CITY COUNCIL DATE: To be scheduled **ACTION:**

PLANNING COMMISSION RECOMMENDATION:

February 22, 2022 -

February 8, 2022 – Postponed to February 22, 2022 on the consent agenda by the Planning Commission. [J. Shieh – 1st; G. Cox – 2nd] Vote: 11-0 [C. Hempel abstain on Items B-15 & B-16. S. R. Praxis absent].

January 25, 2022 - Postponed to February 8, 2022 on the consent agenda by the Planning Commission. [J. Shieh – 1st; C. Hempel – 2nd] Vote: 10-0 [P. Howard, J. Mushtaler and S. R. Praxis absent].

November 9, 2021 – Approved the applicant’s request for an indefinite postponement on the consent agenda. [C. Hempel – 1st; G. Cox – 2nd] Vote: 9-0-1 [C. Llanes Pulido abstained. Y. Flores, S. R. Praxis and R. Schneider absent].

October 12, 2021- Postponed on the consent agenda to November 9, 2021 at the request of the neighborhood. [R. Schneider – 1st; J. Shieh – 2nd] Vote: 9-0 [A. Azhar, J. Paulo Connolly, and C. Hempel absent].

September 28, 2021- Postponed on the consent agenda to October 12, 2021 at the request of the neighborhood. [A. Azhar – 1st; R. Schneider – 2nd] Vote: 10-0 [G. Cox and J. Shieh absent. C. Hempel recused from Item B-10].

STAFF RECOMMENDATION: Recommended for applicant’s request for Mixed Use land use.

BASIS FOR STAFF’S RECOMMENDATION: The property is a 0.95-acre vacant tract of land with CS-NP zoning and Commercial future land use. To the north is a single-family home zoned SF-3-NP with primary frontage on Carson Ridge. The FLUM shows Transportation on the property to the north presumably because the plan supported the extension of Carson Ridge, an undeveloped road that has proposed right-of-way through this property. The property to the south is a single-family home zoned CS-NP with a future land use of Commercial.

Staff supports the applicant’s request for Mixed Use land use. The Mixed use land use and CS-MU-NP zoning would allow for the development of housing units which could provide additional housing units and types to the Montopolis planning area and the city. The Montopolis Plan supports creating homes for all stages of life and the creation of multiple housing types.

LAND USE

Goal 1: Improve the Quality of Life in Montopolis through Land Use and Zoning Decisions.

Goal 2: Create Homes for all Stages of Life within Montopolis.

Objective 4: Enhance and protect existing single family housing.

Objective 5: Create multiple housing types of varied intensities.

Action 16: Allow "**Small Lot Amnesty**" throughout the entire Montopolis neighborhood as described in the Smart Growth Infill proposals, permitting new single-family development on existing lots of 2,500 square feet or greater.

Action 17: Allow **garage apartments** and secondary residential units throughout the Montopolis neighborhood on lots of 5,750 square feet or greater with MF-6 or less restrictive zoning. Other site development standards would apply, as specified in the Smart Growth Infill "Secondary Apartment" option.

Action 18: Allow "**Cottage Lot**" development - single-family units on lots of 2,500 square feet or greater with MF-6 or less restrictive zoning. Other site development standards would apply, as specified in the Smart Growth Infill "Cottage Lot" option.

Action 19: Allow "**Urban Home**" development - single-family units on lots of 3,500 square feet or greater with MF-6 or less restrictive zoning. Other site

LAND USE DESCRIPTIONS

EXISTING LAND USE ON THE PROPERTY

Single family - Detached or two-family residential uses at typical urban and/or suburban densities.

Purpose

1. Preserve the land use pattern and future viability of existing neighborhoods;
2. Encourage new infill development that continues existing neighborhood patterns of development; and

3. Protect residential neighborhoods from incompatible business or industry and the loss of existing housing.

Application

1. Existing single-family areas should generally be designated as single family to preserve established neighborhoods; and
2. May include small lot options (Cottage, Urban Home, Small Lot Single Family) and two-family residential options (Duplex, Secondary Apartment, Single Family Attached, Two-Family Residential) in areas considered appropriate for this type of infill development.

PROPOSED LAND USE ON THE PROPERTY

Mixed Use - An area that is appropriate for a mix of residential and non-residential uses.

Purpose

1. Encourage more retail and commercial services within walking distance of residents;
2. Allow live-work/flex space on existing commercially zoned land in the neighborhood;
3. Allow a mixture of complementary land use types, which may include housing, retail, offices, commercial services, and civic uses (with the exception of government offices) to encourage linking of trips;
4. Create viable development opportunities for underused center city sites;
5. Encourage the transition from non-residential to residential uses;
6. Provide flexibility in land use standards to anticipate changes in the marketplace;
7. Create additional opportunities for the development of residential uses and affordable housing; and
8. Provide on-street activity in commercial areas after 5 p.m. and built-in customers for local businesses.

