15 February 2023

Cotter Cunningham
Vice President
Waller Creek Local Government Corporation (LGC)

RE: Waller Creek District: Addendum Six: Creek Delta Construction Documents, Permitting & Bidding Phase Plan

Dear Cotter,

Enclosed herewith you will find Addendum Six to the Creek Delta Construction Documents, Permitting & Bidding Phase Plan (Phase Plan) that includes construction documentation and permitting work for a grading study on the trail connection to 4th Street and project coordination with the private development site at 98 Red River St, also known as the Waterline. Addendum Six covers professional services only; construction will be handled as a separate Phase Plan.

Addendum Six increases the original Phase Plan costs by **\$360,665**, which includes \$265,505 from the Austin Transportation Department (ATD) and \$95,160 from Waterloo Greenway Conservancy through a forthcoming developer agreement with the Waterline development. The ATD scope is a continuation of the work approved with Addendum Five. The trailhead at 4th Street will be modified to ensure compatibility with the future Texas Department of Transportation (TxDOT) I-35 expansion plans. The additional Waterline project coordination scope will be utilized to study the walls, grading, and drainage within the shared limits of construction.

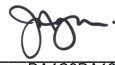

The materials in Addendum Six only show the updated exhibits, all other documentation from the originally approved phase plan and addenda remain valid. The Joint Development Agreement (JDA), Section 3, identifies the documentation required for each proposed phase plan. The attached checklist identifies all the submission requirements including those applicable to this Phase Plan and where they can be found in this document.

If you have questions or concerns, please let me know and we will address them quickly.

Waller Creek District

ADDENDUM SIX TO THE CREEK DELTA CONSTRUCTION DOCUMENTS, PERMITTING & BIDDING PHASE PLAN

Project Identification:

Title: Addendum Six to Creek Delta Construction Documents, Permitting & Bidding Phase Plan (Additional Authority) (or “Addendum Six”)

Location: Along Waller Creek from Lady Bird Lake to 4th Street

Date: 15 Feb 2023

Unless otherwise specified herein, section reference shall refer to that certain Joint Design Development, Management and Operation Agreement by and among the City of Austin (“City”), Waller Creek Conservancy (“WCC”) and Waller Creek Local Governmental Corporation (“LGC”), dated April 16, 2014 (the “JDA”).

Effective August 14, 2019, the non-profit corporation formerly known as Waller Creek Conservancy (“WCC”) became known as Waterloo Greenway Conservancy and all references in this Addendum to Waller Creek Conservancy from and after that date shall mean Waterloo Greenway Conservancy (“WGC”).

EXECUTIVE SUMMARY (3.04 A.1)

Waterloo Greenway includes a one-and-a-half mile urban, riparian ecosystem that meanders southward from Waterloo Park at 15th Street along the eastern edge of downtown Austin ending at Lady Bird Lake. Once complete, Waterloo Greenway will total 35 acres of connected urban green space and will feature four distinct beautifully designed park spaces, pedestrian and bicycle paths, a revitalized creek, and other urban amenities – a place where the environment, culture, health, adventure, and diversity converge. The revitalized Waller Creek will renew the natural environment, foster the creative arts, and nourish authentic and uplifting experiences that reflect Austin’s diversity and dynamic spirit.

The Creek Delta section of Waterloo Greenway is an approximately 10-acre green space and creek reconstruction along Waller Creek in Austin from Lady Bird Lake to 4th Street. This part of the project includes one mile of pathways, trails and bridges creating a cohesive and accessible circulation network enabling a new downtown district. There will be top of bank pathways and creek level elevated walkways allowing a unique way of traversing through the City. Eleven new trail connections to adjacent rights-of-way will be created though this design strategically placed to connect to important downtown amenities such as the Ann and Roy Butler Hike-and-Bike Trail, the Rainey Street District, the Austin Convention Center, Palm Park and Palm School, the Lance Armstrong Bikeway, the Sabine Promenade, and the CapMetro Downtown Station (to list just a few). In addition, the Creek Delta design work reconstructs a robust creek ecology to create an immersive public nature experience. Currently the banks of the creek are in disrepair and create a chronic erosion problem in the middle of the City. This work utilizes cutting edge reconstruction and restoration techniques to design the aquatic and riparian habitat along the creek.

