# Request - Chapter 25-2, Subchapter F, Article 2, § 2.1

---

Allow an increased floor-to-area ratio from 0.4:1 to 0.46:1.

# Site Location

# Site Location

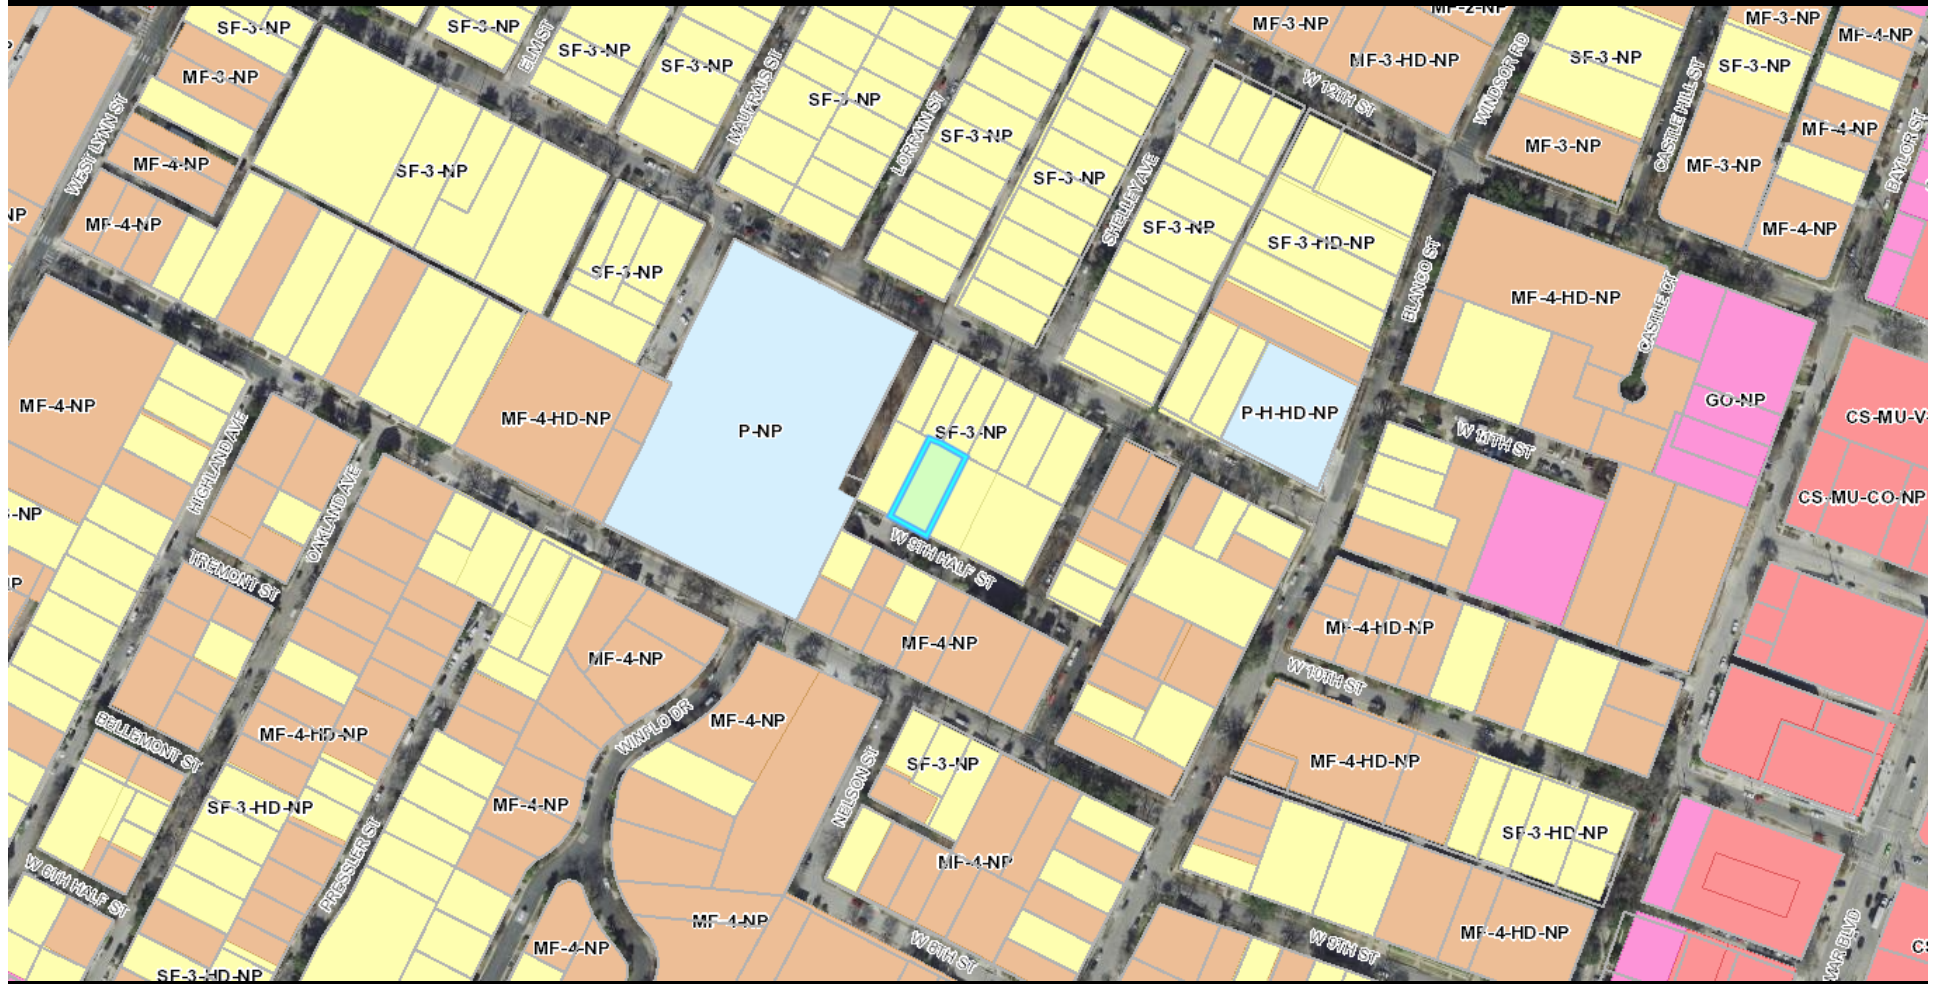

## Site Details

---

- SF-3-NP:
  - Family Residence – Neighborhood Plan
- 0.1806 acres / 7,865.6 square feet
  - Single-Family Use
- Old West Austin Neighborhood Plan
  - No FLUM exists for this NP

