Healthcare in United Kingdom

Patients admitted to hospital

Daily and cumulative numbers of COVID-19 patients admitted to hospital. Data are not updated every day by all four nations and the figures are not comparable as Wales include suspected COVID-19 patients while the other nations include only confirmed cases.

-66.2%

Percent change from peak 7-day avg. of Jan 03, 2021 - Jan 09, 2021

Based on reporting from all hospitals (N=5,258). Due to potential reporting delays, data reported in the most recent 7 days (as represented by the shaded bar) should be interpreted with caution.

Small shifts in historic data may occur due to changes in the CMS Provider of Services file, which is used to identify the cohort of included hospitals. Data since December 1, 2020 have had error correction methodology applied. Data prior to this date may have anomalies that are still being resolved. Data prior to August 1, 2020 are unavailable.

● Daily Admissions of Patients with Confirmed COVID-19 — 7-Day Moving Average

Unified Hospital Dataset, White House COVID-19 Team, Data Strategy and Execution Workgroup

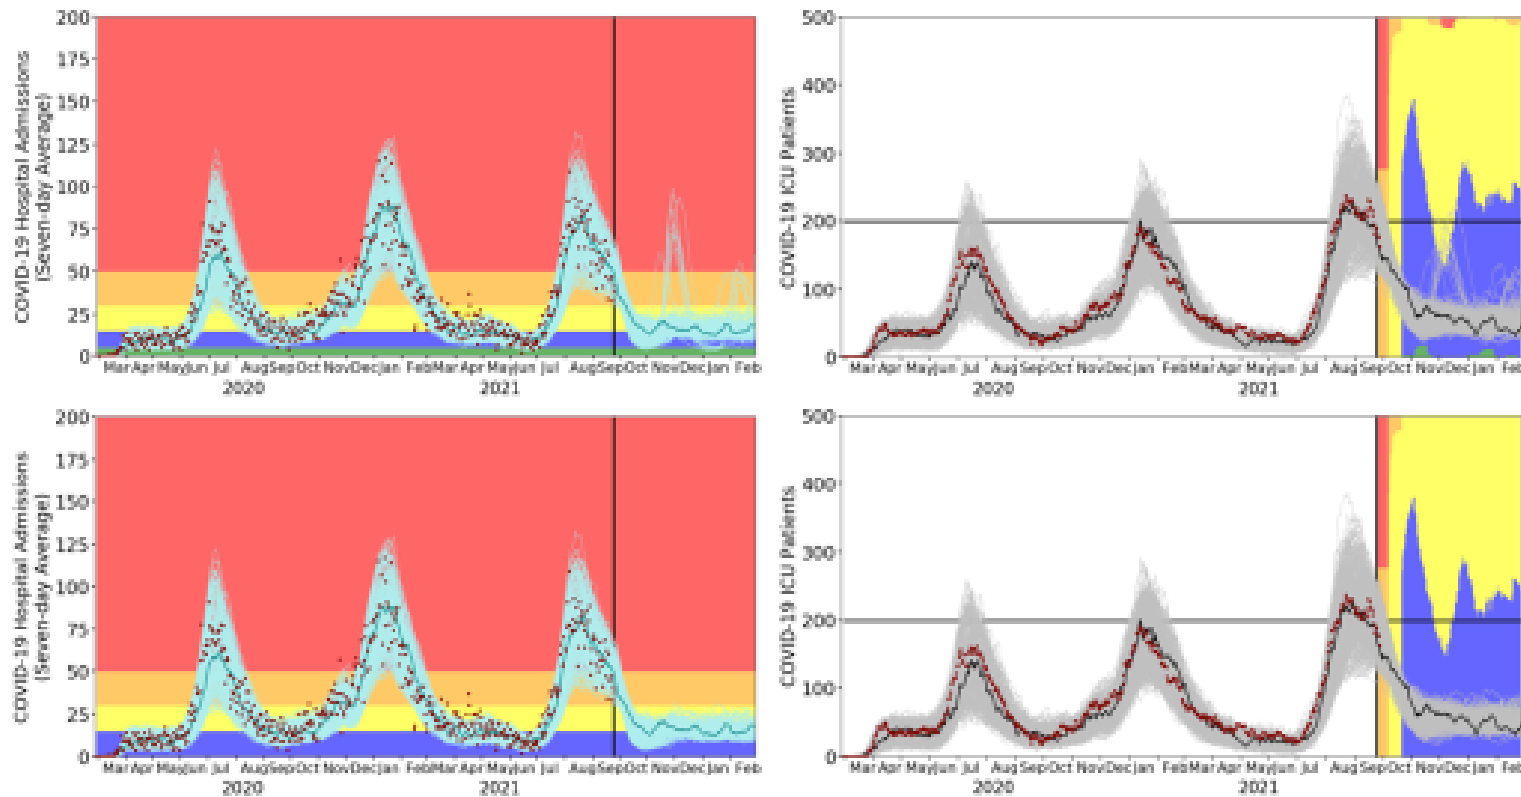

Figure 1: Projected COVID-19 hospital admissions (left) and COVID-19 ICU patient census (right) in the Austin-Round Rock MSA through February 28, 2022, assuming that the Delta variant continues to spread. *Top row:* The projections assume the current thresholds in Austin's staged-alert system, i.e., a 7-day moving average of 5, 15, 30, and 50 daily COVID-19 admissions trigger changes in the green-blue, blue-yellow, yellow-orange, and orange-red stages, respectively. The red points represent historical data, the black horizontal line represents ICU capacity (200 beds), the light curves indicate stochastic simulations (300 per graph), and solid lines illustrate a representative projection. Note the projected spikes in admissions and ICU census in November and December. These occur shortly after transitions from blue (stage 2) to green (stage 1). The colors in the right-hand plot show the proportion of sample paths that are in each stage at each point in time, including those in green (stage 1) during November. *Bottom row:* The plots are identical to those in the top row except that the threshold for moving from blue to green is reduced from five to zero. None of the 300 projections under this policy resulted in November-December spikes.