Application

1. Allow mixed use development along major corridors and intersections;
2. Establish compatible mixed-use corridors along the neighborhood's edge

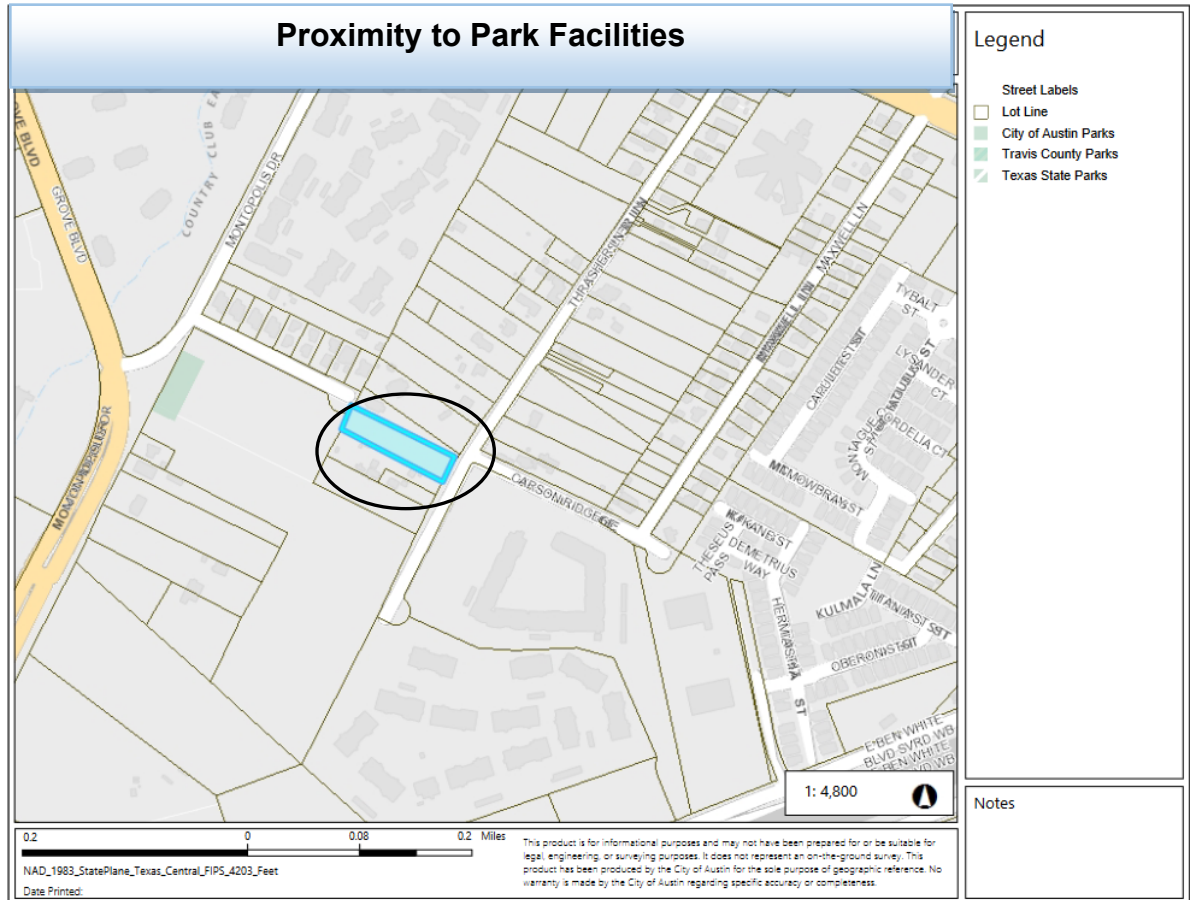

3. The neighborhood plan may further specify either the desired intensity of commercial uses (i.e. LR, GR, CS) or specific types of mixed use (i.e. Neighborhood Mixed Use Building, Neighborhood Urban Center, Mixed Use Combining District);
4. Mixed Use is generally not compatible with industrial development, however it may be combined with these uses to encourage an area to transition to a more complementary mix of development types;
5. The Mixed Use (MU) Combining District should be applied to existing residential uses to avoid creating or maintaining a non-conforming use; and
6. Apply to areas where vertical mixed use development is encouraged such as Core Transit Corridors (CTC) and Future Core Transit Corridors.