# Zoning

# D-4/7-PRESENTATION

# BOA Guidebook - Findings

---

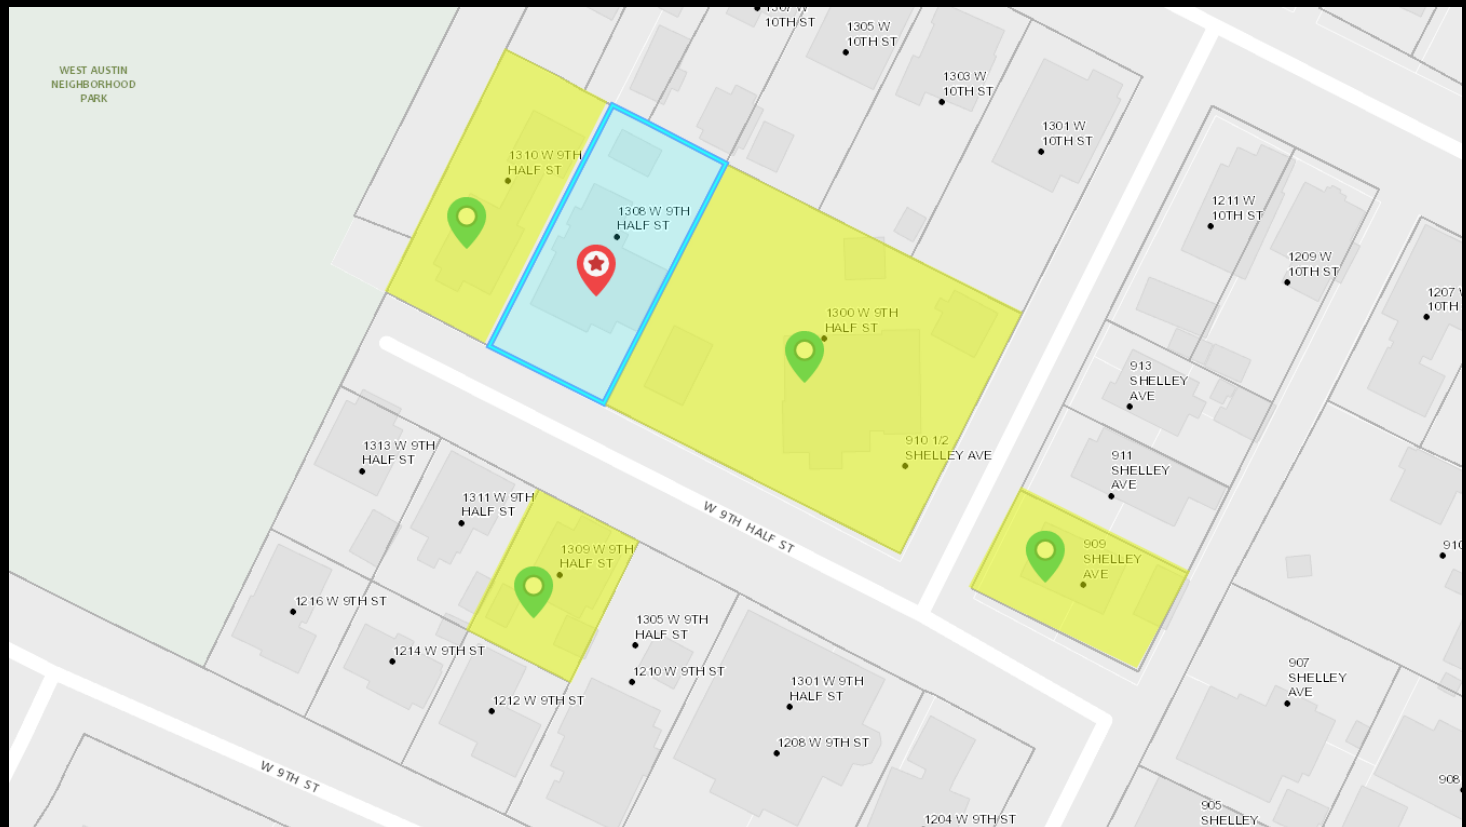

From the BOA Guidebook (pg. 7)

- *The regulation deprives the property of a “reasonable use” that is fundamental to its use and enjoyment and is allowed by zoning ordinance.*
  - The property is zoned SF-3 which is intended for use a single-family residential use. The regulations that exist do not allow for the existing family to continue to reside in the structure. A four-bedroom home is a reasonable single-family use.
- *A hardship that is unique to the property and not common to the area.*
  - The 156 square foot ADU counts toward the FAR but is space that cannot be allocated toward a child’s bedroom.
  - The existing structure is designed in such a way that an additional bedroom cannot be remodeled into the space.
- *Granting the variance would not change the character of the neighborhood, impair the use of adjacent property, or impair the purpose of the regulations.*
  - With the proposed addition, the building footprint will not expand, and the addition is going on top of an existing flat roof, therefore there is no additional impervious cover or building coverage. The addition would also fully comply with the McMansion building envelope.

