

sfc SUSTAINABLE FOOD CENTER

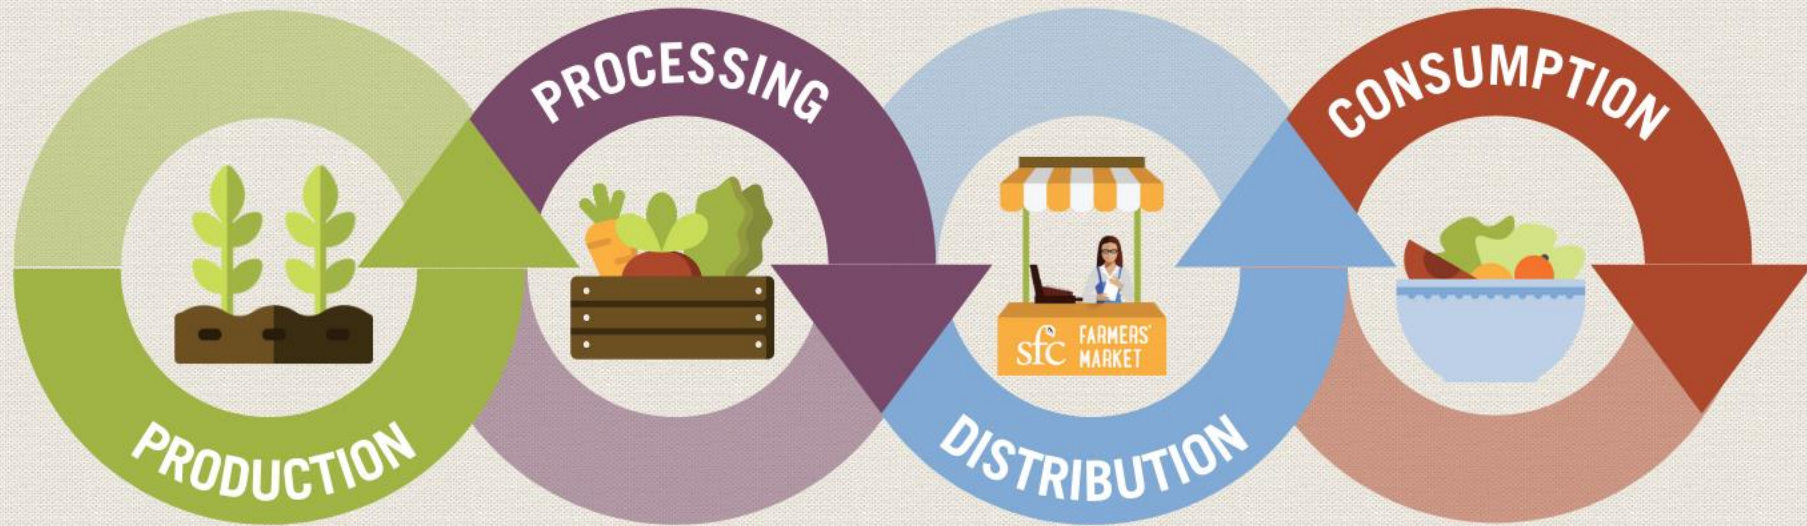

MISSION AND PROGRAMS OVERVIEW

A close-up photograph of a pair of hands holding several fresh, green Brussels sprouts. The hands are positioned in the center of the frame, with the fingers gently cupping the vegetables. The background is dark and out of focus, with some warm, bokeh light spots. The text is overlaid on the image in a white, sans-serif font.

Our mission is to transform the
food system to nourish our
health, land, and livelihood.

WHAT IS A FOOD SYSTEM?

We define the food system as the interconnected systems and processes that go into the production, processing, distribution, and consumption of food.

The food system influences our nutrition, health, and environment and is shaped by many factors such as policy, climate, and food justice. Labor, energy, waste, and recovery are also key parts of the food system.

