Use salvaged materials and plants 3 to 4
4			MATERIALS C5.5 Use recycled content materials 3 to 4
5			MATERIALS C5.6 Use regional materials 3 to 5
3			MATERIALS C5.7 Support responsible extraction of raw materials 1 to 5
3			MATERIALS C5.8 Support transparency and safer chemistry 1 to 5
3			MATERIALS C5.9 Support sustainability in materials manufacturing 5
3			MATERIALS C5.10 Support sustainability in plant production 1 to 5
<b>6: SITE DESIGN - HUMAN HEALTH + WELL-BEING</b> Possible Points: 30			
21	4	0	HHWB C6.1 Protect and maintain cultural and historic places
3			HHWB C6.2 Provide optimum site accessibility, safety, and wayfinding 2 to 3
2			HHWB C6.3 Promote equitable site use 2
2			HHWB C6.4 Support mental restoration 2
3			HHWB C6.5 Support physical activity 2
2			HHWB C6.6 Support social connection 2
4			HHWB C6.7 Provide on-site food production 3 to 4
4			HHWB C6.8 Reduce light pollution 4
4			HHWB C6.9 Encourage fuel efficient and multi-modal transportation 4
1			HHWB C6.10 Minimize exposure to environmental tobacco smoke 1 to 2
3			HHWB C6.11 Support local economy 3
<b>7: CONSTRUCTION</b> Possible Points: 17			
Y			CONSTRUCTION P7.1 Communicate and verify sustainable construction practices
Y			CONSTRUCTION P7.2 Control and retain construction pollutants
3			CONSTRUCTION C7.3 Restore soils disturbed during construction
Y			CONSTRUCTION C7.4 Restore soils disturbed by previous development 3 to 5
3			CONSTRUCTION C7.5 Divert construction and demolition materials from disposal 3 to 4
3			CONSTRUCTION C7.6 Divert reusable vegetation, rocks, and soil from disposal 3 to 4
3			CONSTRUCTION C7.7 Protect air quality during construction 2 to 4
<b>8: OPERATIONS + MAINTENANCE</b> Possible Points: 22			
0	9	0	O+M P8.1 Plan for sustainable site maintenance
Y			O+M P8.2 Provide for storage and collection of recyclables
0	5		O+M C8.3 Recycle organic matter 3 to 5
0	4		O+M C8.4 Minimize pesticides and fertilizer use 4 to 5
0			O+M C8.5 Reduce outdoor energy consumption 2 to 4
0			O+M C8.6 Use renewable sources for landscape electricity needs 3 to 4
0			O+M C8.7 Protect air quality during landscape maintenance 2 to 4
<b>9: EDUCATION + PERFORMANCE MONITORING</b> Possible Points: 11			
4	7	0	EDUCATION C9.1 Promote sustainability awareness and education 3 to 4
0	3		EDUCATION C9.2 Develop and communicate a case study 3
0	4		EDUCATION C9.3 Plan to monitor and report site performance 4
<b>10: INNOVATION OR EXEMPLARY PERFORMANCE</b> Bonus Points: 9			
3	0	0	INNOVATION C10.1 Innovation or exemplary performance 3 to 9
<b>YES ? NO</b>			
100	36	0	TOTAL ESTIMATED POINTS Total Possible Points: 200
<b>KEY</b>			
YES Project candidate points are achievable			
? Project striving to achieve points, not 100% confident			
NO Project is unable to achieve these credit points			
			<b>SITES Certification Levels</b>
			CERTIFIED 70
			<b>GOLD 100</b>
			PLATINUM 135

## Vision Plan Includes SITES Materials and Plants Criteria

### RECOMMENDED MATERIALS CRITERIA

Selecting sustainable and safe materials for construction along Williamson Creek will ensure the continued health of the creek and reduce the environmental impacts of construction site development. Learn more about these strategies through the Sustainable Sites Initiative ([sustainable sites.org](http://sustainable sites.org)).

