

Council Backup Summary

Subproject Name: **Little Walnut Creek: Austin Football Club Cost Participation**
Mission: WQ
CIP ID: 5282.153
Subproject Manager: Franke, Tom
Managing Department: Watershed Protection

Project Summary

This is a cost recovery opportunity with the redevelopment project located at 10414 McKalla Place. A regional water quality pond will be designed and constructed on the east side the stadium property.

Project Justification

Project will provide water quality treatment (biofiltration) for approximately 60.5 acres of previously untreated impervious cover (IC = 80%) in the Little Walnut Creek (reach LWA 4). The LWA 4 reach consistently ranks in the top 100 water quality problem score rankings. Key issues include sediment and riparian problems.

Summary of backup material provided

1. 22-3361 StadCo (FC Austin) Council Backup Summary
2. StadCo (Austin FC) Appendix T_report: Documentation provided by the applicant that includes the construction and engineering design costs used to calculate the cost recovery reimbursement.