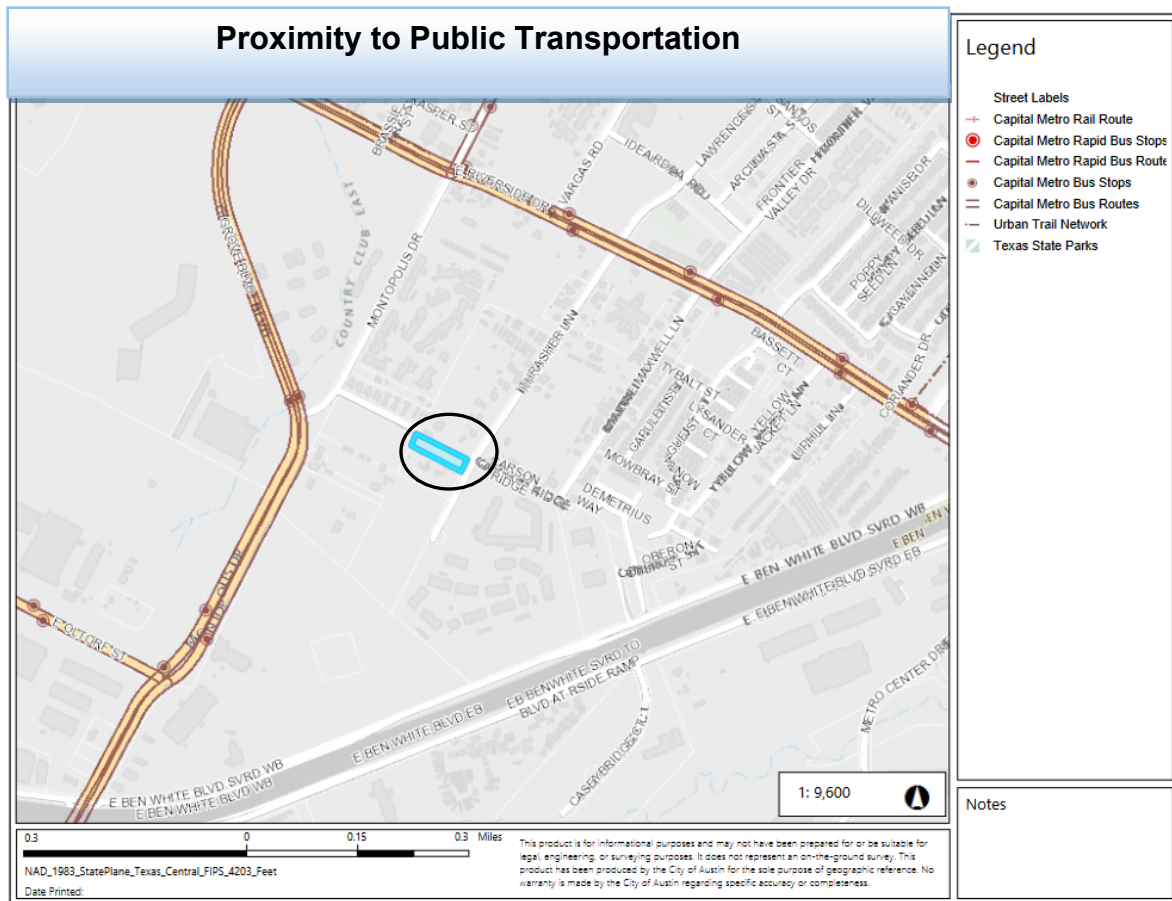

IMAGINE AUSTIN PLANNING PRINCIPLES

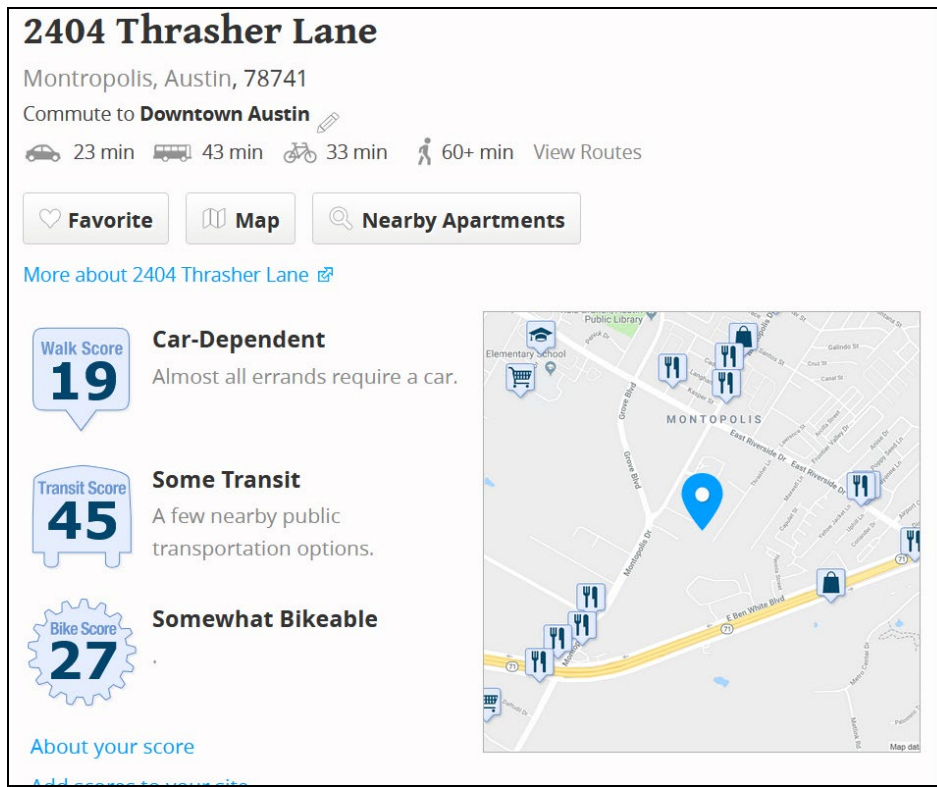

1. Create complete neighborhoods across Austin that provide a mix of housing types to suit a variety of household needs and incomes, offer a variety of transportation options, and have easy access to daily needs such as schools, retail, employment, community services, and parks and other recreation options.
 - ***The proposed land use and zoning could allow for the development of residential uses that could add to the variety of housing types in the City and the planning area. There are bus routes on E. Riverside Drive to the north and along Grove Boulevard to west. There are numerous businesses located along E. Riverside Drive.***
2. Support the development of compact and connected activity centers and corridors that are well-served by public transit and designed to promote walking and bicycling as a way of reducing household expenditures for housing and transportation.
 - ***The property is located between the McKinney Jobs Center to the south of the property and the Riverside Station Town Center to the north of the property. E. Riverside Drive is an activity corridor.***
3. Protect neighborhood character by ensuring context-sensitive development and directing more intensive development to activity centers and corridors, redevelopment, and infill sites.
 - ***Mixed Use land use appropriate between the commercial zoning and land uses to the south and the single family residential to the north.***
4. Expand the number and variety of housing choices throughout Austin to meet the financial and lifestyle needs of our diverse population.
 - ***The proposed zoning and land use could allow for residential development that could expand the number and variety of housing choices.***
5. Ensure harmonious transitions between adjacent land uses and development intensities.