Recommendation	Intent	Strategy 1	Strategy 2	Strategy 3	More Resources
<b>Use sustainable wood sources</b>	Many commonly-used landscape wood products are sourced from threatened tree species or treated with chemical preservatives. Recycled wood products are available from non-threatened tree species.	Review the Commission on Endangered Species (CES) website to review the status of tree species and ensure they are not threatened with extinction or listed as requiring trade control to avoid utilization (compatible with their survival).	Review the International Union for Conservation of Nature's "Red List of Endangered Species" to ensure the species is not in danger of extinction.	Use recycled plastic, composite lumber, or another material instead of wood.	<a href="http://www.fsc.org">www.fsc.org</a> <a href="http://www.tucfreetrade.org">www.tucfreetrade.org</a>
<b>Use salvaged materials and plants</b>	Salvaging landscape materials from projects or from on-site supplies (like a member of the Building Materials Reuse Association) can be an effective way to divert waste from landfill and conserve financial resources.	Identify salvaged materials suppliers or local demolition and construction projects. Search directories of reuse stores like Building Materials Reuse Association, <a href="http://www.buildingreuse.org">www.buildingreuse.org</a> .	Get in touch with a local native plant conservation group. Many of these groups "rescue" native plants from construction sites, and may be able to provide locally-sourced salvaged sites.	Green Building Research Center's searchable database ( <a href="http://www.greenbuilding.org/external/search.html">www.greenbuilding.org/external/search.html</a> )	Reuse Development Organization, <a href="http://www.reuse.org">www.reuse.org</a>
<b>Use materials with a high recycled content</b>	Use of new materials with a high recycled content reduces resource extraction and diverts materials away from landfill and curbs the production of new materials.	Speak with local materials suppliers about products that may help achieve this goal. Exclusion of some materials include plastic lumber with recycled content, asphalt with recycled asphalt aggregate, and high recycled content steel.	Learn more about recycled products and industry materials recycling.	The U.S. EPA's Industrial Materials Selector ( <a href="http://www.epa.gov/industrialmaterials">www.epa.gov/industrialmaterials</a> )	California Department of Resources and Recycling, Recycled Content Products ( <a href="http://www.cdwr.ca.gov/CDWR/recycled.asp">www.cdwr.ca.gov/CDWR/recycled.asp</a> )

# UNION PACIFIC TO SOUTH 1ST

# MEADOW CREEK TRAILHEAD

A group of contiguous floodplain buyout properties west of Emerald Forest Drive presents an opportunity for a major trailhead and community gathering space. Because these properties are within the floodplain, all site improvements must be low-impact and flood safe. Amenities shown here include a fitness lawn, hammock groves, and a labyrinth, providing spaces for neighbors to gather, relax, and stay healthy. Wildflower meadows, pollinator nesting boxes, and green infrastructure help to conserve and improve the creek environment. Other programming ideas include invasive species management, public art, and expansion of existing seating areas.

# ORLAND STREET TRAILHEAD

A PARD-owned site at the intersection of South 1st and Orland streets presents opportunities for creek access and amenities. This property includes areas outside of the floodplain, meaning it can accommodate a wider variety of programming and site improvements. This flexibility allows the site to serve as a potential hub for activities such as community gardening, environmental education, nature play, and invasive species management. The site also features a steep descent into the floodplain. A boardwalk or other more extensive site improvements may be necessary to ensure creek access and connectivity.

# SCORING AND APPLICATION OF CREEK IDEA CARDS

## Idea Card Scores

Once the voting period on Social Pinpoint closed, the results were tabulated and summarized. This graphic shows the net score each creek idea card received. Idea

cards received one point when they received a "thumbs up" and one negative point when they received a "thumbs down." The sum of these points produced the net score.

\* Indicates ideas added by community members via Social Pinpoint during feedback period

## Vision Plan- Placement of Creek Idea Cards

After the voting period on Social Pinpoint closed, the idea cards were then placed along the Greenway using information gathered from existing conditions, conversations with the working group, and the initial Social Pinpoint Greenway Mapping Exercise. A conceptual design for the entire greenway, as well as two trailheads at South 1st and Orland streets and Meadow Creek Drive were available for comment until January 18th, 2021.

Comment on the Central Williamson Creek Greenway Vision Plan in the forum below!

- You can download the documents from the Site Design section above.
1. Are there any ideas you would like to see at locations we don't currently have shown?
  2. Are there any ideas you see that should be removed from their locations because they are not ideal for that location?
  3. What do we not have enough of?
  4. What do we have too much of?
  5. Are there any other community-led ideas that should be added?
  6. What are we missing?
  7. Do you see anything that doesn't work?
