THE PURPOSE OF ZILKER PARK VISION PLAN

To develop a visionary framework to guide the restoration and future stewardship of Zilker Metropolitan Park

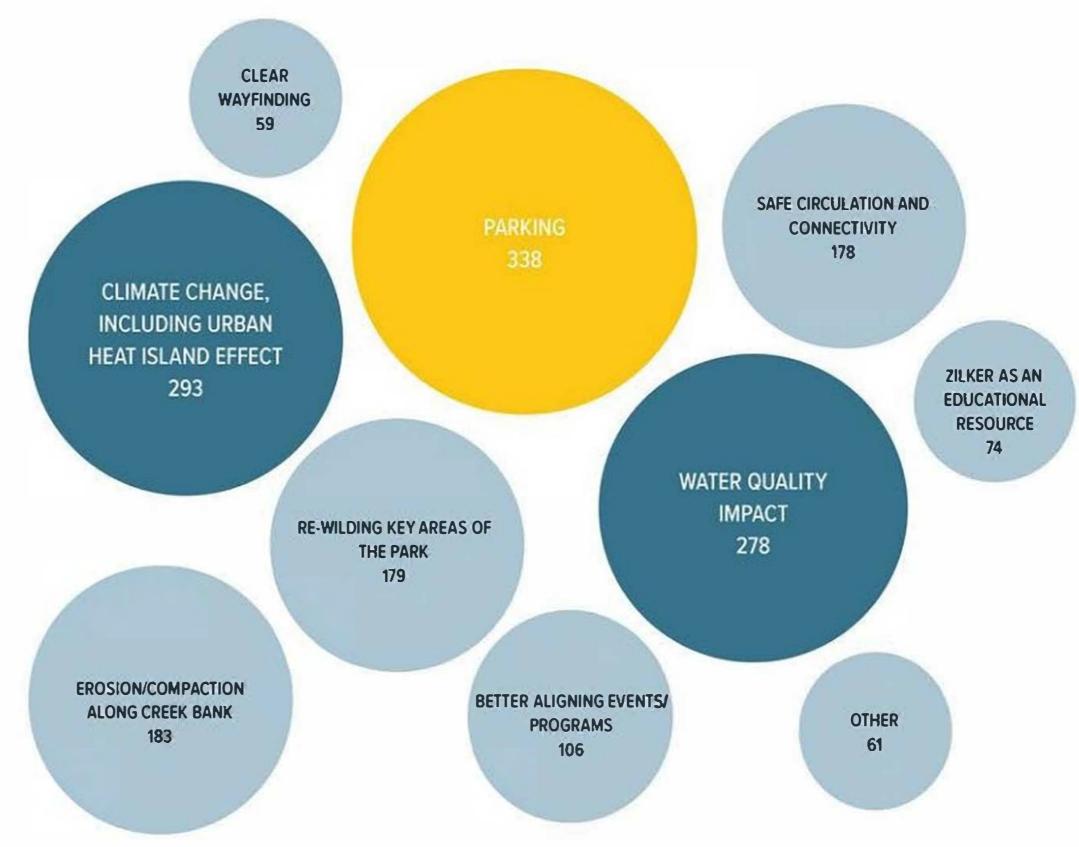

- Recommendations of enhancement of the park's existing facilities and programs
- Determine the recreational and amenity needs
- Restorative focus on the historic, cultural, ecological and cultural features
- Recommendations for mobility within and around the park
- Sustainable revenue strategy

PURPOSE OF ZILKER PARK VISION PLAN PREVIOUS SURVEY RESULT ABOUT PARK CHALLENGES

CURRENTLY, WHAT IS THE BIGGEST BARRIER TO ENJOYMENT OF ZILKER PARK?

CHOOSE THE TOP THREE (3) ISSUES THAT YOU THINK THE ZILKER PARK VISION PLAN SHOULD ADDRESS.

