

ZONING CHANGE REVIEW SHEET

CASE: C814-92-0006.02 – Seton Medical Center
Planned Unit Development Amendment No. 2

DISTRICT: 10

ZONING FROM / TO: PUD-NP to PUD-NP, to change conditions of zoning

ADDRESS: 1201 West 38th Street

SITE AREA: 12.21 acres

PROPERTY OWNER: Seton Medical Center, % Altus Group US Inc. (Scott Herndon)

AGENT: Metcalfe Wolff Stuart & Williams, LLP (Michele Rogerson Lynch)

CASE MANAGER: Wendy Rhoades (512-974-7719, wendy.rhoades@austintexas.gov)

STAFF RECOMMENDATION:

The Staff recommendation is to grant an amendment to planned unit development – neighborhood plan (PUD-NP) combining district zoning as shown in the Proposed Zoning Submittal (Attachment A). *For a summary of the basis of Staff's recommendation, see pages 2 and 3.*

ENVIRONMENTAL COMMISSION ACTION:

August 17, 2022: APPROVED AN AMENDMENT TO PUD-NP DISTRICT ZONING AS THE STAFF RECOMMENDED

**[J. BRISTOL; M. SCHIERA – 2ND] (7-4) A. BARRETT BIXLER, R. BRIMER,
R. SCOTT, P. THOMPSON – NAY**

PLANNING COMMISSION ACTION:

September 27, 2022: APPROVED AN AMENDMENT TO PUD-NP DISTRICT ZONING AS THE STAFF RECOMMENDED, WITH THE CONDITION THAT PEDESTRIAN, BICYCLE, AND SCHOOL TRAFFIC SAFETY IMPROVEMENTS BE EVALUATED BY THE APPLICANT AND, IF DEEMED APPROPRIATE AND APPROVED BY ATD, INSTALLED BY THE APPLICANT ON 34TH STREET AND IMMEDIATELY ADJACENT AREAS WITHIN THE TIA STUDY AREA, BY CONSENT
**[C. HEMPEL; G. COX – 2ND] (9-0) J. MUSHTALER, R. SCHNEIDER;
J. THOMPSON – ABSENT; ONE VACANCY ON THE DAIS**

August 23, 2022: APPROVED A POSTPONEMENT REQUEST BY THE NEIGHBORHOOD TO SEPTEMBER 27, 2022

[J. THOMPSON; R. SCHNEIDER – 2ND] (9-0) S. PRAXIS – ABSENT

CITY COUNCIL ACTION:

October 27, 2022:

September 15, 2022: *APPROVED A POSTPONEMENT REQUEST BY STAFF TO OCTOBER 27, 2022. VOTE: 10-0, MAYOR PRO TEM ALTER WAS OFF THE DAIS.*

ORDINANCE NUMBER:

ISSUES:

The Applicant is in agreement with the recommendation of the Planning Commission.

The West 31st Street Creekside Neighborhood Association and the Bryker Woods Neighborhood Association requested postponement until the September 27th Planning Commission meeting. The Applicant did not object to the postponement request by the Neighborhoods.

The Applicant has met with the Rosedale Neighborhood Association and President of Brykerwoods Neighborhood Association, and met with the Brykerwoods Neighborhood board on August 16, 2022.

EXHIBITS AND ATTACHMENTS TO THE STAFF REPORT:

Exhibits A and A-1: Zoning Map and Aerial

Attachment A: Applicant's Summary Letter

Correspondence Received

Attachment A-1: Proposed Zoning Submittal

Attachment B: Environmental Commission action and support material

Attachment C: TIA Compliance document

CASE MANAGER COMMENTS:

The Seton Medical Center PUD is bounded by West 38th Street on the north, Medical Parkway to the east, West 34th Street to the south, and medical offices that border the property to the west (GO-V-NP). There are retail and service-oriented commercial uses on the north side of West 38th (SF-3; LO; CS-1-V; LR-V; CS-V; GR-V); medical offices and supporting businesses on the east side of Medical Parkway, the south side of East 34th Street and adjacent to the west (CS-NP; CS-V-NP; GO-CO-NP; GO-NP; GO-V-NP; GR-NP. The PUD is designated as Civic land use on the Central West Austin Combined (Windsor Road) Neighborhood Plan approved by Council in September 2010. ***Please refer to Exhibits A (Zoning Map) and A-1 (Aerial View).***

The PUD was approved by Council in June 1993 and prescribed development intensity according to a Land Use Plan. The PUD also included the following components: 1) limited floor-to-area ratio to 1.48 : 1; 2) prescribed minimum front yard setbacks of 25 feet except

for a minimum street side setback of 10 feet along West 34th Street; 3) required a minimum of 11.9% open space; 4) limited height to 120 feet above ground level within 300-540 feet of SF-5 or more restrictive zoned property; 5) required six off-street loading spaces for a hospital (general) use; 6) waived additional right-of-way dedication on Medical Parkway and West 34th Street; 7) waived sidewalk installation along West 34th Street; and 8) waived the requirement for driveways to align with opposing driveways or have minimum offsets for the West 38th Street driveway, Service Yard drive, and the West 34th Street drive (C814-92-0006). The first amendment to the PUD was approved administratively in December 2002 and resulted in updating the existing PUD drawings to show the full build-out of the PUD and the landscape concept plan.

The purpose of the second amendment to the PUD is to facilitate the addition of a 358,155 square foot addition of a cardiovascular wing along the West 38th Street frontage and a Women's and Children's Tower along the West 34th Street frontage. The existing parking garage on the subject property is proposed to be demolished and then rebuilt on the adjacent property to the west which is under the same ownership. Specifically, the proposed PUD amendment consists of the following components:

- Increase the floor-to-area ratio from 1.48 : 1 to 1.9 to : 1
- Increase the building coverage from 272,388 square feet (51.2%) to 334,830 square feet (62.95%)
- Increase the building square footage from 786,600 square feet to 1,144,755 square feet (resulting from the 358,155 square foot expansion)
- Increase the impervious cover from 79.16 percent to 79.62 percent
- Add water quality controls where none currently exist

Following input from the City arborist, the tree relocation component of the PUD is being reviewed under an administrative site plan on the adjacent property to the west. The site plan proposes relocation of the existing garage on the main hospital / east campus and also an underground parking garage along West 38th Street (SP-2022-0059C – Ascension Seton Medical Center - 34th Street and 38th Street Garages). ***Please refer to Applicant's Summary Letter and Proposed Zoning Submittal (Attachment A).***

Below is a description of the **proposed superiority items** associated with the PUD amendment through PUD notes:

- New buildings will achieve a LEED silver rating
- Redevelopment will exceed minimum landscaping requirements
- All trees will be sourced from Central Texas native seed stock
- New buildings will enhance City of Austin Dark Sky regulations
- Building design will reduce bird / building collisions by utilizing glass with a reflectivity of 15 percent or less
- An Integrated Pest Management (IPM) Plan will be provided at the time of site plan application
- The Project will provide onsite water reuse system that will collect condensate and rainwater collection to offset cooling tower potable water demand and irrigation

BASIS OF STAFF RECOMMENDATION:

1. *The proposed zoning should be consistent with the purpose statement of the district sought.*

Per the Land Development Code, PUD district zoning was established to implement goals of preserving the natural environment, encouraging high quality, sustainable development and innovative design, and ensuring adequate public facilities and services. The City Council intends PUD district zoning to produce development that achieves these goals to a greater degree than and thus is superior to development which could occur under conventional zoning and subdivision regulations. The PUD provides a canvas for the design of a large scale project, with the end goal to allow flexibility, and also inform and communicate the possibilities for development. Additional effort is required by all parties to ensure that development standards are clear and municipal and citizen needs are addressed. The PUD ordinance and related exhibits are key because once approved, they provide the regulations under which the project will be built, which provides certainty for developers and their agents. The neighborhood plan (NP) district denotes a tract located within the boundaries of an adopted Neighborhood Plan.