- ***The proposed Mixed Use land use will provide a transition between the single-family use to the north and the commercial land use to the south.***
6. Protect Austin's natural resources and environmental systems by limiting land use and transportation development over environmentally sensitive areas and preserve open space and protect the function of the resource.
 - ***The property is in the Desired Development Zone.***
 7. Integrate and expand green infrastructure—preserves and parks, community gardens, trails, stream corridors, green streets, greenways, and the trails system—into the urban environment and transportation network.
 - ***The nearest park is to the west of the property that appears to be associated with The Mont apartment complex.***
 8. Protect, preserve and promote historically and culturally significant areas.
 - ***To staff's knowledge there is no historic or cultural significance to this property.***
 9. Encourage active and healthy lifestyles by promoting walking and biking, healthy food choices, access to affordable healthcare, and to recreational opportunities.
 - ***The property is not the most walkable environment.***
 10. Expand the economic base, create job opportunities, and promote education to support a strong and adaptable workforce.
 - ***Not directly applicable.***
 11. Sustain and grow Austin's live music, festivals, theater, film, digital media, and new creative art forms.
 - ***There are several music venues along E. Riverside Drive to the north of the property.***
 12. Provide public facilities and services that reduce greenhouse gas emissions, decrease water and energy usage, increase waste diversion, ensure the health and safety of the public, and support compact, connected, and complete communities.
 - ***Not applicable.***

IMAGINE AUSTIN GROWTH CONCEPT MAP

Definitions

Neighborhood Centers - The smallest and least intense of the three mixed-use centers are neighborhood centers. As with the regional and town centers, neighborhood centers are walkable, bikable, and supported by transit. The greatest density of people and activities in neighborhood centers will likely be concentrated on several blocks or around one or two intersections. However, depending on localized conditions, different neighborhood centers can be very different places. If a neighborhood center is designated on an existing commercial area, such as a shopping center or mall, it could represent redevelopment or the addition of housing. A new neighborhood center may be focused on a dense, mixed-use core surrounded by a mix of housing. In other instances, new or redevelopment may occur incrementally and concentrate people and activities along several blocks or around one or two intersections. Neighborhood centers will be more locally focused than either a regional or a town center. Businesses and services—grocery and department stores, doctors and dentists, shops, branch libraries, dry cleaners, hair salons, schools, restaurants, and other small and local businesses—will generally serve the center and surrounding neighborhoods.

Town Centers - Although less intense than regional centers, town centers are also where many people will live and work. Town centers will have large and small employers, although fewer than in regional centers. These employers will have regional customer and employee bases, and provide goods and services for the center as well as the surrounding areas. The buildings found in a town center will range in size from one-to three-story houses, duplexes,

townhouses, and rowhouses, to low-to midrise apartments, mixed use buildings, and office buildings. These centers will also be important hubs in the transit system.

Regional Centers - Regional centers are the most urban places in the region. These centers are and will become the retail, cultural, recreational, and entertainment destinations for Central Texas. These are the places where the greatest density of people and jobs and the tallest buildings in the region will be located. Housing in regional centers will mostly consist of low to high-rise apartments, mixed use buildings, row houses, and townhouses. However, other housing types, such as single-family units, may be included depending on the location and character of the center. The densities, buildings heights, and overall character of a center will depend on its location.

Job Centers - Job centers accommodate those businesses not well-suited for residential or environmentally- sensitive areas. These centers take advantage of existing transportation infrastructure such as arterial roadways, freeways, or the Austin-Bergstrom International airport. Job centers will mostly contain office parks, manufacturing, warehouses, logistics, and other businesses with similar demands and operating characteristics. They should nevertheless become more pedestrian and bicycle friendly, in part by better accommodating services for the people who work in those centers. While many of these centers are currently best served by car, the growth Concept map offers transportation choices such as light rail and bus rapid transit to increase commuter options.

Corridors - Activity corridors have a dual nature. They are the connections that link activity centers and other key destinations to one another and allow people to travel throughout the city and region by bicycle, transit, or automobile. Corridors are also characterized by a variety of activities and types of buildings located along the roadway — shopping, restaurants and cafés, parks, schools, single-family houses, apartments, public buildings, houses of worship, mixed-use buildings, and offices. Along many corridors, there will be both large and small redevelopment sites. These redevelopment opportunities may be continuous along stretches of the corridor. There may also be a series of small neighborhood centers, connected by the roadway. Other corridors may have fewer redevelopment opportunities, but already have a mixture of uses, and could provide critical transportation connections. As a corridor evolves, sites that do not redevelop may transition from one use to another, such as a service station becoming a restaurant or a large retail space being divided into several storefronts. To improve mobility along an activity corridor, new and redevelopment should reduce per capita car use and increase walking, bicycling, and transit use. Intensity of land use should correspond to the availability of quality transit, public space, and walkable destinations. Site design should use building arrangement and open space to reduce walking distance to transit and destinations, achieve safety and comfort, and draw people outdoors.