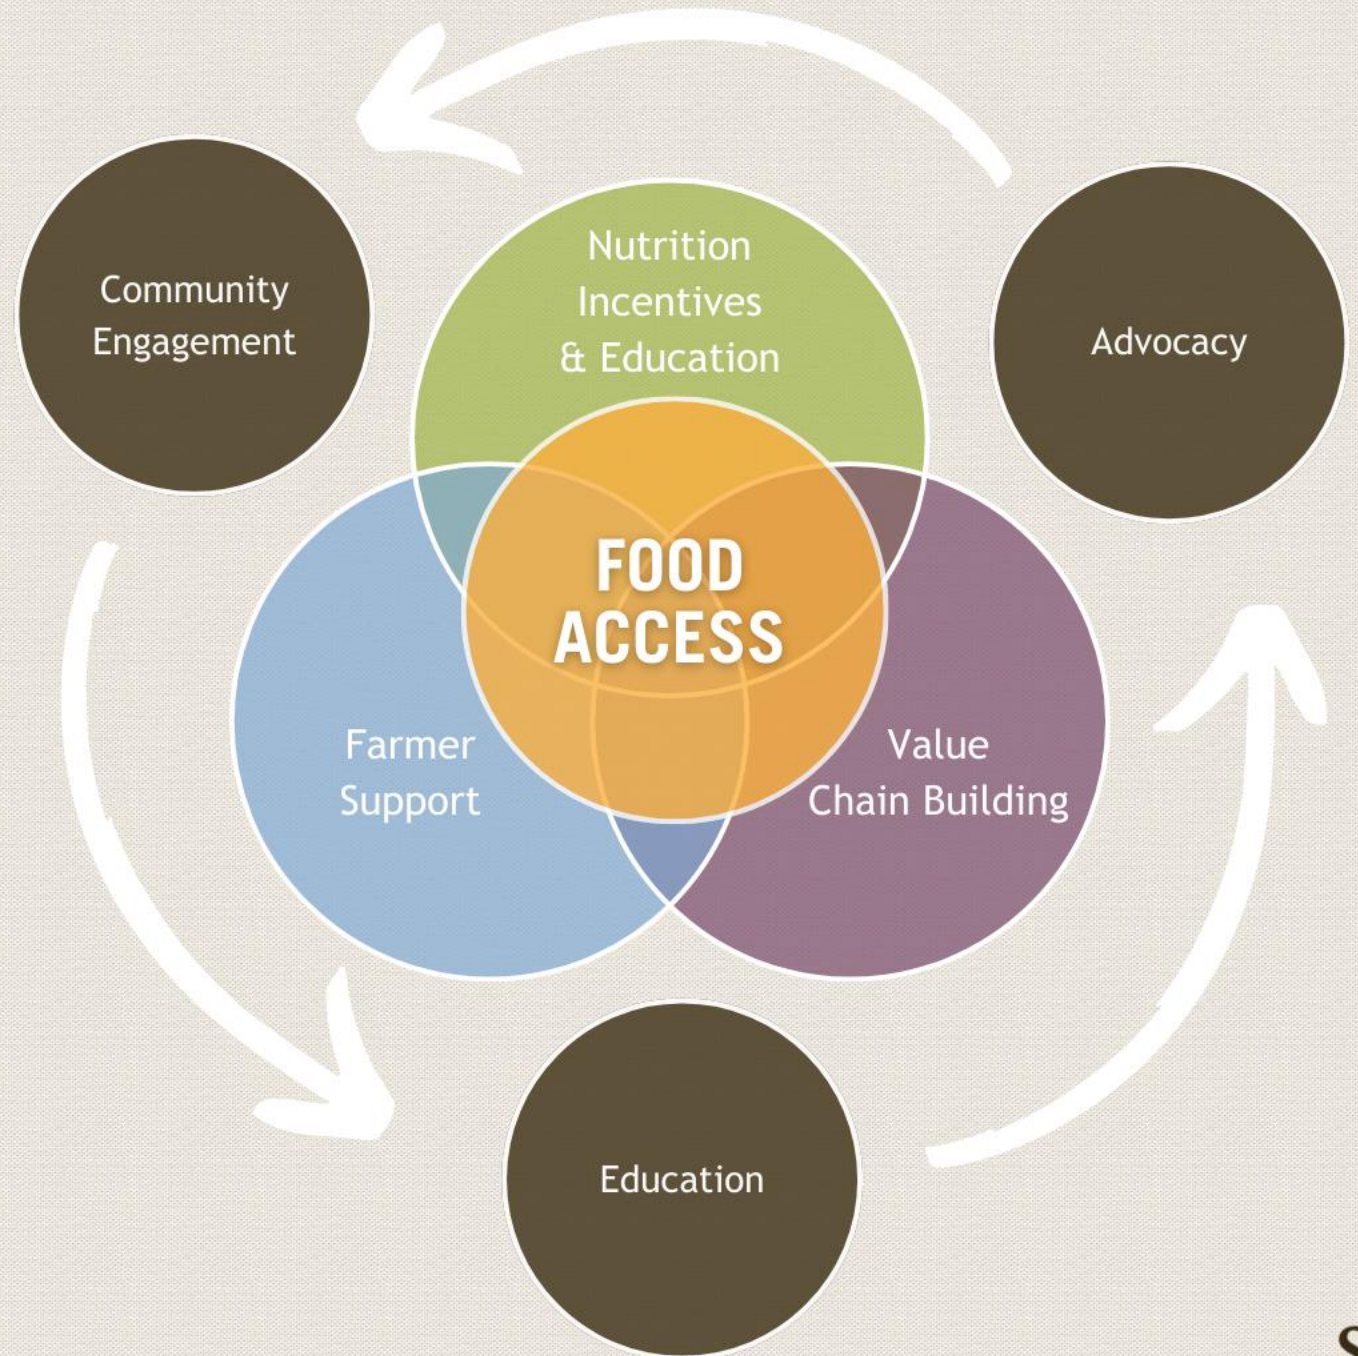

OUR FOCUS WITHIN THE FOOD SYSTEM

We expand access to food through nutrition incentives and education, farmer support, and value chain building.