2. *Zoning should promote the policy of locating retail and more intensive zoning near the intersections of arterial roadways or at the intersections of arterials and major collectors.*

Staff recommends the Applicant's request because the PUD is bounded by existing arterial and collector roadways on three sides and is an integral part of an area that is distinguished by a wide range of hospital services, medical offices, and supporting services. The proposed PUD amendment will increase the square footage of the facility and modernize it so that hospital and medical services continue to be provided to the Austin area at a regional scale.

EXISTING ZONING AND LAND USES:

	ZONING	LAND USES
<i>Site</i>	PUD-NP	Hospital services (general) and parking garage
<i>North</i>	SF-3; LO; CS-1-V; LR-V; CS-V; GR-V	Restaurant (limited); Retail (convenience); Medical office; Personal improvement services; Financial services; Personal services with surface parking; Single family residences – detached and attached
<i>South</i>	CS-NP; GO-CO-NP; GO-NP; GO-V-NP	Medical offices with surface parking; Retail sales (convenience)
<i>East</i>	CS-NP; CS-V-NP	Medical offices with surface and structured parking; Restaurant (limited); Medical supplies
<i>West</i>	GO-V-NP; GR-NP	Medical offices with surface parking (under the same ownership as the subject site)

Re: **Seton Medical Center Planned Unit Development Amendment No. 2 Application**
12.21 acres located at 1201 West 38th Street (“Property”)

Dear Mr. Rusthoven,

As representatives of the owners of the above stated Property we respectfully submit this Planned Unit Development (PUD) Development Amendment application (“the 2nd Amendment”) for the Seton Medical Center PUD (C814-92-0006). The purpose of the 2nd Amendment is to allow for the addition of 358,155 square foot for an expansion of a Womens Tower and a cardiovascular wing. The proposed building addition is considered a substantial amendment described under LDC § 3.1.2 as site development regulations are being modified and is therefore subject to City Council approval. The following outlines the major components of the 2nd Amendment:

Floor to Area Ratio

The currently allowed FAR is 1.48:1 and the proposed FAR is 1.9:1.

Building Coverage

The currently allowed building coverage is 272,388 square feet (51.2%).
The proposed building square footage is 334,830 square feet (62.95%).

Building Square Footage

The currently allowed building square footage is 786,600 square feet.
The total proposed building square footage with the 358,155 square foot expansion is 1,144,755 square feet.

Impervious Cover

The currently allowed impervious cover is 421,074 square feet (79.16%).
The proposed impervious cover is 423,513 square feet (79.62%).

Open Space

The current percentage of open space is 11.9%.

The proposed percentage of open space is 4%.

Drainage/Detention/Water Quality

Two detention ponds exist on the Property today. The pond along Medical Parkway will be reconfigured in roughly the same location. There are no water quality controls on the Property today, however water quality in the form of an underground vault and rain gardens is proposed.

Trees

The Property has many Protected and Heritage Trees that will be preserved.

A 25" Pecan located along 38th Street is proposed for removal. This tree has been assessed by a certified arborist as being in poor health and condition. Three other trees (29" Pecan, 25" Live Oak, 24" Pecan) are proposed to be relocated onsite.

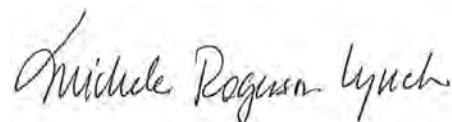

Transportation and Parking

A Traffic Impact Analysis (TIA) was approved with the PUD in 1992 and was updated with the 1st amendment in 2002. After talking with the Austin Transportation Department, updated traffic counts were conducted at certain intersections. A TIA Compliance Memorandum was prepared and is included with the submittal. The updated study indicates the expansion will not materially impact the operation of the intersections studied and therefore no improvements are proposed.

Part of the redevelopment includes the demolition of the existing parking garage. A new parking garage will be constructed off-site on the adjacent Medical Tower property to the west, which is under the same ownership. The new parking garage will serve both parking for the Property as well as the Medical Tower property. A site plan for the parking garage construction is currently in review at the City of Austin.

If you have any questions about the proposed 2nd Amendment or need additional information, please do not hesitate to contact me at your convenience.

Very truly yours,

Michele Rogerson Lynch

Re: **Seton Medical Center Planned Unit Development Amendment No. 2
Application - Updated**
12.21 acres located at 1201 West 38th Street ("Property")

Dear Mr. Rusthoven,

Upon further review of the proposed amendment and project, a modification to open space is no longer needed. Therefore, we are officially requesting to remove any modification to open space with this application.

If you have any questions about the proposed 2nd Amendment or need additional information, please do not hesitate to contact me at your convenience.

Very truly yours,

ENVIRONMENTAL COMMISSION MOTION 20220817-004

Date: August 17, 2022

Subject: Seton Medical Center Planned Unit Development Amendment No. 2, C814-92-0006.02

Motion by: Jennifer Bristol

Seconded by: Melinda Schiera

RATIONALE:

WHEREAS, the Environmental Commission recognizes the applicant is requesting an amendment to planned unit development – neighborhood plan (PUD-NP) combining district zoning as shown in the Proposed Zoning Submittal. The requested modifications will increase impervious cover from 421,074 square feet (79.16%) to 423,513 square feet (79.62%) and add water quality controls where none currently exist.

WHEREAS, the Environmental Commission recognizes that the Staff recommendation is to grant an amendment to the planned unit development – neighborhood plan (PUD-NP) combining district zoning as shown in the Proposed Zoning Submittal with conditions.

THEREFORE, the Environmental Commission recommends the PUD amendment with the following conditions:

Staff Conditions:

1. This project complies with the following Tier 1 superiority items:
 - a. Provide a LEED Silver Rating
 - b. Exceed the minimum landscaping requirements of the City Code as noted on the PUD exhibits
2. The project complies with the following Tier 2 superiority items:
 - a. Addition of water quality controls
 - b. Tree plantings use Central Texas native seed stock and are installed with adequate soil volume. As clarified in the meeting, this means container-sized trees will be planted.
 - c. Enhanced City of Austin Dark Sky regulations as noted on the PUD exhibit
 - d. Require building design that will reduce the potential for bird/building collisions as noted on the PUD exhibit
 - e. The project will provide an Integrated Pest Management System
3. The project commits to collect and beneficially use both rainwater and condensate for cooling water demand.

- The applicant is requesting a PUD Amendment for the purpose of modifying the site development regulations to construct a Women's Health Tower and cardiovascular wing.