GUIDING PRINCIPL AND GOALS IS

GUIDING PRINCIPLES UPDATED FROM YOUR FEEDBACK

- The Plan should treat the Park as an **ecological treasure**.
- Recognize the park's relation
 to water and explore
 opportunities for interaction.

Nature and Ecology

- Zilker Park should serve the entire community of Austin.
- Align programs with community interest.

Diversity and Inclusion

- The plan should knit the
- segmented pieces of the park
- together.
- The arri

on l

 The Plan should treat the Park's historic and cultural resources as a valued legacy to be celebrated for future generations.

History and Culture

- The park is a place you can
 - arrive to by **multiple travel** options.

Accessibility

- The Plan should be forwardlooking for future generations.
- Zilker Park should serve as an example of sustainability, protecting and enhancing our natural spaces and assets.

Sustainability

Sec. Co

GOALS **UPDATED FROM YOUR FEEDBACK**

Nature and Ecology

- Protect, enhance, and restore Zilker's natural resources.
- Establish an interpretive program to educate visitors.
- Public stewardship should be developed
- Ensure safe and sustainable access to the water.
- Support and rehabilitate native plants and species.

Diversity and Inclusion

- The Park should be welcoming to individuals, small groups and able to accommodate large groups.
- The Plan should support equitable access.
- Support new and enhance existing learning opportunities within the park.
- Sustain the implementation and maintenance of the park and utilize the support of volunteers.
- Encourage ethnic, cultural and economic inclusion.

The Plan should honor and respect the **Park's historic** and cultural resources.

- Balance between historic preservation and current/ future needs.
- Create opportunities for local artists.

- the people that lived on the land throughout history. Establish and integrate education components.

History and Culture

Celebrate the stories of

3

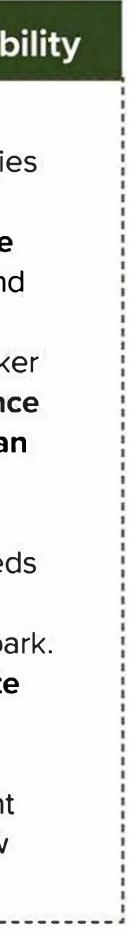

Accessibility

- Improve pedestrian, bicycle and vehicular circulation between the north and south side of Barton Springs Rd.
- Examine the surrounding trail network to create and extend safe active travel within and through the park.
- Create accessible multimodal transportation networks within the park.
- Improve the wayfinding.
- Collaborate with Capital Metro and TXDOT
- Achieve high level of ADA accessibility within the park.

Sustainability

- Implement adaptive management strategies to create a resilient landscape in the face of climate change and dynamic user needs.
- As an urban park, Zilker should achieve balance between metropolitan use and ecological/ environmental.
- Balance revenue needs with operations and maintenance of the park.
- Explore **public/private** partnerships that extend the reach of the Parks Department to accommodate new opportunities.

ACCESSIBILITY, MOBILITY, AND TRANSPORTATION

通い内容

ACTIVE TRANSPORTATION TRAVELING BY FOOT, BIKE, AND TRAIL

- Goal: Better connecting the trail system to and from and within the park.
- Bringing the Greenbelt trailhead to a more prominent area nearer park entrance.
- Improving visibility and access points to and from Butler Trail.
- Improving MoPac path access.
- Implementing Butler Trail Safety Plan recommendations, including a new trail bridge across Barton Creek – e.g., at Lou Neff Pt.
- Adding rolling and walking trail network within the park to directly connect attractions and serve people passing through.

ECOLOGICAL UPLIFT THE DEFINITION

Ecological uplift is the process of enhancing ecological systems in a landscape where they may not exist, are impaired, or simply can be improved.

