

HISTORIC LANDMARK COMMISSION
PERMITS IN NATIONAL REGISTER HISTORIC DISTRICTS
FEBRUARY 1, 2022
HR-2023-004436
WILSHIRE WOOD
4206 WILSHIRE PARKWAY

PROPOSAL

Demolish a ca. 1947 house and carport and construct a new building with pool.

ARCHITECTURE

One-story, side-gabled masonry house with multilight casement windows, a partial-width inset porch, and attached carport.

RESEARCH

The house at 4206 Wilshire Parkway was constructed in 1947 by Wilshire Wood builders Bradfield and Brush. Tom Bradfield, Jr. and his wife, Mary, lived in the home while he worked with Walling, Bradfield & Brush. The Bradfields sold the house around 1953 to physician Martin P. Legett and his wife, Margaret Legett. Legett owned practices on Burnet Road and East Avenue until the 1970s.

DESIGN STANDARDS

The City of Austin's [Historic Design Standards](#) (March 2021) are based on the Secretary of the Interior's Standards for Rehabilitation and are used to evaluate projects in National Register districts. The following standards apply to the proposed project:

Residential new construction

1. Location

The proposed house is appropriately set back approximately 25'. It appears to maintain the street rhythm.

2. Orientation

The proposed building is consistent with the predominant orientation on the block, facing Wilshire Parkway.

3. Scale, Massing, and Height

The proposed new building is one story in height, appropriate for the lot and district. While the building's massing is nontraditional, it appears simple at the front elevation. Canted floor plans are found elsewhere in the Wilshire Wood district. It does not exceed the overall height or foundation height of neighboring buildings.

4. Proportions

The building's long, low proportions appear mostly compatible with nearby contributing buildings, which are one-story with horizontal emphasis at the rooflines.

5. Design and Style

The proposed new building appears mostly compatible with the surrounding district, with the exception of the angled front roofline and chimney. It appears appropriately differentiated in materials and style, and the design elements are consistent throughout. The proposed design does not combine character-defining features from different styles.

6. Roofs

The proposed roofline is somewhat complex, with varying slopes throughout. It does not appear to reflect the character of the roofs on contributing buildings beyond its horizontal emphasis.

7. Exterior Walls

Proposed exterior materials appear compatible. Secondary materials are somewhat compatible, though the vertical rainscreen at main elevation does not appear elsewhere in the district.

8. Windows and Doors

The street-facing façade of the proposed design includes pictures windows and an inset entryway, found in nearby contributing buildings. Windows are somewhat compatible in size, though they do not reflect the configuration or profile of nearby contributing buildings. The proposed front door appears compatible in style and visible from the street.

9. Porches

The proposed design includes a covered porch, which somewhat reflects the design of contributing porches within the district, though most are simpler in design and display less decorative detailing.

10. Chimneys

The proposed chimney is masonry.

Summary

The project meets most of the applicable standards except section 6.

PROPERTY EVALUATION

The property contributes to the Wilshire Wood National Register district.

