**ZILKER
HOLIDAY TREE LIGHTING**

Every year, **Austin Energy** crews check each bulb in the streamers and place the yellow bulbs in a strategic pattern to create the iconic **Zilker Holiday Tree** swirl.

The **17** remaining moonlight towers represent the only working moonlight towers in the world.

Installing the streamers takes an average of **six hours**, and requires a coordinated effort by about **25** employees.

The tree was designed by City of Austin electricians in 1967.