BACKGROUND: The application was filed on July 26, 2021 which is in-cycle for neighborhood planning areas located on the east side of I.H.-35.

The applicant proposes to change the land use on the future land use map from Commercial to Mixed Use land use.

The applicant proposes to change the zoning from CS-NP (General Commercial Services district – Neighborhood Plan) to CS-MU-NP (General Commercial Services district-Mixed Use Combining district-Neighborhood Plan). For more information on the proposed zoning, see case report C14-2021-0128.

PUBLIC MEETINGS: The ordinance-required virtual community meeting was held on August 30, 2021 and can be found at <https://www.speakupaustin.org/npa>. Approximately 1,500 meeting notices were mailed to people who have a utility account or own property within 500 feet of the property, in addition to neighborhood and environmental groups who requested notification for the area on the Community Registry.

Two staff members, Maureen Meredith and Mark Walters, attended the meeting and two people from the neighborhood. The applicant's agent did not attend the meeting because he thought the start time was 7:30 p.m. instead of the actual start time of 6:00 p.m. One attendee asked questions about the process which staff provided information. Staff received Rodney Bennett's presentation and uploaded it to <https://www.speakupaustin.org/npa>.

RE: Amendment to the Rezoning and Plan Amendment Applications for Case Numbers NPA-2021-0005.01 and C14-2021-0128 (the "Cases") for Property Located at 2404 Thrasher Lane (the "Property")

Dear Maureen and Kate:

I am writing on behalf of our clients, Marina and Gino Shvetz (Alpha Builders Group), the applicants in the above-referenced Cases. By this letter, we respectfully amend the applications as follows to:

- a. Rezone the Property from CS-NP to CS-MU-NP; and
- b. Amend the Future Land Use Map the ("FLUM") designation of the Property from "Commercial" to "Mixed Use".

Thank you for your assistance and consideration.