Addendum Six to Creek Delta Construction Documents, Permitting & Bidding Phase Plan is proposed by WGC to request additional authority for MVVA team design phase services, permitting fees, and to update the project schedule.

Addendum Six increases the Phase Plan costs outlined in the original Phase Plan and addenda, previously approved by the LGC most recently on April 13, 2022, by \$360,655. This includes \$260,505 from the Austin Transportation Department (ATD) and \$95,160 from Waterloo Greenway Conservancy (WGC) through a developer agreement with the Waterline development (formerly known as 98 Red River). The professional services fee increase is required to coordinate with ATD and the Texas Department of Transportation (TxDOT) on modifications to the grading at 4th Street associated with the Interstate Highway 35 (I-35) Expansion project. The Creek Delta trail design was evaluated to confirm compatibility with the revised 4th Street elevation with Addendum Five. The study confirmed that the 4th Street improvements proposed by TxDOT/ATD could be accommodated with trail grading modifications. As a continuation of this work, the construction documents will be revised. Additionally, the increased professional services fee will support coordination work required for The Waterline development that shares limits of construction with the project. Walls, grading, drainage, and constructability along the creek will be evaluated to mitigate issues during construction and ensure the appropriate easements are maintained. Changes to the construction documents may require a construction change order, which will be processed as an addendum to The Confluence (formerly Creek Delta) Construction Phase Plan (Construction Phase Plan), approved in January 2023. The materials in Addendum Six show only the updated exhibits, all other documentation from the originally approved phase plan and prior addenda remains valid.

The goal of Addendum Six is to complete the work outlined in the Creek Delta Construction Documents, Permitting & Bidding Phase Plan while acknowledging changes are needed to account for the modifications to the scope for ATD and Waterline coordination. The Addendum Six scope will extend the existing Phase Plan scope, but will not adversely impact the concurrent construction schedule that is being performed under the Construction Phase Plan. The subject schedule has been updated based on the latest projections and lays out the key milestones for the project team to complete these changes. Addendum Six only includes professional services as it relates to design; the construction work will be performed under the Construction Phase Plan.

MAIN POINTS OF CONTACT

Proposing and Managing Party:

Waterloo Greenway Conservancy (WGC)

CEO: Jesús Aguirre, jaguirre@waterloogreenway.org (512-541-3520)

Director of Planning & Design: John Rigdon, jrigdon@waterloogreenway.org (512-541-3520)

Responding Party:

City of Austin, Watershed Protection Department (WPD)

Kristin K. Pipkin, kristink.pipkin@austintexas.gov (512-974-3315)

Diana Wang, diana.wang@austintexas.gov (512-974-7168)

City of Austin, Parks and Recreation Department (PARC)

Liana Kallivoka, liana.kallivoka@austintexas.gov (512-974-9455)

Lana Denkeler, lana.denkeler@austintexas.gov (512-974-9414)

Landscape Architecture Team Lead:

Michael Van Valkenburgh Associates (MVVA)

MVVA President and CEO: Michael Van Valkenburgh, Michael@mvvainc.com (718-243-2044)

MVVA Principal: Gullivar Shepard, gshepard@mvvainc.com (718-243-2044)

MVVA Project Manager and Point of Contact: Tim Gazzo, tgazzo@mvvainc.com (718-243-2044)

SCHEDULE (3.04 A.1)

The schedule associated with the original Creek Delta Construction Documents, Permitting & Bidding Phase Plan has been modified to reflect current conditions and project needs. The work plan coordinated with the MVVA design team for Addendum Six proceeds from February 2023-June 2023, which is shown in greater detail in **Exhibit A, Project Schedule**.

PERFORMANCE PERIOD

The anticipated performance period is the next four (4) months. A more detailed project schedule is shown in **Exhibit A, Project Schedule**.

CONTRACTING METHOD (3.04 A.2(ii))

MVVA and their subconsultants will continue working with WGC under the Master Services Agreement that was put in place in May 2015. All the MVVA design team consultants and subconsultants identified by name in this project were under agreement prior to the execution of the JDA or have been selected utilizing methods that meet the City of Austin Ordinances for procurement of services. Any subsequent consultants will be selected utilizing the same.