What is driving the rise in UK Covid cases?

A drop-off in mask wearing and slow uptake of booster jabs are among the reasons for the continuing growth

Mobile Operations

13 Events This Week Including:

- Korean Culture Center
- Austin Transition Center
- Austin Resource Center for the Homeless

Booster and Pediatric Emergency Use Authorization Status

Centers for Disease Control and Prevention Recommendations

- Pfizer-BioNTech or Moderna COVID-19 booster vaccines are recommended for the following groups 6 months or more after their initial series:
 - 65 years and older
 - Age 18+ who live in [long-term care settings](#)
 - Age 18+ who have [underlying medical conditions](#)
 - Age 18+ who work or live in [high-risk settings](#)
- J&J COVID-19 Vaccine booster shot is recommended at 2 months after first dose for all populations that received an initial dose.
- CDC's recommendations now allow for mix and match dosing for booster shots.
- FDA is meeting today (10/26) to consider clinical trial data submitted by Pfizer for use of vaccines for children ages 5-11 years

Evidence Based Recommendations Process

PLANNING AHEAD: PEDIACTRIC VACCINE STRATEGY

Proactive planning for the COVID-19 vaccine for 5-11:

Direct Operations

- APH will be a pediatric COVID-19 provider
- 11/8 distribute vaccine through four established locations
- 11/15 continue four static sites and add school pop up clinics in areas that have limited access points.
- CHW team coordinating with schools in zip codes identified and promotion of clinics

Provider support

- Technical support to broader provider community.
- Provider survey to assess capacity and identify needs and gaps
- Parent survey to assess vaccine location and provider preferences and identify hesitancy
- Provider meeting Nov. 5th to address TA needs, safety concerns, and connect the provider network
- TA on vaccine management and reimbursement

Vaccine Distribution Community Engagement Strategy