Ecological Uplift actions at Zilker Park will:

- IMPROVE ECOSYSTEM FUNCTION
- EXPAND CRITTER HABITATS
- ENHANCE CONNECTION BETWEEN HUMANS AND NATURE
- INCREASE LANDSCAPE RESILIENCY TO CLIMATE CHANGE AND SEVERE WEATHER EVENTS

ECOLOGICAL UPLIFT

UPLAND WOODLAND

RIPARIAN WOODLAND

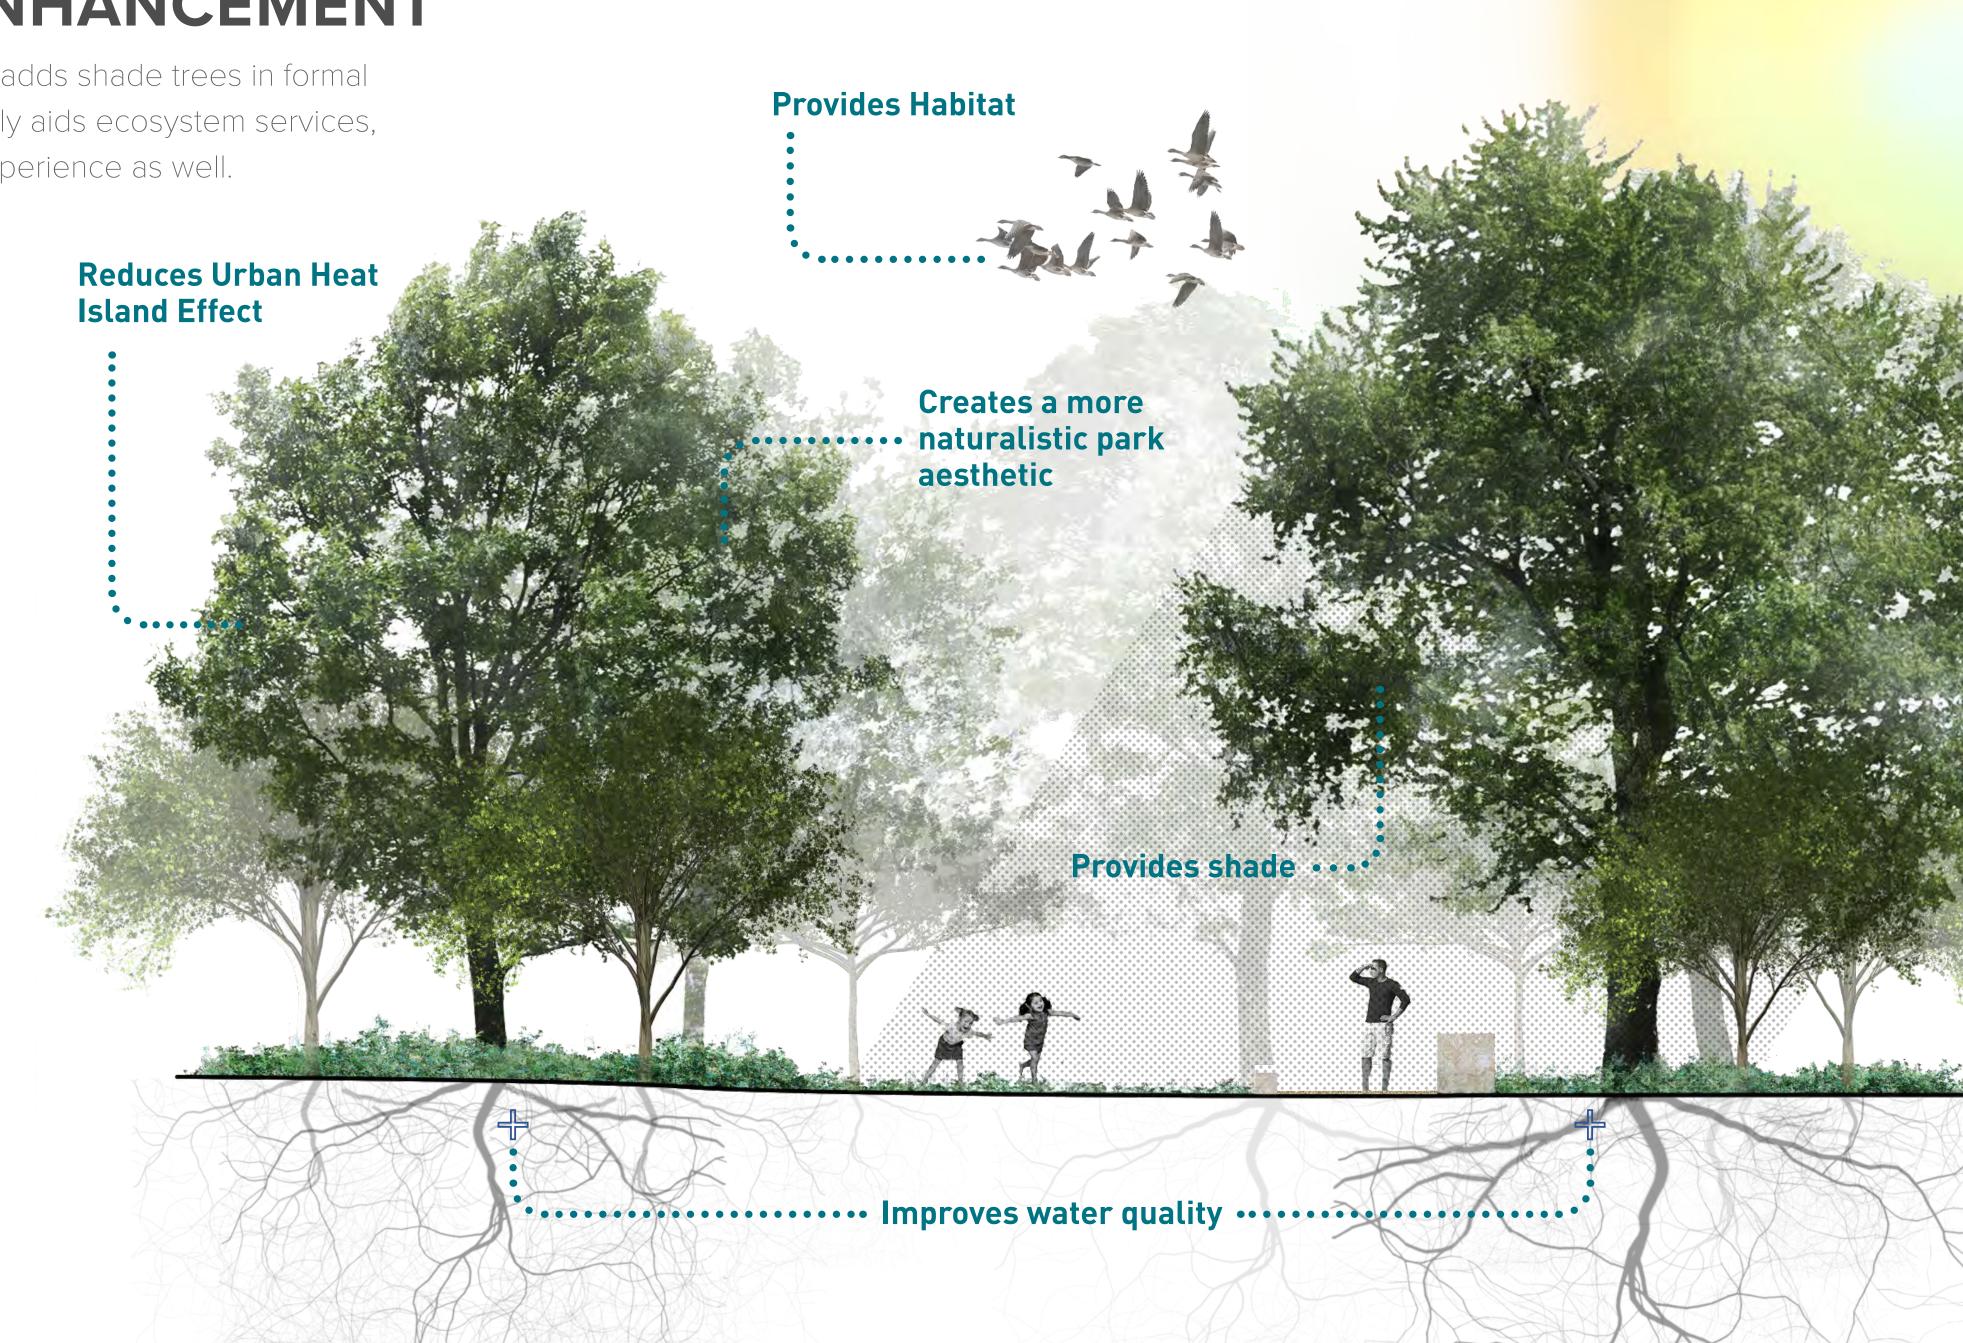

MEADOW

CANOPY ENHANCEMENT

Canopy enhancement adds shade trees in formal park areas. This not only aids ecosystem services, it improves the user experience as well.