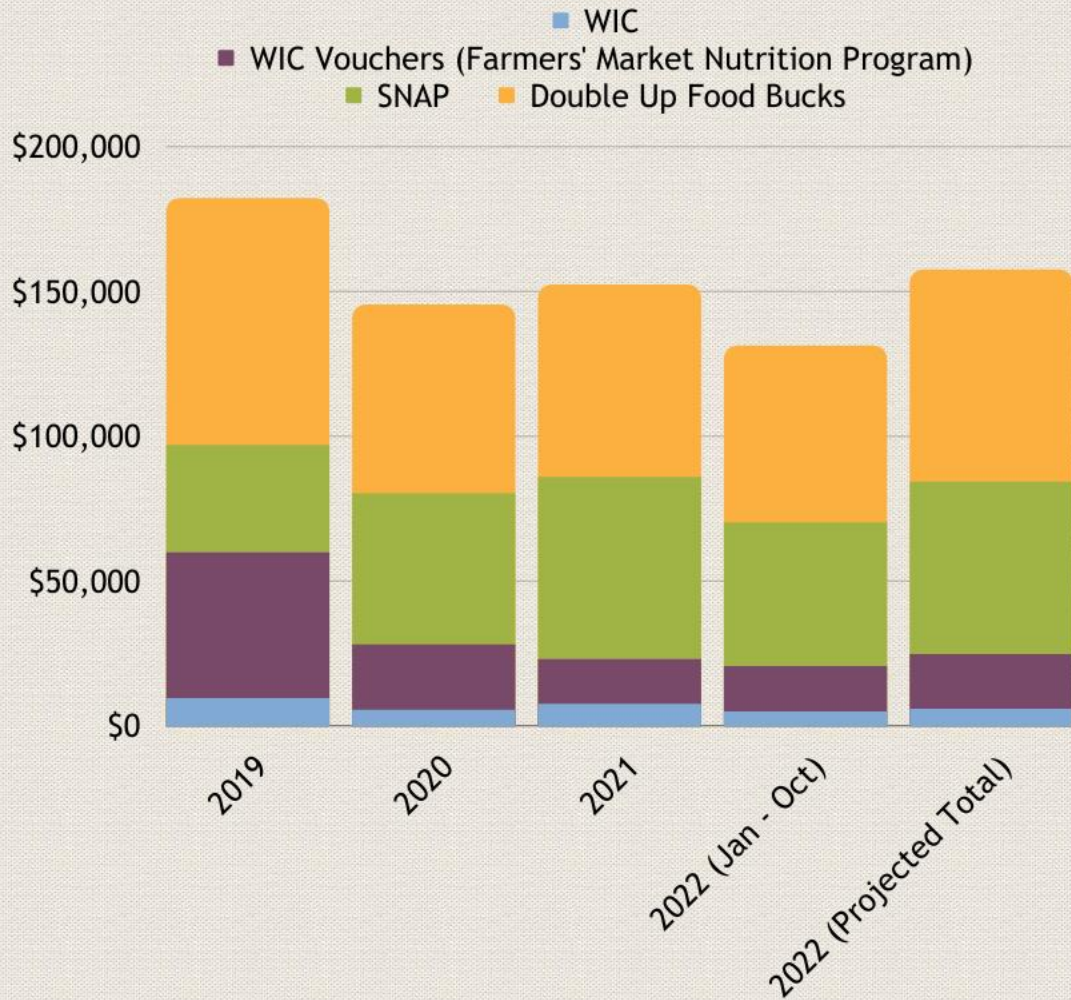

OUR METHODS FOR GENERATING CHANGE

Community engagement, education, and advocacy are the main methods we use to achieve change in the food system.