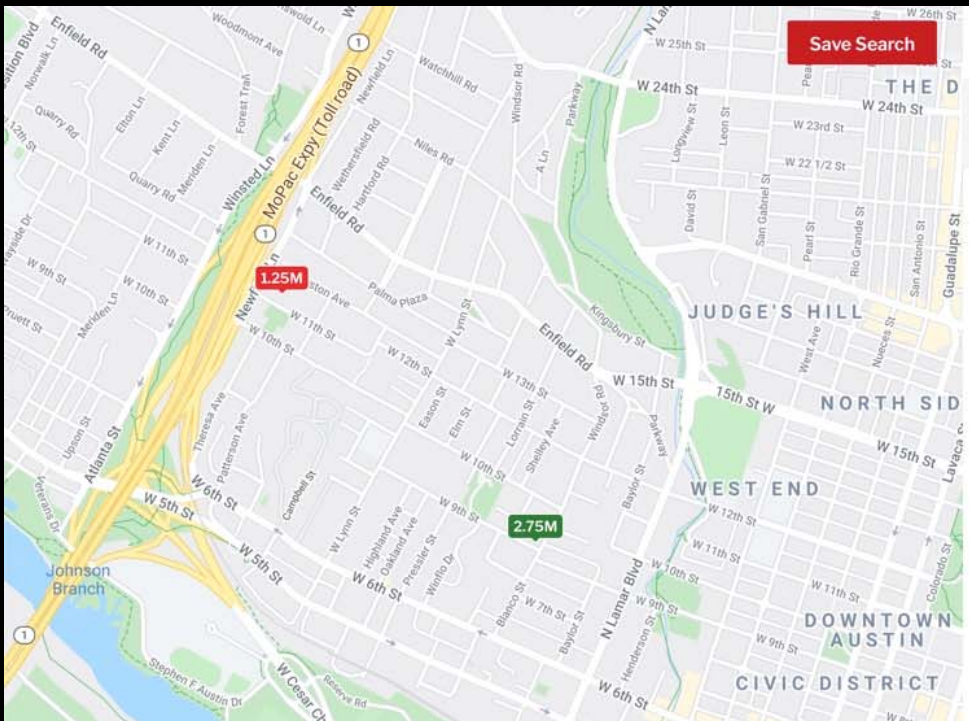

# Outreach

- Outreach to nearby property owners.
- Four letters of support received for the variance request.