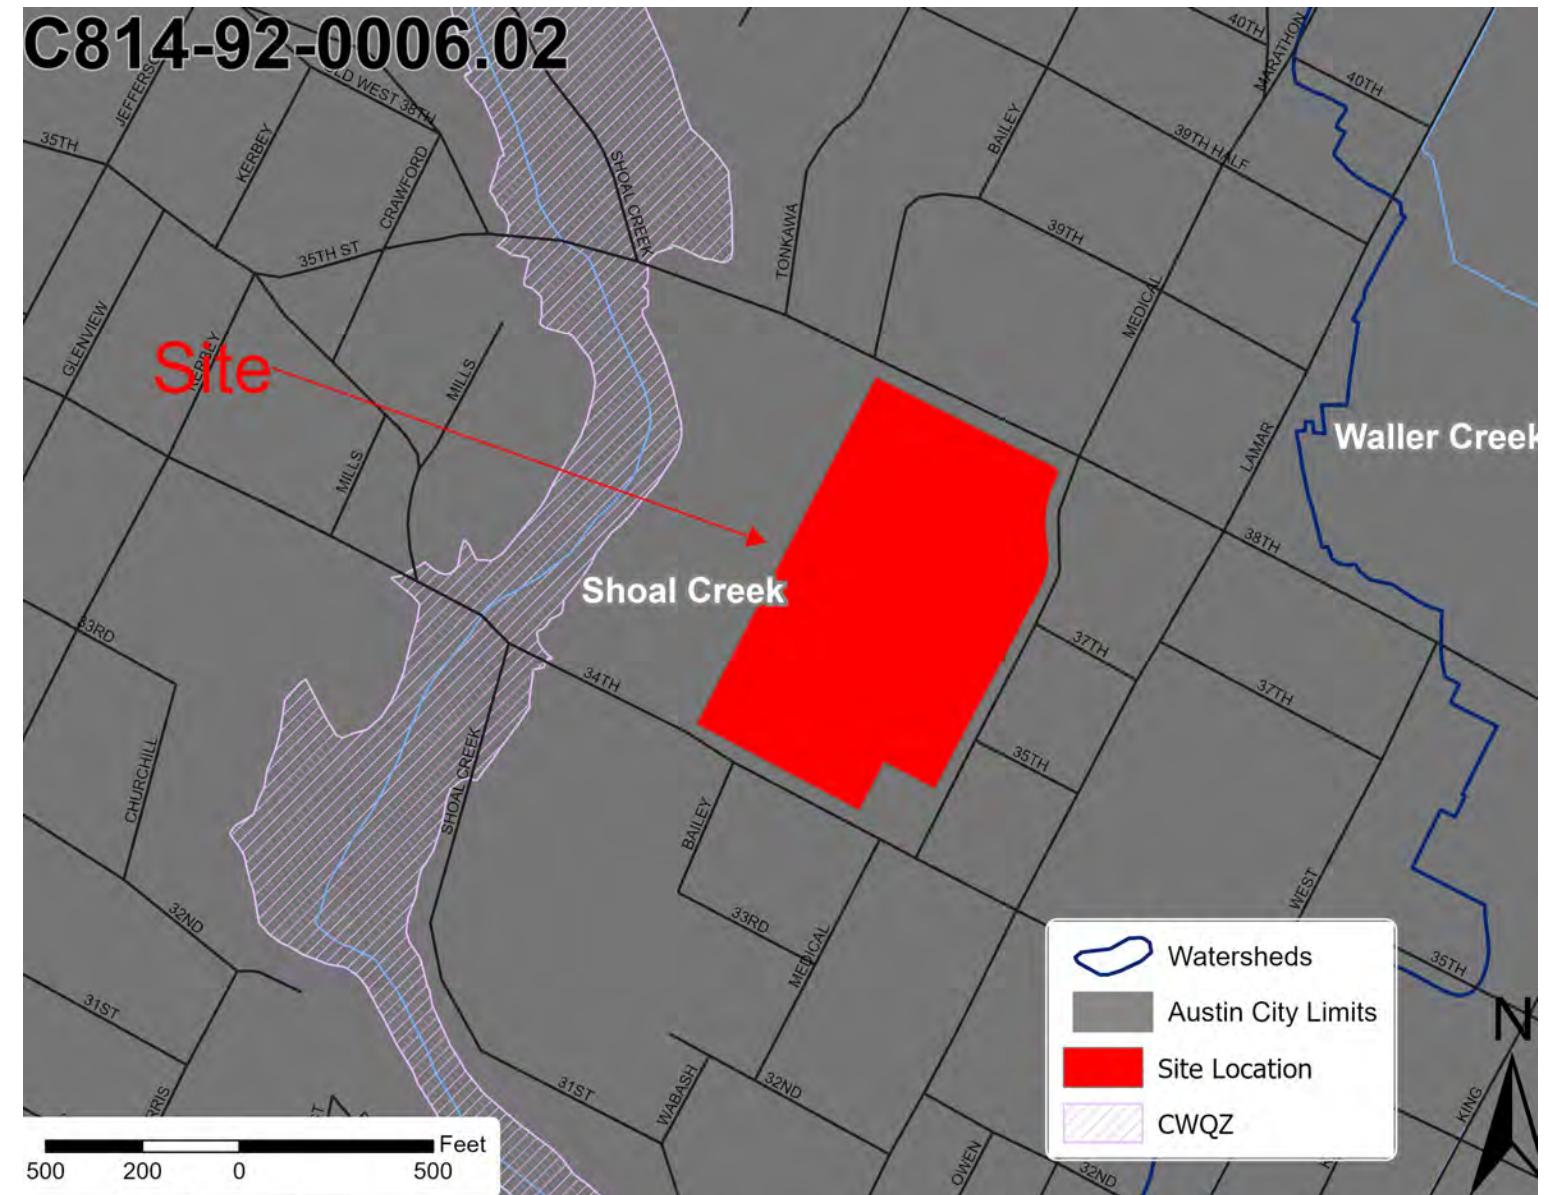

WATERSHED
PROTECTION

Site Conditions

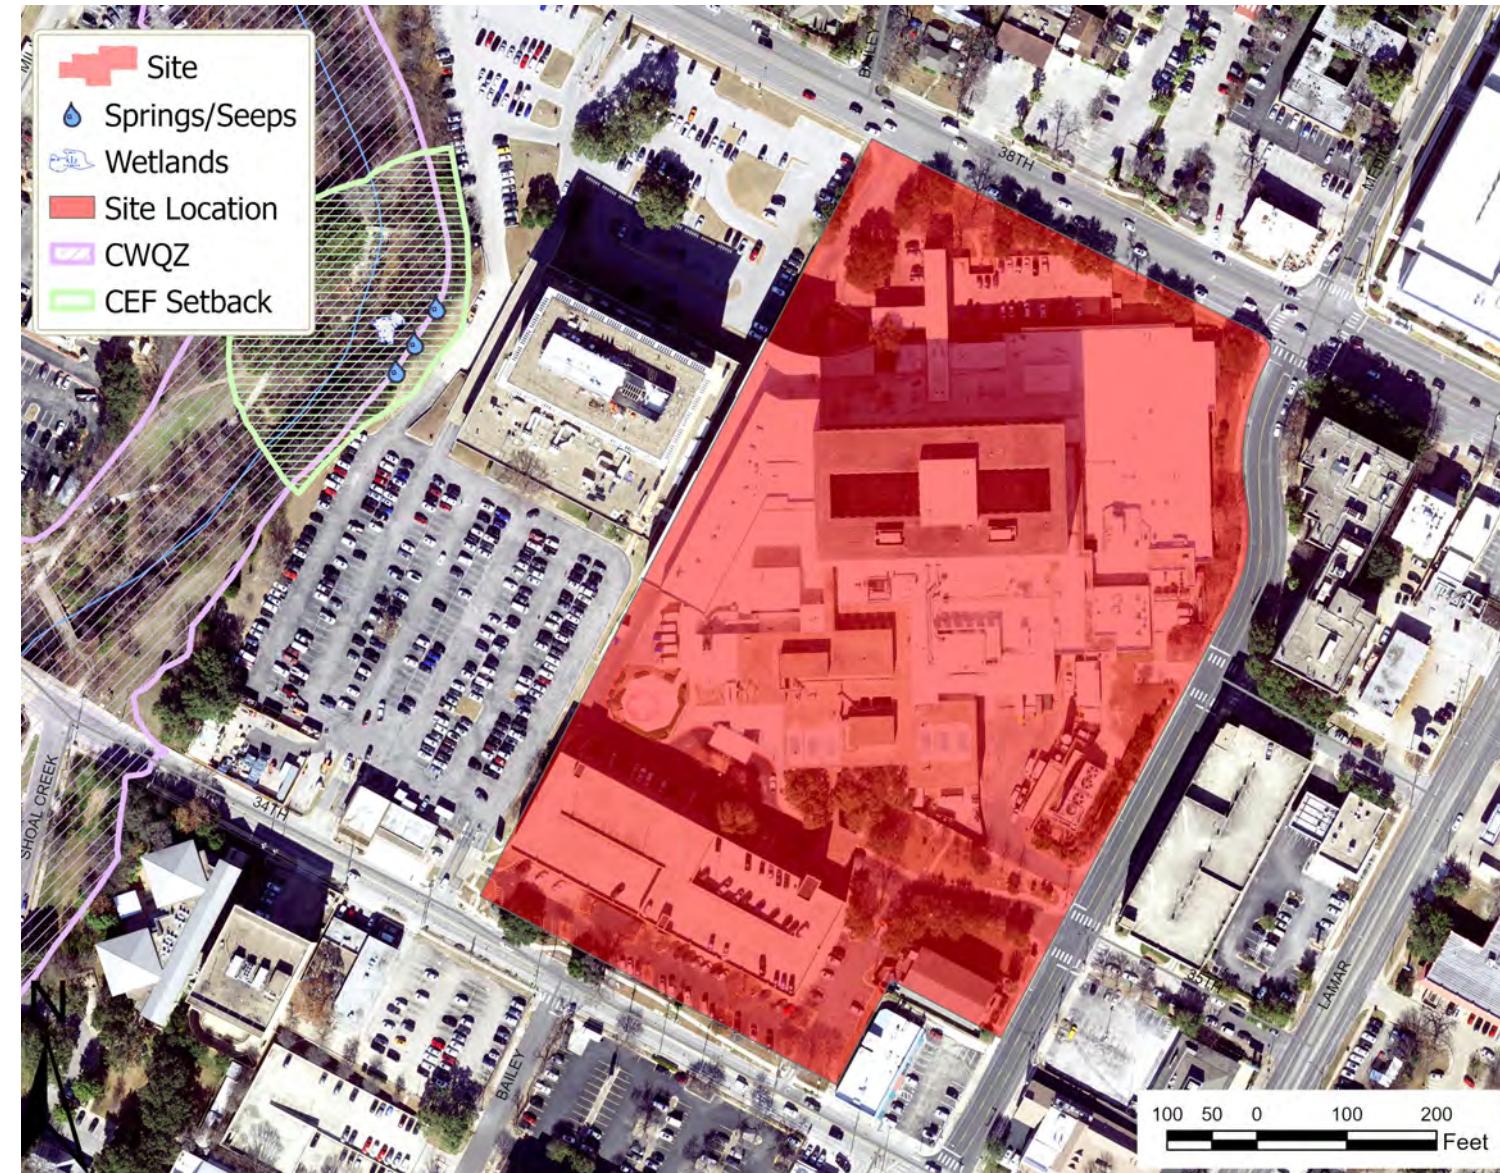

- 12.21 acres
- Located in Full Purpose Jurisdiction
- In the Shoal Creek Watershed
- Classified as Urban Watershed

