Representative of future infill development, these massing models illustrate options for new residences along Avenue H. Our design focused on craftsman style architecture with an emphasis on the scale of the homes as well as the streetscape, which are important features to Hyde Park residents.

CRAFTSMAN ARCHITECTURAL DIAGRAM

GABLE

Classic gable roof with decorative braces and exposed roof rafter tails underneath

OVERHANG AT EAVES

Deep overhangs that cover the front porch and help to keep water off of the walls and away from the house

COLUMNS

Tapered and typically square, half-height columns that rest on pedestal bases; heavily detailed and ornate

BASE

Holds up column and is an opportunity to show off use of natural materials such as stucco, stone or brick

STEPS

Dependent on the height of the front porch; usually only a few stairs leading to entrance