Sincerely,

Micah J. King

Neighborhood Plan Amendment

SUMMARY LETTER

TO MODIFY THE FLUM TO SHOW RESIDENTIAL LAND USE

**Letter of Recommendation from the Neighborhood
Plan Contact Team (NPCT)**

To: Kate Clare, Housing & Planning Department

From: Susana Almanza, President-Montopolis Neighborhood Plan Contact Team

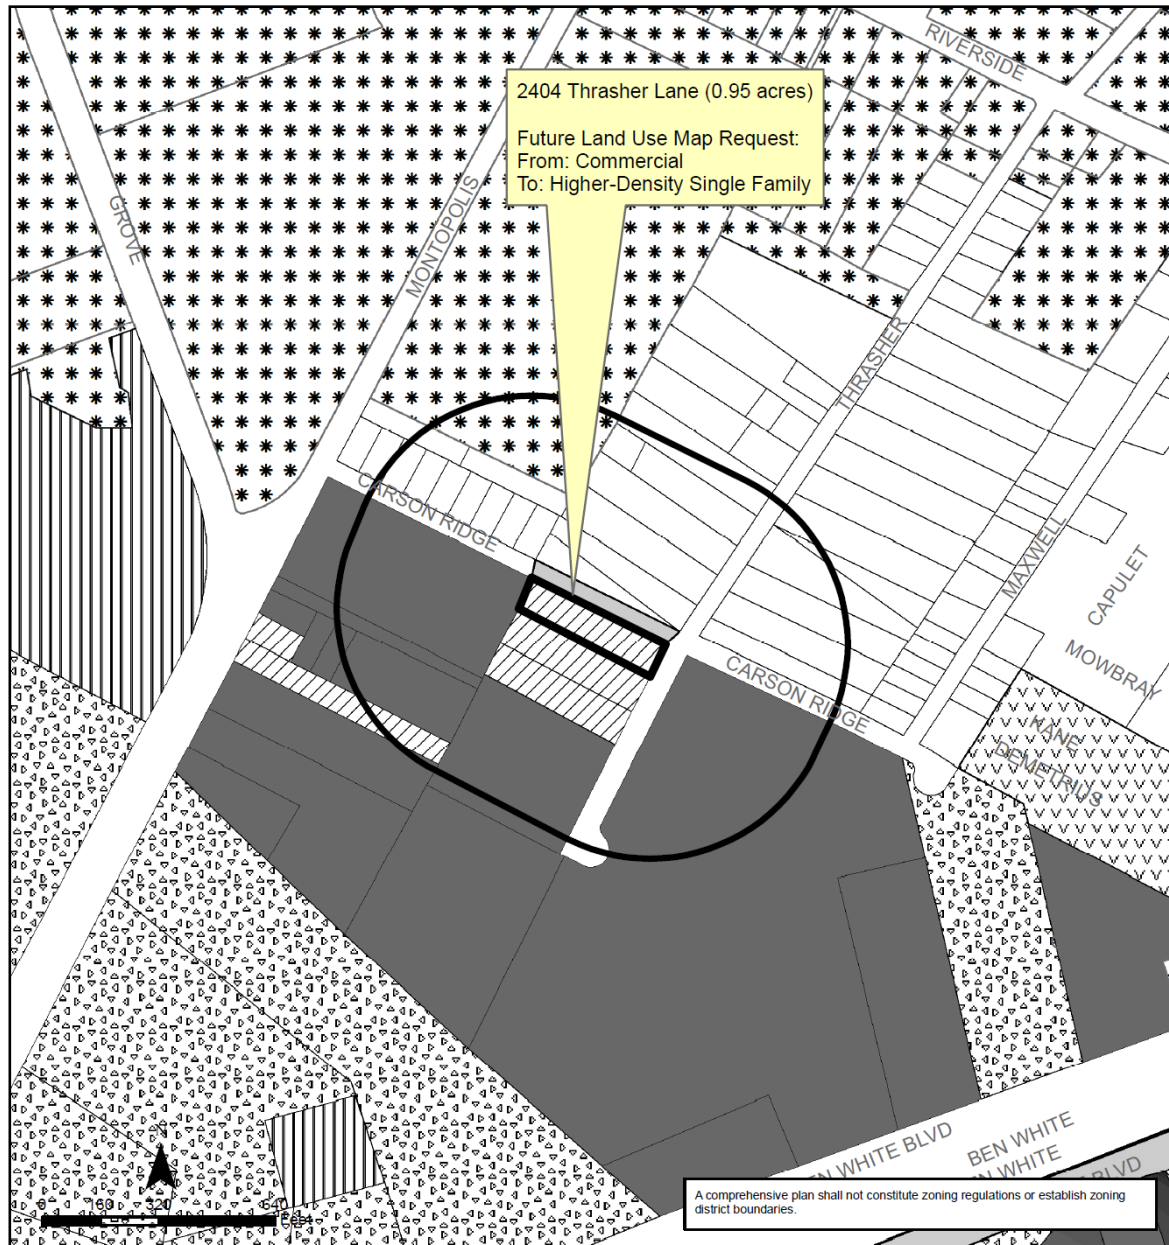

Date: November 2, 2021

Subject: Opposition Zoning & Plan Amendment of 2404 Thrasher Lane, Case #C14-2021-0128 & NPA-2021-0128

The Montopolis Neighborhood Plan Contact Team met on September 27, 2021. The Montopolis Neighborhood Plan Contact Team opposes the re-zoning and Neighborhood Plan Amendment (NPA) for the property located at 2404 Thrasher Lane. This development will bring more gentrification to a poverty area with most people of color. The Montopolis neighborhood plan area falls within the area that Project Connect Anti-Displacement area calls for protection. The University of Texas Uprooted Report (2018) also calls for the protection of the Montopolis community.

We request that the Planning Commission and the Austin City Council deny the NPA and re-zoning for 2404 Thrasher Lane.

RE: 2104 Thrasher LN.

To whom it may concern,

Hello, my name is Rodney Bennett, I am the agent of the local property owner for the vacant .96-acre lot located at 2104 Thrasher Lane. Mr. Gino Shvetz (owner) and I are requesting the tract have it's zoning changed from CSNP (one of the highest commercial zonings) to SF6NP. The change would allow for the construction of TEN townhomes. Along with this request is a mandatory request to change the FLUM (Future Land Use MAP) to match the requested land use of single family.

Please see the included drawings. They are an example of what the owner wishes to build at this location.

If you have any questions, please do not hesitate to contact me via email at:
Jb.rbconsulting@yahoo.com

Respectfully,

Rodney K. Bennett
Bennett Consulting

ZONING PETITION — 2404 Thrasher LaneDate: 11/8/21Case Number: NPA-2017-0005.03Address of Rezoning Case: 2404 Thrasher Lane

To: Austin City Council

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any classification other than SF-3.

REASON FOR PROTEST

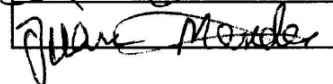

We, the undersigned owners of property located within 200 feet of the property that is the subject of this zoning case oppose the requested zoning change because:

This area of Montopolis consists of single family homesteads. The existing commercial zoning of this lot (and adjacent lots) was enacted despite the fact that there were families living there at the time (for decades), another shameful example of land use racism by the City of Austin.

We believe the 15-20 cottage units being proposed for the site by the Montopolis CDC on a 100% affordable non-profit basis is a better proposal. We also consider it important that the board and staff of the Montopolis CDC consists of 100% People of Color residing in the Montopolis community.

In addition, the CDC's proposed cottages would be more in keeping with our neighborhood character and history than the current owner's townhomes concept geared toward Oracle or Tesla employees. Lastly, the current property owner refuses to negotiate in good faith and was very disrespectful and insulting at our one meeting, even accusing us of "discrimination" against *them* for suggesting that the community *itself* could build something better. This is not an effective way to approach a low income community of color that has been victimized by discrimination for much of its history.

The families displaced from the Thrasher Lane mobile home park, among others, should be given an opportunity to return to the community, and the Montopolis CDC should be given the opportunity to secure funding to realize its proposal. A proper commitment to equity and justice demands nothing less.

COMMUNITY DEVELOPMENT CORPORATION

THE THRASHER HILL COMMUNITY VILLAGE

COMMUNITY-LED AFFORDABLE PLACEMAKING WITH
HISTORICAL CONSCIOUSNESS AND CULTURAL
INTEGRITY

WWW.MONTOPOLIS.ORG

SEPTEMBER, 2019

The Montopolis CDC proposes to construct twelve one and two-bedroom homes on a one acre property located at 2404 Thrasher Lane in Austin's historic Montopolis neighborhood. All of the homes will be constructed beyond S.M.A.R.T. housing requirements to at least an Austin Energy Greenbuilding *Four Star* standard, with one structure built to comply with the *Passivhaus* standard, the first such home in Austin built to this rigorous energy efficiency and interior air quality standard. Four of the homes will be built for senior and/or disabled citizens and will include wheelchair ramps and other ADA accommodations for the mobility impaired. The Montopolis CDC is requesting \$1.8 million dollars in land acquisition and pre-development funding for this initiative.