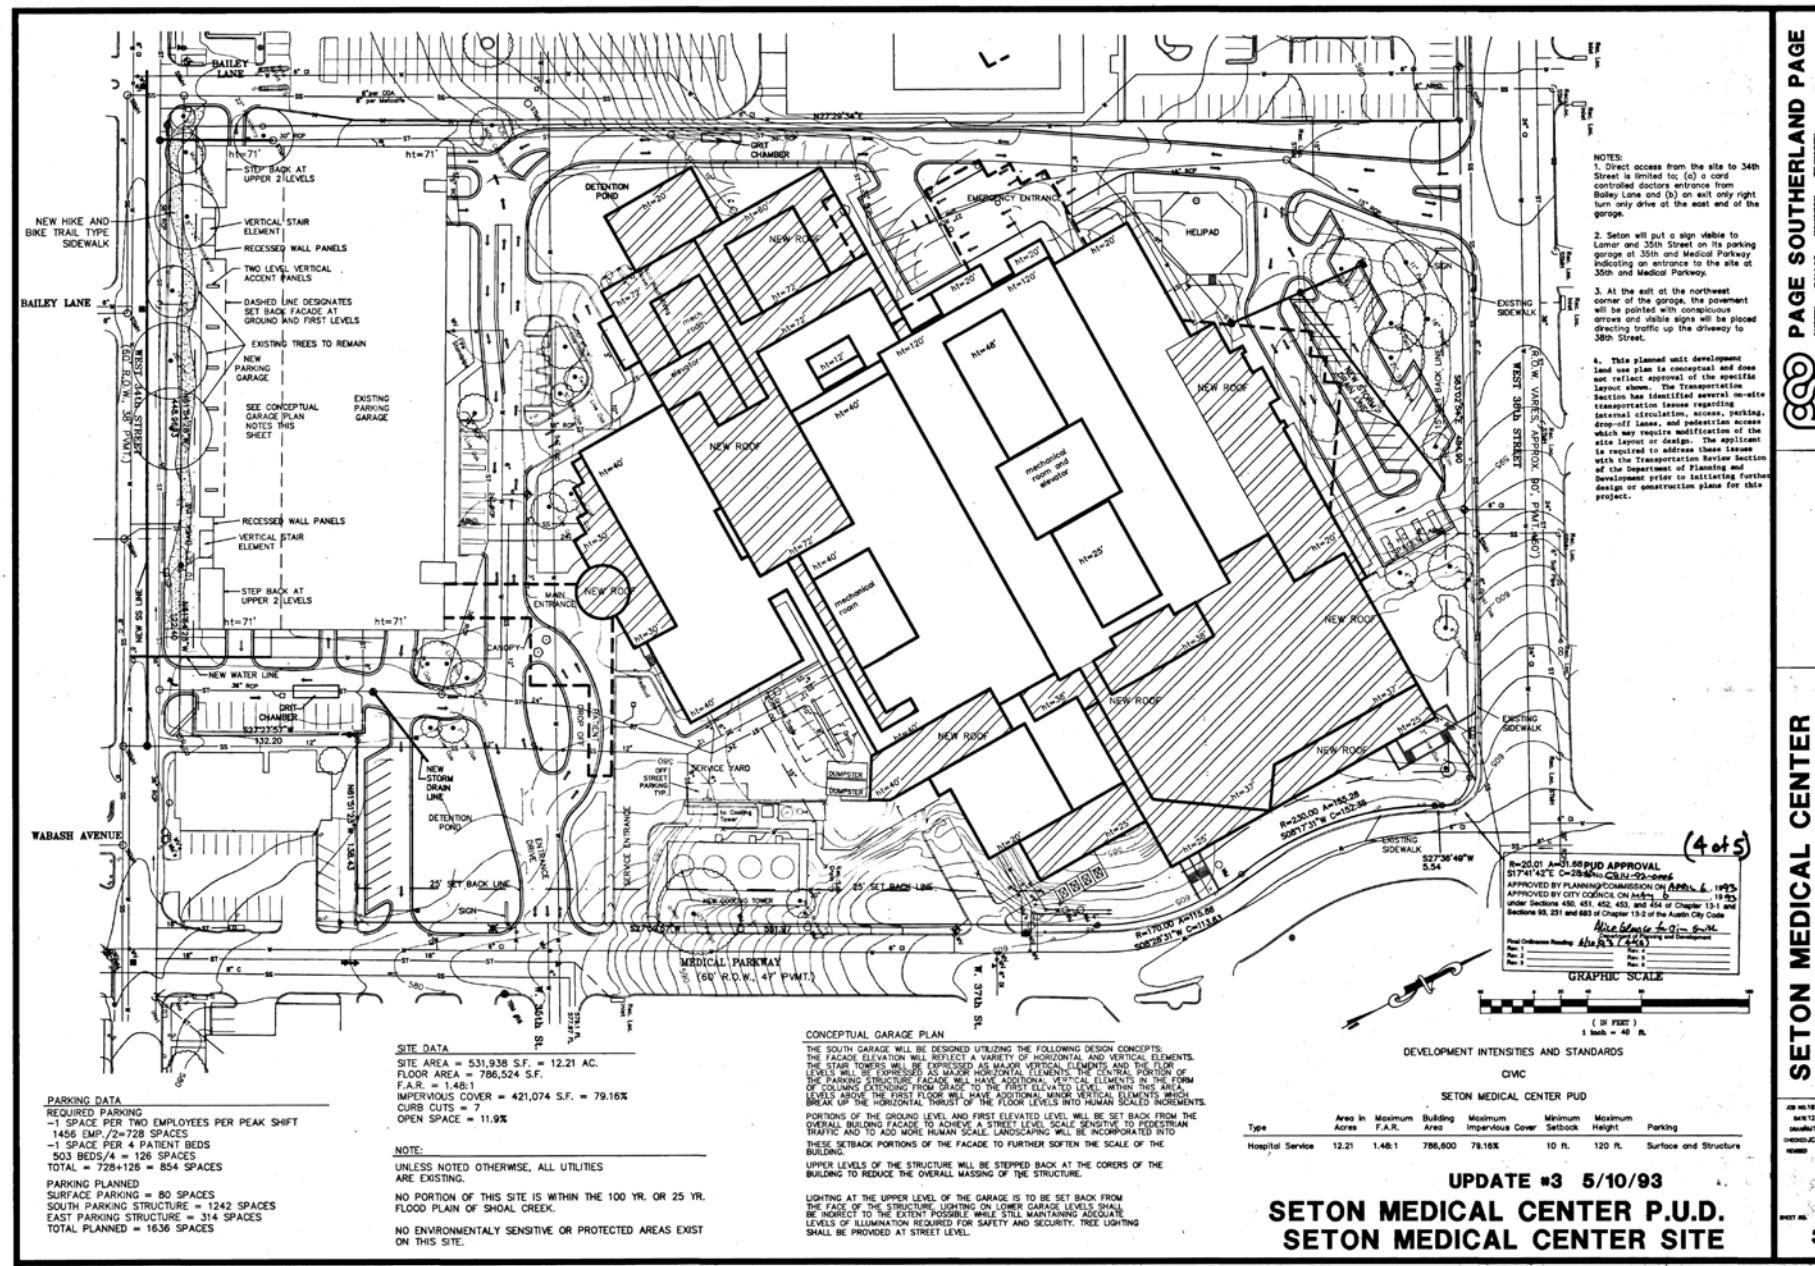

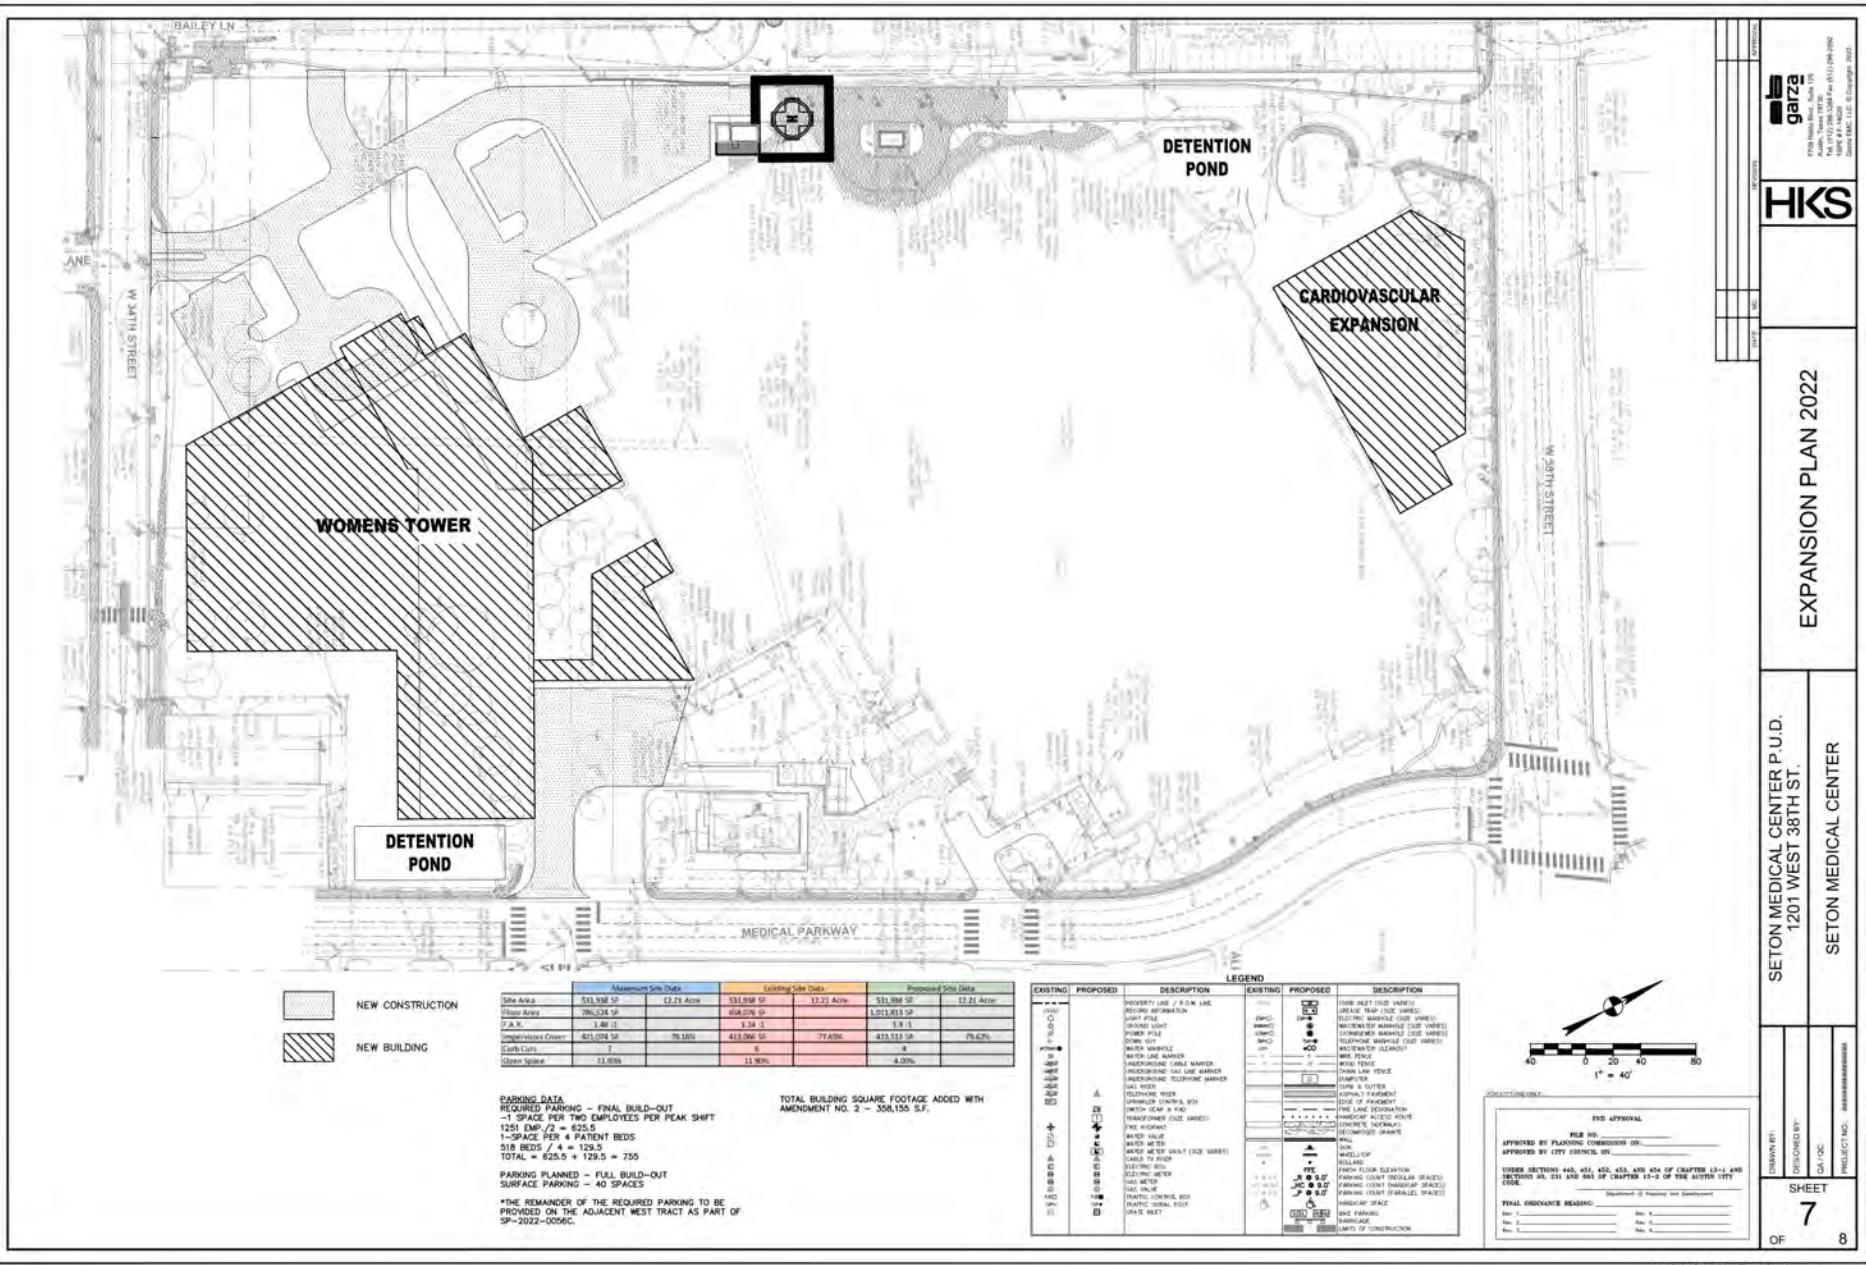

Environmental Features

- No CEFs within 150' of site
- No CWQZ on site
- Current IC 79.16%
- No water quality controls currently on site

**WATERSHED
PROTECTION**

Requested Development Modifications

1. Increase Impervious Cover from 421,074 sf (79.16%) to 423,513 sf (79.62%)
2. ~~Reduce Open Space from 11.9% to 4%~~
3. Add water quality controls where none currently exist

Proposed Environmental Superiority

1. New buildings will achieve a LEED silver rating
2. The redevelopment will exceed minimum landscaping requirements
3. All trees will be sourced from Central Texas native seed stock
4. New buildings will enhance COA dark sky regulations
5. Building design will reduce bird/building collisions by utilizing glass with a reflectivity of 15% or less
6. An Integrated Pest Management plan will be provided

Additional Environmental Items

1. The project will provide onsite water reuse system that will collect condensate and rainwater collection to offset cooling tower potable water demand and irrigation
2. Electric vehicle charging ports will be available for Women's Tower occupants
3. Heat island effect will be mitigated by having over 75% parking under cover and using light-colored hardscape (concrete vs asphalt) and shading
4. Over 50% potable outdoor water will be saved by using a native, drought tolerant plant palette and efficient irrigation equipment
5. Efficient plumbing fixtures will be used to reduce 35% reduction in indoor potable water use
6. Equipment and appliances will comply with LEED water use requirements

Recommendation

Staff recommends approval of the PUD Amendment with the following conditions

- 1. This project complies with Tier 1 superiority items as noted on the PUD exhibits**
- 2. The project complies with Tier 2 superiority items as noted on the PUD exhibits**
- 3. The project commits to collect and beneficially reuse both rainwater and condensate for cooling water demand and irrigation**

Wendy –

ATD wishes to add some clarification notes relating to the transportation analysis compliance process required of the Seton PUD Amendment. These notes do not alter the TIA compliance memo dated 8/10/2022 and approved on 8/11/2022, but serve as a preface to the considerations taken during the review of the compliance memo.