# Proposed Addition

---

## Findings

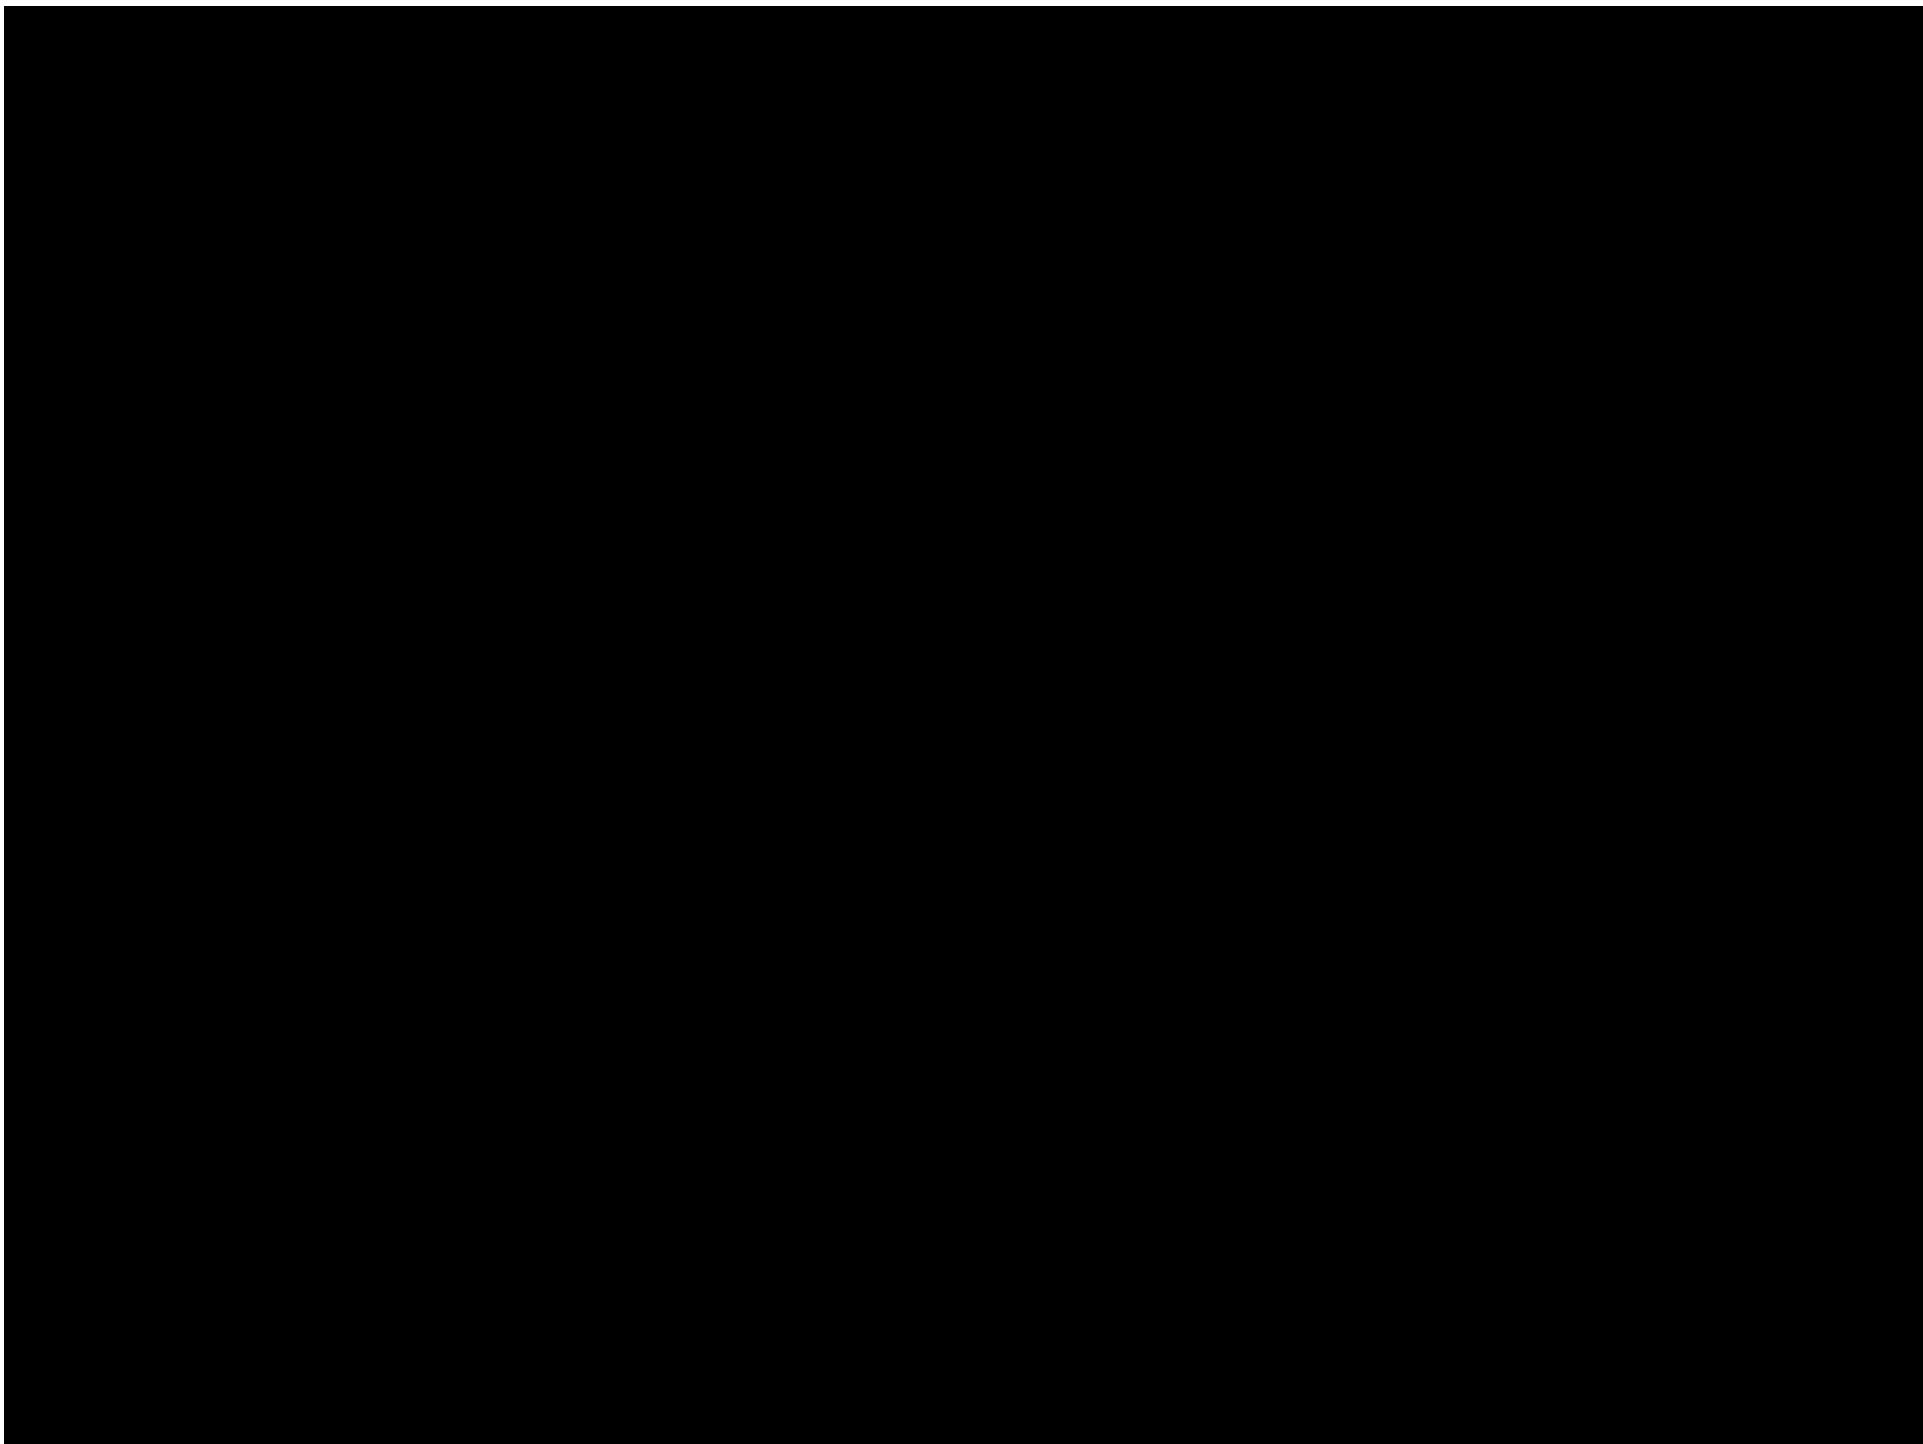

---

- A four-bedroom home is a **reasonable** single-family **use**.
- The **hardship** is the **design** of the property makes an interior **remodel** to add a bedroom **infeasible**.
- The **variance will not alter the character of the area** and **will not impair the purpose of regulations** because the proposed addition will not expand the building footprint, impervious cover, or building coverage.
- There will be **no adverse impact**: We have support from adjacent neighbors.

# Variance Request

---

We respectfully request that you grant a variance to increase the floor-to-area ratio to 0.46 to 1.0.

8 July, 2021

Jessica Cohen, Chair  
COA Board of Adjustment

Greetings,

I live adjacent to 1308 W. 9 ½ St., and do not oppose the floor-to-area variance request which has been made by Maryelaine Sotos and Bill Schurtz, and which would allow the increase of their 3,146 square feet to 3,646.