The architecture for the homes will be based upon the designs of famed "Katrina Cottage" architect Marianne Cusato (<http://www.marianneacusato.com>) which also serve as the basis for similar cottage villages constructed by the Cypress CDC (www.cypresscdc.com) in Louisiana, Florida and elsewhere. In addition to being simple to construct, Ms. Cusato's designs are also designed to be of high quality and flexible. For instance the one-bedroom shotgun homes can easily be upgraded to two-bedrooms by their owners.

Montopolis is a flood-prone neighborhood with significant challenges posed by intensifying development; prudence dictates that attention be paid to construction standard of the highest possible quality that go well beyond minimum code or S.M.A.R.T. housing standards. Ms. Cusato's designs are highly regarded for the role they have played in disaster recovery along the Gulf Coast, and their traditional yet high-design standards are compatible with the vernacular and formal architecture of the historic Montopolis Community (McGhee 2014: 72).

A prototype/pilot already exists. Constructed in 2010 and located in Montopolis, the Katrina Cottage below was built to the Austin Energy Greenbuilding *Four Star* standard and is located adjacent to the subject property at 2316 Thrasher Lane. A tour of the structure and its environs can be arranged upon request.

Site Location

The property is located in the southern portion of the Montopolis neighborhood planning area, a traditionally rural location that marked a borderland area between Montopolis and Del Valle. It is located adjacent to a historically significant property that was until recently owned by Felix and Amanda Benavides, who settled the area in the early 1950's and were important community leaders in the late 1960's and early 1970's (McGhee 2014: 77).

Over the past five years the area has been heavily impacted by development. Existing ecosystems have been destroyed; there have been dramatic flora and fauna losses, and substantial increases in impervious cover, among other impacts. Additionally, the site is located a few lots from the Thrasher Lane mobile home park, which resulted in the displacement of over a dozen families. It is the hope of the Montopolis CDC that the proposed project will be constructed at a price point that can facilitate the return of these displaced families back to their neighborhood, should they so choose.

Market Dynamics

Mainly due to increases in real estate speculation and the construction of short term rentals, tax records show that property values in Montopolis show dramatic increases. For instance the Travis County Appraisal District valuation of the New Jerusalem Baptist Church, located near the intersection of Riverside Drive and Thrasher Lane increased from \$136,034 in 2013 to \$1,109,909 in 2018, an increase of over 800% in five years. The dilapidated church was cited

by the city's code enforcement department for numerous health violations in 2016 and was subsequently demolished in 2018.

The J.P. Morgan Chase funded Urban Land Institute study of Montopolis reports similar findings. The Community Village will create more opportunities for increases in homeowner value/equity and a greater opportunity to reduce income/wealth inequality in an area of Montopolis predominantly occupied by single family homesteaders. It will also enhance community stability.

The University of Texas study "Uprooted" also contains a chapter analyzing Montopolis and defines it as a community with a high susceptibility to gentrification. Because the Urban Land Institute and University of Texas studies, among others, are well known, and in order to conserve resources and reading time, they will not be reproduced here.

People

Montopolis was founded in 1830 and nearly became the capital of the Republic of Texas. It is perhaps the most historic part of our state that nobody knows about. In the 1960's it was dubbed "Poverty Island" by Rev. Fred Underwood, a crusading priest from the Dolores Parish who pioneered the provision of education, transportation, healthcare, housing and social services during the War on Poverty era. According to the most recent census statistics available, Montopolis remains a predominantly Hispanic community (78% of the population) with a significant African-American history as the site of the Burditt's Prairie Freedmen's Community as well. The per capita income is \$16,226, and the Median Family Income is \$31,875, about half the amount in Austin and Travis County. The poverty rate is 33%.