1. The existing PUD has an approved TIA as part of that zoning ordinance. A compliance review and memo is necessary to show that the proposed amendment is consistent with the assumptions and analysis within that TIA. Elements of transportation superiority do not need to be shown in the PUD amendment itself, but the compliance memo is to show that the requirements of the base PUD – which had superiority requirements at that time -- are being met.
2. When determining the number of new trips that the hospital expansion could generate, ATD took a conservative approach by using the gross square footage of the new area. This method looks at a higher number of possible new trips for analysis purposes. In reality, a sizeable portion of the new square footage will be added to existing hospital patient rooms in order to right-size them to acceptable standards. New floor area used for such right-sizing do not add new trips to the transportation network. In other words, the number of new trips identified within the compliance memo is an overestimate of the most likely actual traffic generated by the planned expansion.
3. The planned improvements included in the PUD amendment reduce the number of driveways along Medical Parkway and 34th Street from current conditions. The elimination of these driveways will improve vehicular operations along these streets.
4. Looking at the neighborhood characteristics, there are three activities that have noticeable influences on the transportation network: (1) the drop-off/pick-up times of schools, (2) shift changes at the hospital campus, and (3) the traditional AM/PM peak periods of the roadway network. The timing of these events occur differently during the day and are not compounding simultaneously. Like many other areas of the city, there may be short periods of the day when congestion occurs at intersections and driveways due to such similar events. These known, short-lived events are expected and are not an indication of continuous, over-saturated streets across a broad area.
5. Traffic along W 34 Street between Mills Avenue and Jefferson Street will see little change in traffic patterns due to the expansion of the hospital campus. Existing traffic patterns show that traffic from W 34th Street use W 35th Street to access Mopac and destinations west of the hospital campus. Speed mitigation measures, however, could be applied to this section (between Mills Avenue and Jefferson Street) of W 34th Street to address concerns.