I believe that this request is in keeping with the character of the neighborhood, does not cause adverse impact, will allow the family to stay in their home, and that the resultant FAR would still be far less than many of the MF-4 properties in the neighborhood.

Regards,

A handwritten signature in black ink, appearing to be 'AM' followed by a long horizontal stroke.

Andrew McCalla

Dear Board Chair Jessica Cohen,

I own the property directly to the west of 1308 west 9th 1/2 Street., and do not oppose the floor- to- area variance request which has been made by Maryelaine Sotos and Bill Schurtz, and which would allow the increase of their 3,156 square feet to 3,646. I believe this request is in keeping with the character of the neighborhood, does not cause adverse impact, will allow the family to stay in their home, and that the resultant FAR would still be far less than many of the MF-4 properties in the neighborhood.

Respectfully,

Ed Remaley

Dear Board Chair Jessica Cohen,

We live at 1309 West 9th  $\frac{1}{2}$  street and are in support of the request by Maryelaine Sotos and Bill Schurtz to increase the floor-to-area ratio (FAR) going from 3,146 to 3,646 sqft for the property located at 1308 West 9  $\frac{1}{2}$  Street, Austin, Texas 78703. We believe this proposal is in line with the character of the neighborhood, does not cause an adverse impact, allows the existing family to stay in their home, and is significantly less dense than the comparable MF-4-zoned properties in the area.

Thank you.

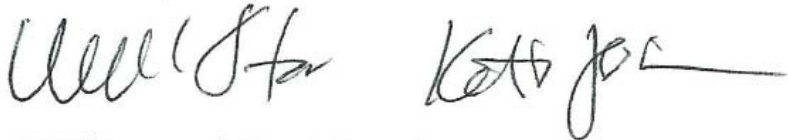

*Anthony J. Bender*  
Lynne and Tony Bender 

Dear Board Chair Jessica Cohen,

We live at 909 Shelly street, and we are in support of the request by Maryelaine Sotos and Bill Schurtz to increase the floor-to-area ratio (FAR) going from 3,146 to 3,646 sqft for the property located at 1308 West 9 ½ Street, Austin, Texas 78703. We believe this proposal is in line with the character of the neighborhood, does not cause an adverse impact, allows the existing family to stay in their home, and is significantly less dense than the comparable MF-4-zoned properties in the area.

Thank you.