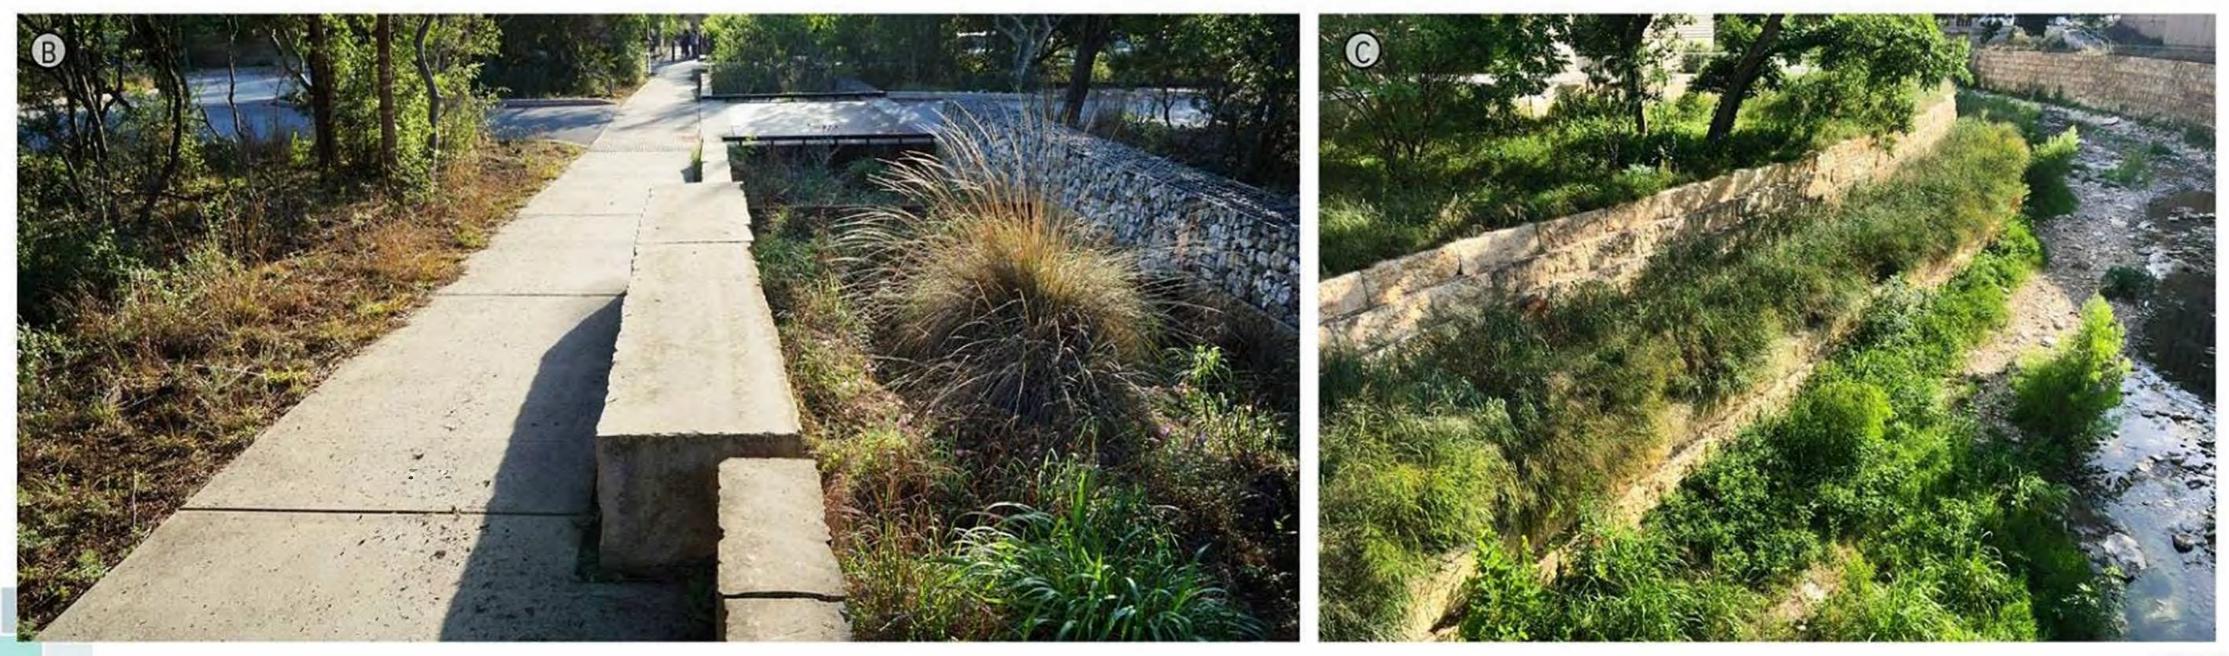

SUSTAINABILITY GREEN STORMWATER INFRASTRUCTURE OPTIONS

The images depict Green Stormwater Infrastructure precedents found in the Central Texas area.

- A raingarden collects runoff from a building and pathway at **Dell Medical**.
- B A swale directs water and allows for interesting vegetation along a pathway at **Hardberger Park** near San Antonio.
- C Limestone terraces allow vegetation to be planted along the bank of Waller Creek, slowing down water as it flows from the urban areas at **Dell Medical**.

SUSTAINABILITY GREEN STORMWATER INFRASTRUCTURE OPTIONS

The graphic visualizes the Lower Barton Creek transformation. Green infrastructure works in collaborate with enhanced woodland and formalization of the trail edge and water access in order to create an exceptional space for humans and critters.

- EXISTING CONDITIONS: shows degradation from lack of stormwater management upslope, trampling, and flooding that has resulted in compacted soils, erosion, an incomplete canopy, struggling vegetation, and a degraded user experience.
- PROPOSED CONDITIONS: shows the ecological health and enhanced user experience that results by addressing upslope stormwater with green stormwater infrastructure, formalizing trails and water access, installing physical barriers to plantings, decompacting soils, and planting robust native canopy, understory, and groundcover vegetation.

Stormwater Flow

Stormwater flows quickly off of the hillside, along the trail, and eventually to Barton Creek,

Erosion

Severe erosion is occurring, exposing tree roots and making it difficult for plants to propogate on the shoreline.

Unregulated Water Access

Heavy human use accessing the water's edge has caused severe erosion as well as compaction.

Enhanced Woodland

Enhanced canopy and understory species will slow down water flow off of the slope and increase habitat for native specles.

Trail Edge

Cable fences and large rock edges can Established vegetation can slow deter people from exploring off trail.

Green Infrastructure

down water on its way to Barton Creek as well as deter people from short cutting.

Formalized Water Access

By formalizing a trail and space near the water. ecological degradation will be minimized, allowing riparian communities to thrive.