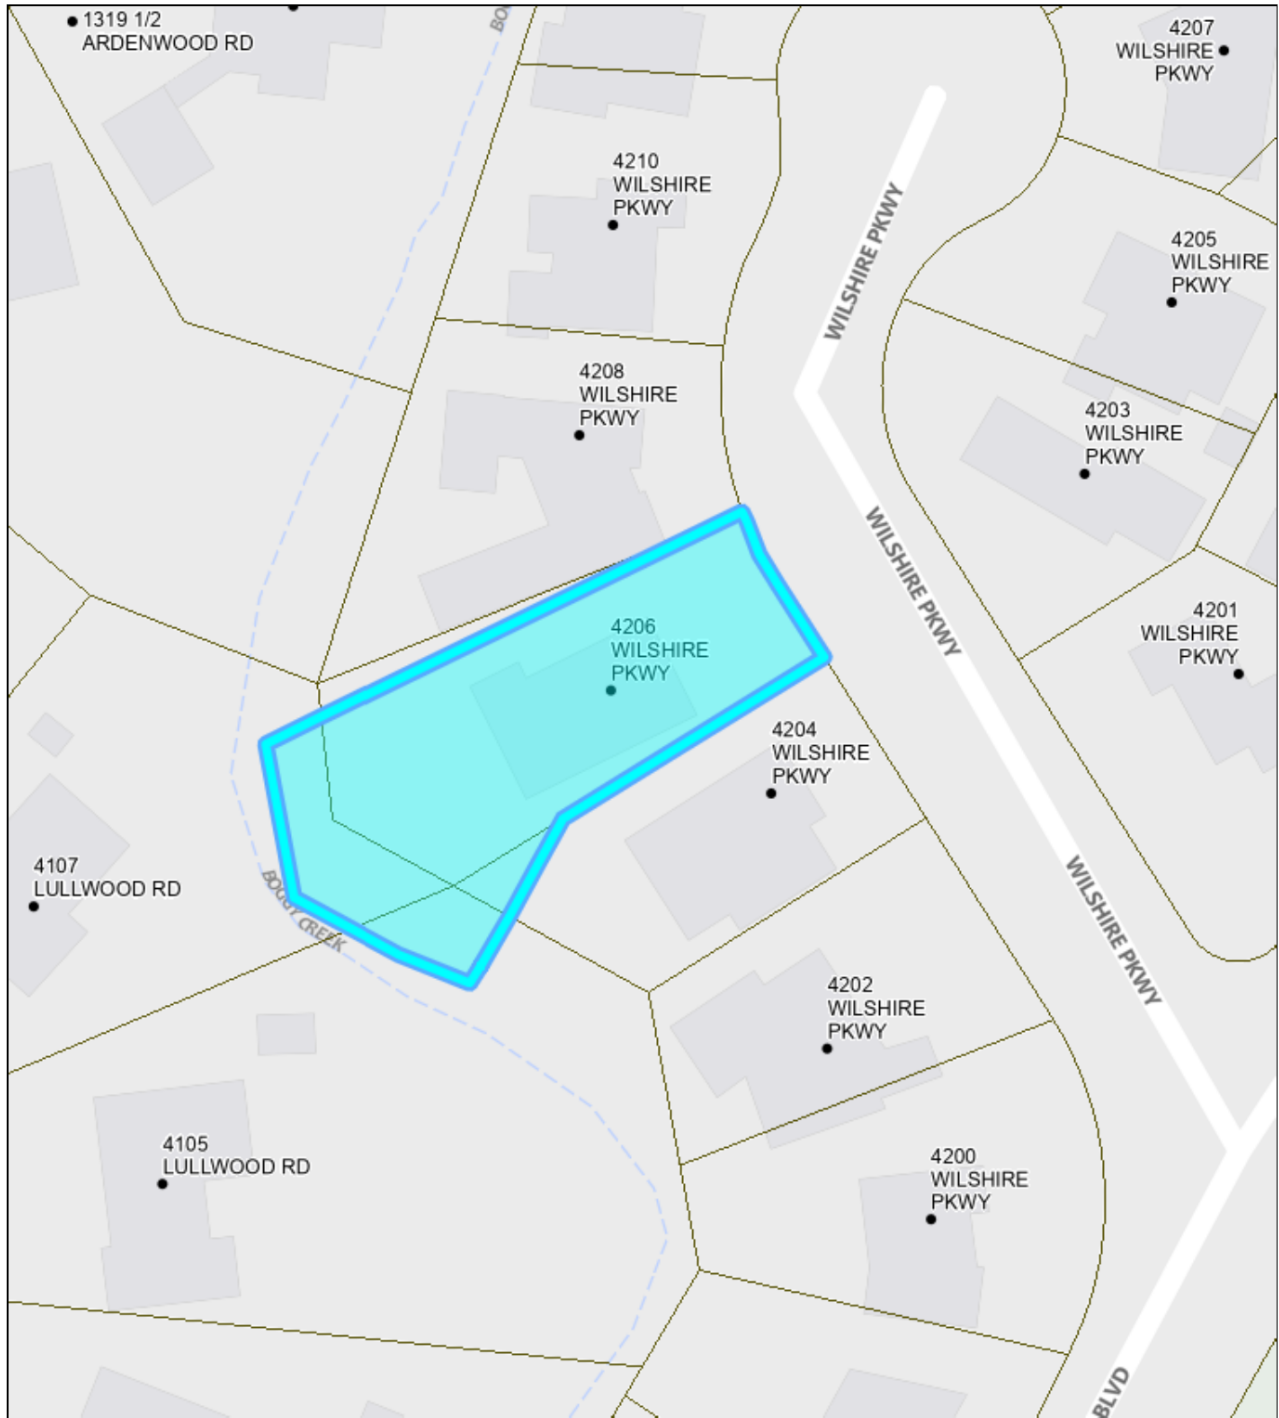

Designation Criteria—Historic Landmark

- 1) The building is more than 50 years old.
- 2) The building appears to retain high integrity.
- 3) Properties must meet two criteria for landmark designation (LDC §25-2-352). Staff has evaluated the property and determined that it does not meet two criteria:
 - a. Architecture. The building not appear to convey architectural significance.
 - b. Historical association. The property does not appear to have significant historical associations.
 - c. Archaeology. The property was not evaluated for its potential to yield significant data concerning the human history or prehistory of the region.
 - d. Community value. The property does not appear to possess a unique location, physical characteristic, or significant feature that contributes to the character, image, or cultural identity of the city, the neighborhood, or a particular demographic group.
 - e. Landscape feature. The property is not a significant natural or designed landscape with artistic, aesthetic, cultural, or historical value to the city.

STAFF RECOMMENDATION

Approve the demolition application upon completion of a City of Austin Documentation Package. Comment on and release plans for new construction.