Attachment C

6. The ATD-sponsored bike network/Shoal Creek Trail improvement project along W 31st Street is still in the due diligence phase. ATD is selecting preferred design options for these improvements and then will move into the public outreach phase of the project within the next few months. The TIA compliance review was not required to include the impacts of any bike/trail improvements since it is not known what that project will specifically entail.

If you have questions regarding the above comments, please contact myself or Nate Aubert. Thank you.

RE: Ascension Seton 38th TIA Compliance

Dear Curtis and Nate,

The purpose of this letter is to show compliance with the Seton TIA, which was approved in September 1992 as part of the PUD, for the currently proposed expansion of the site. The land uses modeled in the approved TIA consisted of the following:

- 877,998 square feet of Hospital
- 77,002 square feet of Clinic

On February 15, 2002, the TIA was updated to reflect a reduction in the square footage for the land use mix. The land uses assumed in this approved TIA update letter consisted of the following:

- 709,598 square feet of Hospital
- 77,002 square feet of Clinic

Based on the TIA update, the project was approved for a total of 10,019 unadjusted trips per day, as shown as shown in Table 1.

The following land uses are currently built to date for the Ascension Seton 38th site:

- 581,074 square feet of Hospital
- 77,002 square feet of Clinic

The currently proposed land use for the Ascension Seton 38th development expansion consists of the following:

- 358,155 square feet of Hospital

This will result in a total square footage of 1,144,755 (709,598 SF of Hospital, 358,155 SF of Hospital, and 77,002 SF of Clinic).

Table 1 below provides a trip generation comparison of the uses in the 2018 TIA update with what was approved as well as what is currently proposed for the Ascension Seton 38th development. The ITE Trip Generation Manual (11th Edition) was used for the approved, existing, and currently proposed land use mixes. The total approved project trips based on the 2002 TIA Update letter is

10,019 unadjusted trips per day, while the approved plus proposed land uses would generate a total of 15,383 unadjusted trips per day. This results in an estimated 5,364 trips over the approved for the site.

