Council Committee, Boards and Commission Action

August 10, 2022 - To be reviewed by the Water & Wastewater Commission

Additional Backup Information

Austin Water (AW) is currently rolling out a citywide smart water meter program called [My ATX Water](#). This program is modernizing AW's water metering system by replacing more than 250,000 analog water meters with digitally read water meters connected to a wireless network by 2025.

Of the nearly 250,000 analog water meters scheduled for replacement, approximately 450 large-diameter meters are incompatible and need replacement to complete the My ATX Water project deployment. This contract will ensure the large-diameter meters meet the same installation timeframe by exchanging up to 40 meters per month.

Large-diameter meter replacements often require heavy equipment, right-of-way and street closure permits, confined space entry requirements, and extensive commercial property coordination, requiring a dedicated resource.

Strategic Outcome(s)

Health and Environment
