

HEALTHCARE MODEL

AFRICAN AMERICAN MEN'S HEALTH CLINIC

Serving all men of color.

OVERVIEW

Mission

To improve the health status for men of color through culturally appropriate holistic mental and physical health services.

Target Population

African American and Hispanic men residing in the Eastern Crescent of Travis County.

ISSUES

- Life expectancy for African American men is 7.1 years less than for others.
- Stroke kills 180% more African American men.
- African American men are 30% more likely to die from heart disease.
- Hispanic men are more likely to have diabetes and related kidney failure.
- Mental Health utilization is limited.

Data Sources: Centers for Disease Control & Prevention and the Morbidity and Mortality Week Reports 3/23/2020

A background image showing two men in a gym setting. One man, who is Black, is wearing a red shirt and is in the background, slightly out of focus. The other man, who is Asian, is in the foreground, wearing a light blue shirt, and is smiling. They appear to be working out together.

STRATEGIES

- Improve healthcare access for men of color in the Eastern Crescent of Travis County.
- Acknowledge local historical events and cultural differences that resulted in long-standing disparities.
- Increase trust in the local health care system.
- Provide disease prevention education to address health literacy.

APPROACH

PARTNERSHIPS & COLLABORATIONS

Collaborate with agencies to create an equitable and holistic approach to health services.

COMMUNITY ENGAGEMENT

Connect with community stakeholders virtually and in person to receive feedback to be used in developing healthcare programs and services.

SERVICE DELIVERY STRATEGY

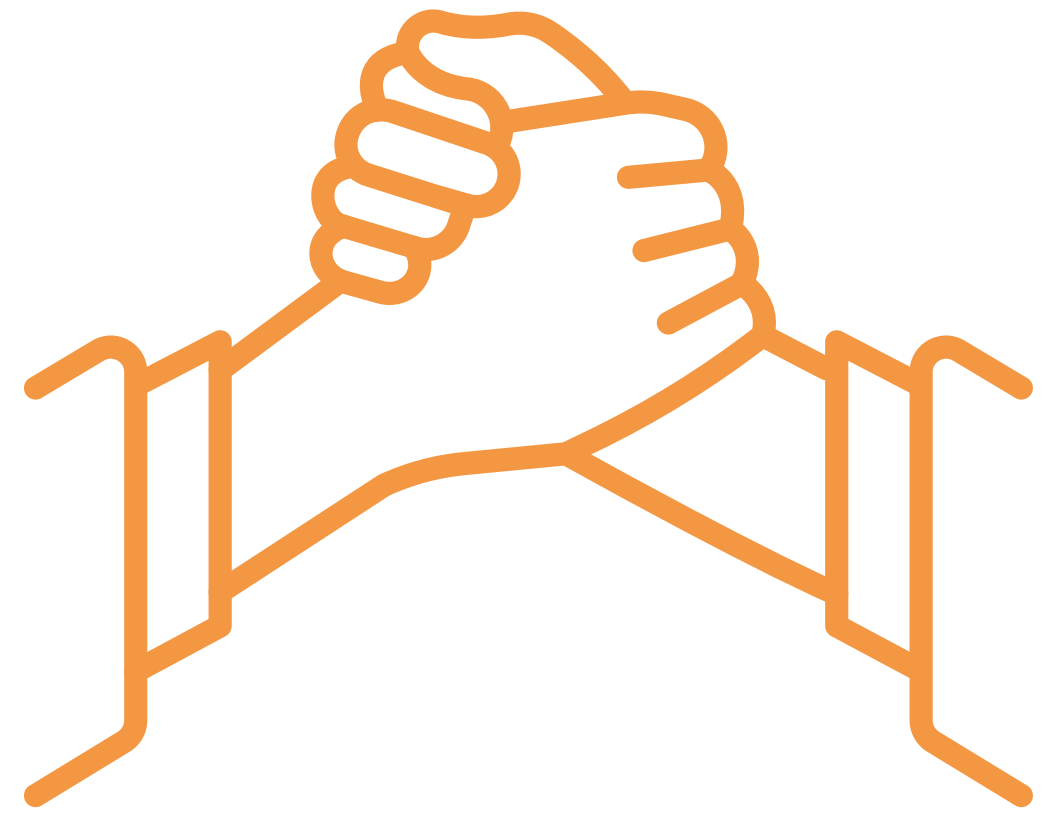

Holistic services will include mental and physical health which will be provided in a culturally appropriate manner.