Table 1. Summary of Unadjusted Daily & Peak Hour Trip Generation

Land Use Code	Land Use	Size	24-Hour Two Way Volume	Total AM Peak Hour Volumes	Total PM Peak Hour Volumes
	Previously Approved TIA Update (02.15.02)				
610	Hospital	709,598 SF	7,223	638	646
630	Clinic	77,002 SF	2,796	177	275
	Total Approved	786,600 SF	10,019	815	921
	Existing Land Uses				
610	Hospital	581,074 SF	6,543	379	187
630	Clinic	77,002 SF	2,796	177	275
	Total Existing	658,076 SF	9,339	556	462
	Proposed Land Uses				
610	Hospital	358,155 SF	5,364	424	417
	Total	1,144,755	15,383	1,239	1,338
		Remaining	-5,364	-424	-417

As noted in the PUD, the monitoring of certain intersections (as defined by City staff) was conducted to ensure the impact of the Ascension Seton site expansion does not cause these intersections to operate unacceptably. The following intersections were identified by City staff to be included in this report, as shown in the enclosed figure:

1. Lamar Boulevard and 38th Street
2. Guadalupe Street and 38th Street
3. Shoal Creek Boulevard and 38th Street
4. Lamar Boulevard and 40th Street/Central Market Driveway

Table 2. Intersection Level of Service and Delay (sec/veh)

Intersection	Control	2022 Existing		2028 Forecasted (Without Site)		2028 Site + Forecasted (No Improvements)		2028 Site + Forecasted (With Improvements)	
		AM	PM	AM	PM	AM	PM	AM	PM
Overall intersection LOS and delay is reported for signalized intersections.									
1	Lamar Boulevard and 38 th Street	Signal	C (30.4)	D (40.4)	C (34.2)	E (59.5)	D (35.8)	E (62.2)	N/A
2	Guadalupe Street and 38 th Street	Signal	D (37.0)	D (42.4)	D (40.3)	D (52.4)	D (40.7)	D (52.4)	N/A
3	Lamar Boulevard and 40 th Street/Central Market Driveway	Signal	A (6.0)	B (15.8)	A (7.4)	B (19.3)	A (7.3)	B (19.4)	N/A
4	Shoal Creek Boulevard and 38 th Street	Signal	B (12.0)	A (6.8)	B (14.1)	A (8.0)	B (14.2)	A (8.7)	N/A

Based on the capacity analysis shown in Table 2 above, ***no improvements are recommended at the study intersections as a part of this study***. It should be noted that the intersection of Lamar Boulevard and 38th Street operates at LOS E during the PM peak under future conditions with and without the hospital expansion; however, the addition of site traffic results in a delay increase of less than 10%. Due to limited ROW, geometric improvements are not feasible at this intersection. Signal timing optimization was considered, however; retiming the intersection of Lamar Boulevard and 38th Street would require the retiming of multiple intersections to ensure the North Lamar Boulevard Corridor operates efficiently and acceptably. Detailed intersection capacity analysis is provided in the enclosures.

I am hereby requesting approval of this TIA compliance letter, since the proposed expansion does not cause any of the identified intersections to operate unacceptably. It should be noted that this development will be subject to Street Impact Fees (SIF) based on the amount of expansion that is beyond the previously approved square footage amount.

Please feel free to contact me if you have any questions or need additional information to approve this request.

Sincerely,
HDR Engineering, Inc.

Re: Administrative PUD Revision - C814-92-0006

Dear Mike,

Attached is our request for an administrative revision to the Seton Medical Center PUD documents for the Main Campus site located at 1201 West 38th Street. This package was originally submitted as a correction, but was determined to be an administrative revision by Carl McClendon. See attached correction request. We discussed this submittal with Carl McClendon and Johnny Price last summer, and have processed the revision documents in accordance with correspondence to Carl dated July 18, 2001 (copy attached).

The current PUD documents include five (5) drawings which together describe the boundary of the PUD, the existing conditions of the site as of September, 1992 when the PUD was originally submitted, the total build-out of the property allowed by the PUD, and the landscaping concept for the final build-out.

There is just under 550,000 square feet of floor area in the existing facility. The PUD allows for a total floor area of 786,600 square feet. Seton has opted to progress toward the allowable build-out in stages, and plans to construct approximately 111,500 square feet in this stage of construction.

Based on conversations with your staff regarding the staging of the construction and the PUD revision process, we have prepared an additional PUD drawing to be inserted into the approved documents. This new drawing graphically describes the scope of the Stage One construction.

This stage of construction will generate minor changes to the final build-out of the PUD. Therefore, to keep the documents consistent throughout, we are proposing to update the existing PUD drawings, which show the full build-out of the PUD and the landscape concept plan. The updated plans reflect those aspects of the Stage One construction that will impact the final build-out.

Detention facilities will be provided on-site for this stage of construction. Detention pond areas have been designated on the plans. The areas designated will only be utilized as necessary to provide the required storage volumes and allowable discharge rates. Detention facilities will be designed in accordance with the requirements of the City of Austin Drainage Criteria Manual. Stage One development will have no negative effect on the existing and future drainage system in the area or on the natural and traditional character of the land and waterways.

Extensive transportation studies were completed by WHM when the original PUD was prepared. In response to Carl's correction comments (attached), WHM has provided additional trip generation data, as it relates to the proposed stage one construction and final build-out. See attached letter from Mike McInturff dated February 15, 2002.

All construction proposed in Stage One is consistent with the PUD documents, and none of the PUD restrictions are exceeded by the Stage One development or the revised final build-out.

Attached for your staff's review and approval is a redlined set of the approved PUD documents including the inserted Stage One drawing. The changes made to each of the PUD drawings are:

Cover Sheet (Sheet 1): On the cover sheet, the sheet list has been revised to reflect the newly inserted stage one sheet, and a City of Austin standard revision/correction table has been added.

Comprehensive Plan (Sheet 2): This sheet is unchanged except for the sheet numbers.

Existing Conditions (Sheet 3): This sheet is unchanged except for the sheet numbers.

Stage One Construction (Sheet 4): This sheet has been added behind the Existing Conditions to describe the Stage One work.

Site Plan (Sheet 5): This sheet depicts the final build-out of the site. Revisions on this sheet reflect those aspects of the Stage One construction that will impact the final build-out. Revisions include:

- 1) The entry drive, drop-off area, and parking layout on the 38th street side of the building have been modified.
- 2) The building footprint has been modified slightly on the 38th street frontage to reflect the actual Stage One addition.
- 3) The building footprint has been modified at the southwest corner of the building. Specifically, the footprint expansion to the west has been rotated to the south face of the building.
- 4) The layout of the existing passenger drop-off at the southwest corner of the facility has been revised to accommodate the building modifications.
- 5) The building footprint has been modified to reflect the existing MRI building.
- 6) The new entry drive from Medical Parkway has been shifted north to line up with the existing 35th street curb lines.
- 7) The building footprint and driveway layout on the east side of the building have been modified to reflect the existing electric entrance.

Comprehensive Landscape Plan (Sheet 6): Revisions on this sheet reflect those aspects of the Stage One construction that will impact the final build-out and the landscaped areas on the site.

For clarity, we have also included an additional, redlined copy of the PUD Site Plan. To create this sheet, we overlaid the existing PUD site plan on the proposed PUD site plan and redlined all the areas that were different.

We request that the revisions to the PUD documents be administratively approved. As soon as we receive the approval, we will provide final corrected mylars for replacement in the City file.

Please contact Judd Willmann or me at 472-6721 if you have any questions or need additional information.

Regards,

James C. Alvis, P.E.

Mr. Mike Heitz, Director
Watershed Protection and Development Review Department
City of Austin
505 Barton Springs Road
Austin, Texas 78767

Dear Mr. Heitz:

The following information is provided in response to comments received from Carl McClendon concerning the Seton PUD correction for File No. C814-92-0006.