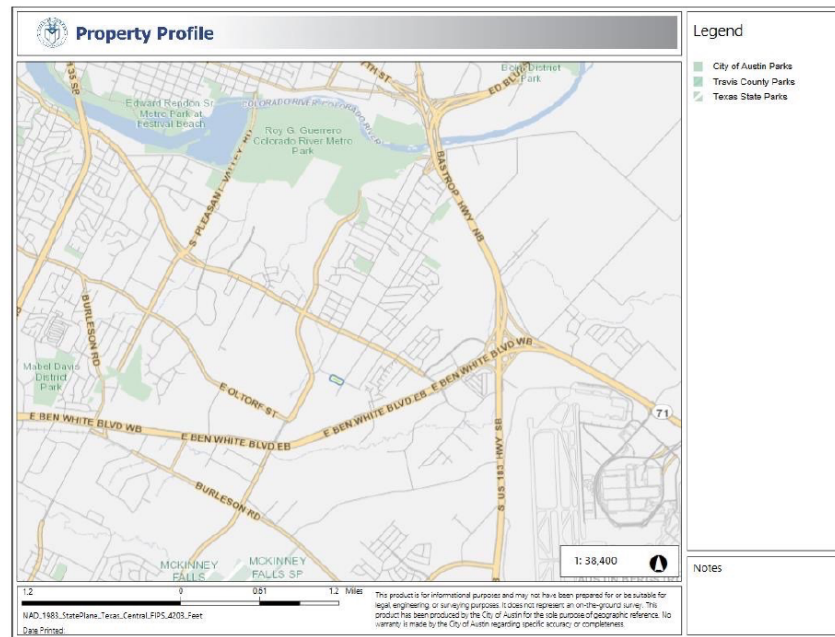

The Montopolis CDC is the successor to the organization of the same name that was founded in 1988 to advance the community development interests of the neighborhood. It is also a successor to Montopolis Community Center, Inc. which was founded in 1965 by Father Underwood as one of the first Community Action Agencies in Austin during the War on Poverty. The leadership of the Montopolis CDC, including its board and officers, is 100% comprised of People of Color residing in the Montopolis community. It is the only organization applying for City of Austin funding assistance where this is the case.

The president of the Montopolis CDC is Fred L. McGhee, an archaeologist, author, educator, general contractor and Navy veteran. Dr. McGhee built one of the first AEGB *Five Star* certified homes in Austin and is an extensively credentialed greenbuilder and sustainability expert with over 25 years of experience in the military, non-profits, and in the private sector. In addition to formal credentials by the U.S. Greenbuilding Council (www.usgbc.org), the Building Performance Institute (www.bpi.org), The American Rainwater Catchment Systems Association (www.arcsa.org) and other organizations, Dr. McGhee is also a founding board-member of Austin's Passive House Alliance chapter and is well known domestically and abroad for his advocacy on behalf of the implementation of the standard at historically significant public housing sites. Dr. McGhee has an extensive record of public service in Austin, and is a former member of the city's Board of Adjustment, Community Development Commission, and the 2012 Charter Revision Committee that produced a districts-based city council. He also has an extensive non-profit background, and serves as president of Preserve Rosewood (www.preserverosewood.org) and Vice President of the Burditt Prairie Preservation Association (www.burdittprairie.org). He is also a U.S. Soccer Federation licensed youth soccer coach and is coach of the Montopolis Mantas youth soccer team.

The Vice President of the Montopolis CDC is Susana Almanza, an internationally known environmental justice advocate and founding member and Director of PODER (People

Organized in Defense of Earth and her Resources), a grassroots environmental, economic and social justice organization. An Austin native, Ms. Almanza has spent her life organizing for the advancement of the underprivileged in the neighborhoods of East Austin and beyond. Ms. Almanza has served on the City of Austin's Parks and Recreation Board, the City's Planning Commission, Environmental Board and the Community Development Commission, and is a former two-time candidate for the Austin City Council.

The Secretary of the Montopolis CDC is Noé Elias, a neighbor to the Steen family whose homestead is also located on Kemp Street. A native of Montopolis, Mr. Elias is a public

school teacher with Austin ISD and was a leading member of the grassroots volunteer coalition that preserved the Montopolis Negro School.

The Treasurer of the Montopolis CDC is Lisa Goddard, an award-winning digital marketing and intranet expert. In addition to being a founding member of HotJobs.com, Goddard has extensive non-profit experience in Austin, including at the Capital Area Food Bank of Texas, the Seton Healthcare Network, the Sustainable Food Center, and at University Federal Credit Union, among others.

Worker Empowerment and Local Preference

Montopolis and Del Valle are home to many members of the Central Texas region's construction workforce. The Montopolis CDC considers it an integral aspect of its community development efforts to facilitate the ability of these hardworking individuals to be able to construct high quality affordable housing near to where they live and at a

prevailing wage. Furthermore, in greenbuilding its product to the highest standards, the Montopolis CDC also furnishes meaningful job skills training that will be in increasing demand as the real estate industry inevitably embraces Passive House inspired carbon reduction methods. Moreover, as a community *based* grassroots organization, it is the policy of the Montopolis CDC to offer client as well employment preference to people living in the organization's service area.

On-Site Agriculture, Environmental Stewardship, and Rainwater Catchment

According to the USDA's Food Access Research Atlas and Sarah Stein-Lobovits' 2015 urban GIS analysis of food insecurity in Austin, Montopolis and Del Valle have been food deserts for many years. The Montopolis CDC envisions the drafting of a future site plan for the community village that will embrace many of the tenets of Frank Lloyd Wright's *organic architecture*, including the on-site growing of fruits and vegetables, small-scale animal husbandry, multi-generational "back to nature" programs led by seniors and others living at the village, and similar initiatives.

Financial Capacity Statement

The principals of the Montopolis CDC are Austin public figures of long standing, with decades of service to the community. In his capacity as President of the city's only African-American and disabled veteran owned and operated archaeological and environmental consulting firm, Dr. McGhee has also served as a consultant or sub-

consultant on numerous City of Austin projects. In the past his firm has been certified as an MBE/DBE by the city's Small and Minority Business Resources department, and has also been certified as a HUB by the State of Texas, a HUBZone business by the Small Business Administration, and as a Service Connected Disabled Veteran business by the U.S. Department of Veterans Affairs.

As a rebooted organization after a long period of dormancy, the Montopolis CDC is energetically soliciting private and foundation funding for the Community Village initiative, which a commitment by the City of Austin would help to facilitate. As a new organization, founded in January 2019, no certified audit is as yet available.