WHM prepared a Traffic Impact Analysis (TIA) in September 1992, which was submitted for approval as a part of the original PUD application. Enclosed is a copy of Page 38 from that TIA which contains Table 9 summarizing estimated trip generation for the two proposed phases of the development. The Phase II (2010) Build Out Total was reduced from the proposed 955,000 square feet to 786,600 square feet during the review and approval of the PUD application. Since approval of the original PUD, Seton has continued planning work for the project resulting in the current site plan for which approval is being sought from the City. This plan depicts the Stage One construction to be initiated this year, resulting in a site total of 658,076 square feet. The full build out will consist of the 786,600 square feet approved by the City.

In response to Carl's review comments, WHM completed a comparison between the originally proposed Seton PUD trip generation (Phase I – 1995 and Phase II – 2010) and the currently proposed trip generation (Stage One – 2002 and Full Build Out). Enclosed is a revised Table 9, which summarizes estimated trip generation for the proposed site plan revision. As noted by comparison of the two tables, the proposed Stage One building expansion will result in a 2.3 percent increase in the daily trips estimated for the previous Phase I plans. The Full Build Out is reduced to the 786,600 square feet previously approved by the City and results in 16 percent less daily trips than estimated in the TIA.

Please contact me if you have any questions concerning this information.

Sincerely,

Mike McInturff, P.E.
President

Enclosures

account for approximately 50 percent of the peak hour trips. The directional distribution is unchanged from Phase One and has been previously shown in Table 7.

Table 9. Phase Two Summary of Trip Generation Daily and Peak Hour

<u>Land Use</u>	<u>Size SF</u>	<u>24 Hour Two-Way Volume</u>	AM Peak Hour		PM Peak Hour	
			<u>Enter</u>	<u>Exit</u>	<u>Enter</u>	<u>Exit</u>
PHASE I (1995)						
Hospital	590,598	9,780	529	205	160	418
Clinic	52,002	1,529	67	33	87	139
Subtotal	642,600	11,309	596	238	247	557
PHASE II (2010)						
Hospital	877,998	12,362	794	308	233	607
Clinic	77,002	2,264	99	48	128	205
Build Out Total	955,000	14,626	893	356	361	812

Given the total site generated traffic and the directional distribution by approach, the next step in the process was to assign the traffic destined to and from the project to the most likely travel path. This was done by investigating a number of alternative travel patterns as well as the ingress/egress points along the project boundaries. Major consideration was given to the traffic flow and safety of the major roadways.

The total 2010 traffic demand placed upon these key locations will be the sum of traffic generated by this proposed development, traffic generated by other development projects, and changes in existing traffic. In order to approximate the effects of other development activities that are not specifically addressed in this analysis and as discussed previously, an annual growth rate of 1.0 percent has been applied to forecasted 1995 traffic volumes, exclusive of existing site traffic volumes. It should be emphasized that this analysis has assumed a scenario that does not account for trip reduction through the use of public transportation.

Again, it should be noted that traffic generated by two proposed projects in close proximity to this project are specifically included in this traffic analysis. The West 38th Street PUD has an approved TIA which was used to determine the appropriate 2010 traffic volumes. Medical Park

Intersection Summary												
Area Type:	Other											
Cycle Length:	140											
Actuated Cycle Length:	140											
Offset:	55 (39%), Referenced to phase 2:NBSB and 6:NBSB, Start of Red											
Natural Cycle:	90											
Control Type:	Actuated-Coordinated											
Maximum v/c Ratio:	0.70											
Intersection Signal Delay:	7.4				Intersection LOS: A							
Intersection Capacity Utilization	58.1%				ICU Level of Service B							
Analysis Period (min)	15											

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 3: Lamar Blvd & 40th St/Central Market Dr

Pedestrian Green has to be less than Phase Max Green.

Intersection Summary

Area Type: Other

Cycle Length: 130

Actuated Cycle Length: 130

Offset: 15.5 (12%), Referenced to phase 2:NBSB and 6:NBSB, Start of Red

Natural Cycle: 95

Control Type: Actuated-Coordinated

Maximum v/c Ratio: 0.88

Intersection Signal Delay: 41.2

Intersection LOS: D

Intersection Capacity Utilization 84.1%

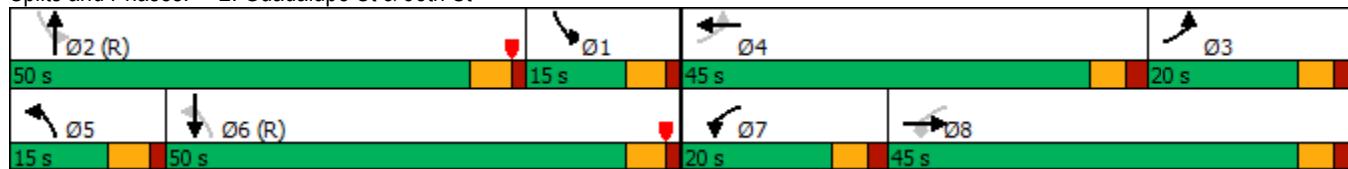

ICU Level of Service E

Analysis Period (min) 15

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Intersection Summary

Area Type: Other

Cycle Length: 130

Actuated Cycle Length: 130

Offset: 31.5 (24%), Referenced to phase 2:NBSB and 6:NBSB, Start of Red

Natural Cycle: 105

Control Type: Actuated-Coordinated

Maximum v/c Ratio: 1.51

Intersection Signal Delay: 59.1

Intersection LOS: E

Intersection Capacity Utilization 90.6%

ICU Level of Service E

Analysis Period (min) 15

- ~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
- # 95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
- m Volume for 95th percentile queue is metered by upstream signal.

Re: **Opposition to Rezoning Request & Request for Postponement**
C814-92-0006.02 - 1201 W. 38th Street

Dear Planning Commissioners,

On behalf of the West 31st Street Creekside Neighborhood Association, we are requesting postponement of the above-referenced rezoning request. **We are requesting a postponement until the September 27th meeting of the Planning Commission to provide the applicant sufficient time to provide the City and the impacted neighborhoods an adequate traffic impact analysis.** Earlier this week, we received a copy of a letter by which the applicant intends to "show compliance with" a TIA approved in 1992.

Under the applicant's figures, the proposed expansion of the facility would increase trips per day by 5,364 over what was previously approved, an increase of approximately 33% of the total trips generated from the facility. Additionally, the proposed PUD amendment significantly alters the configuration of the buildings, including ingress and egress onto the local roadways. The applicant's data shows that some roadways will increase up to 10%, while also completely omitting the impact that the new configuration and expansion will have on West 34th and West 31st Streets. The applicant's analysis demonstrates the need for a new TIA.

Conditions in the area have changed substantially since 1992; that point should be well understood. As the city and the area has grown, this area of Austin has become increasingly more congested, with failing intersections and non-stop traffic. At the same time, the City of Austin has prioritized the improvement of its bicycle and pedestrian networks. This neighborhood serves as a critical link for bicycle commuters making their way across Central Austin, as well as recreational users of the Shoal Creek Trail.

Planned Unit Developments are about ***superiority***. This PUD presents an opportunity to help address known gaps in the bicycle and pedestrian network. Given the substantial impact this expansion will have on the overall traffic in this area, we believe the most important metric for superiority on this project should be how it helps address the deficiencies in the area's bicycle and pedestrian network.

The City, our adjacent neighborhoods, and bicycling and trail advocates have been engaged in several years of discussions for how to best address bicycle and pedestrian safety in this area. While we understand that the applicant does not want to be dragged into these discussions, the traffic generated from this project will be part of the mix of users, and proper planning and coordination should occur to ensure that we are improving conditions overall.

Thank you for the consideration of our postponement request.

Best regards,

Robert "Bobby" Levinski