Addendum Three includes supporting documentation needed to complete the selection of the Competitive Sealed Proposal (CSP) alternative delivery method, see **Exhibit H Request for Action CSP Alternative Delivery Method**. This documentation is necessary to prepare for the Construction Phase contract to be owned by the City.

PROJECT BUDGET (3.04 A.4)

Addendum Six to Creek Delta Construction Documents, Permitting & Bidding Phase Plan increases the Phase Plan by \$360,665 which consists of \$260,505 from the Austin Transportation Department (ATD) and \$95,160

from Waterloo Greenway Conservancy (WGC). The project budget contributions are updated as part of Addendum Six and are outlined below in more detail and in **Exhibit C, Project Budget**.

Addendum Six raises the grand total cost for the Phase Plan to **\$4,708,800**. The City will contribute an amount not to exceed \$4,339,832 toward the Creek Delta creek and trail improvements (excludes Addendum One to the Creek Delta Construction Documents, Permitting, & Bidding Phase - Brazos Street Duct Bank/Austin Energy Utility Reroute). As documented in Addendum Two to the Creek Delta Construction Documents, Permitting, & Bidding Phase, WGC did not plan to contribute additional funds toward Creek Delta Construction Documents, Permitting & Bidding Phase Plan. However, through a developer agreement with Waterline, WGC will increase their contribution to a total of \$368,698, or 7.6%, towards costs invoiced to the Phase Plan. Within the City contribution, WPD has contributed a total of \$3,453,606 which is 71% of the Creek Delta budget. ATD will contribute a total of \$325,505 or 6.7% of the total budget. PARD contributed a total of \$560,720 (11.5%). The PARD contribution remains the same as the original Phase Plan proposal.

Addendum Six does not modify the Brazos Street Duct Bank / Austin Energy (AE) Utility Route design work associated with Addendum One to the Creek Delta Construction Documents, Permitting & Bidding Phase Plan, which is funded in full by AE. In addition, the construction associated with this work also will be funded by AE and will be included in the future Creek Delta construction phase plan. AE contributed an amount not to exceed \$154,982 toward Addendum One, totaling 3.2% of the phase plan budget.

In accordance with Section 10.01 (Project Disbursement Fund Account) of the JDA, upon approval of regularly submitted invoices by the WGC, the City will disburse payment accordingly to the appropriate Project Disbursement Fund Account. As required by Section 3.04 A.25 of the JDA, **Exhibit D, Capital Needs Projection** addresses the prime scope of work and the projected funding needs, excluding Allowances, Change Order Contingency, and Cost Overrun Reserve.

FUNDING SOURCES & REQUIREMENTS/CONSTRAINTS ON FUNDS (3.04 A.4 & 3.04 A.13)

Project invoices will be paid for by the City and managed by WGC. With the approval of this addendum, invoices will be paid as outlined in the project budget.

COST OVERRUN PLAN (3.04 A.5)

In accordance with the JDA, the identification of the source of funds for the Cost Overrun Reserve are required. The Proposing Party must seek approval from the Responding Party to utilize Cost Overrun funding. The request to use Cost Overrun funds does not require LGC approval unless additional funding is needed. The Cost Overrun Reserve included in the original Phase Plan budget was \$159,435. As of 11/30/20, the amount remaining in the Cost Overrun Reserve is \$63,912. Addendum Three includes a \$50,000 increase to the Cost Overrun Reserve, for a total of \$113,912. The contribution split brought forth by Addendum Three has WPD contributing a total of \$155,924. The WPD contribution includes \$50,000 of additional funds to their previously budgeted amount of \$105,933. The PARD contribution of \$27,518 to the Phase Plan Cost Overrun

Reserve remains the same moving forward.

EXHIBIT A: PROJECT SCHEDULE

- ① Addendum Two approved
- ② Addendum Three approved
- ③ 90% CD Submittal
- ④ 100% CD Submittal
- ⑤ Addendum Four approved
- ⑥ Addendum Five approved
- ⑦ Creek Delta Bid – Award – Execute
- ⑧ January LGC meeting* - Construction Contract
- ⑨ February LGC Meeting - Creek Delta CDs Addendum Six
- ⑩ Construction Start*

*Items 8 & 10 overlap with but are not included in the scope of this Addendum and are addressed in the Confluence Construction Phase Plan document.

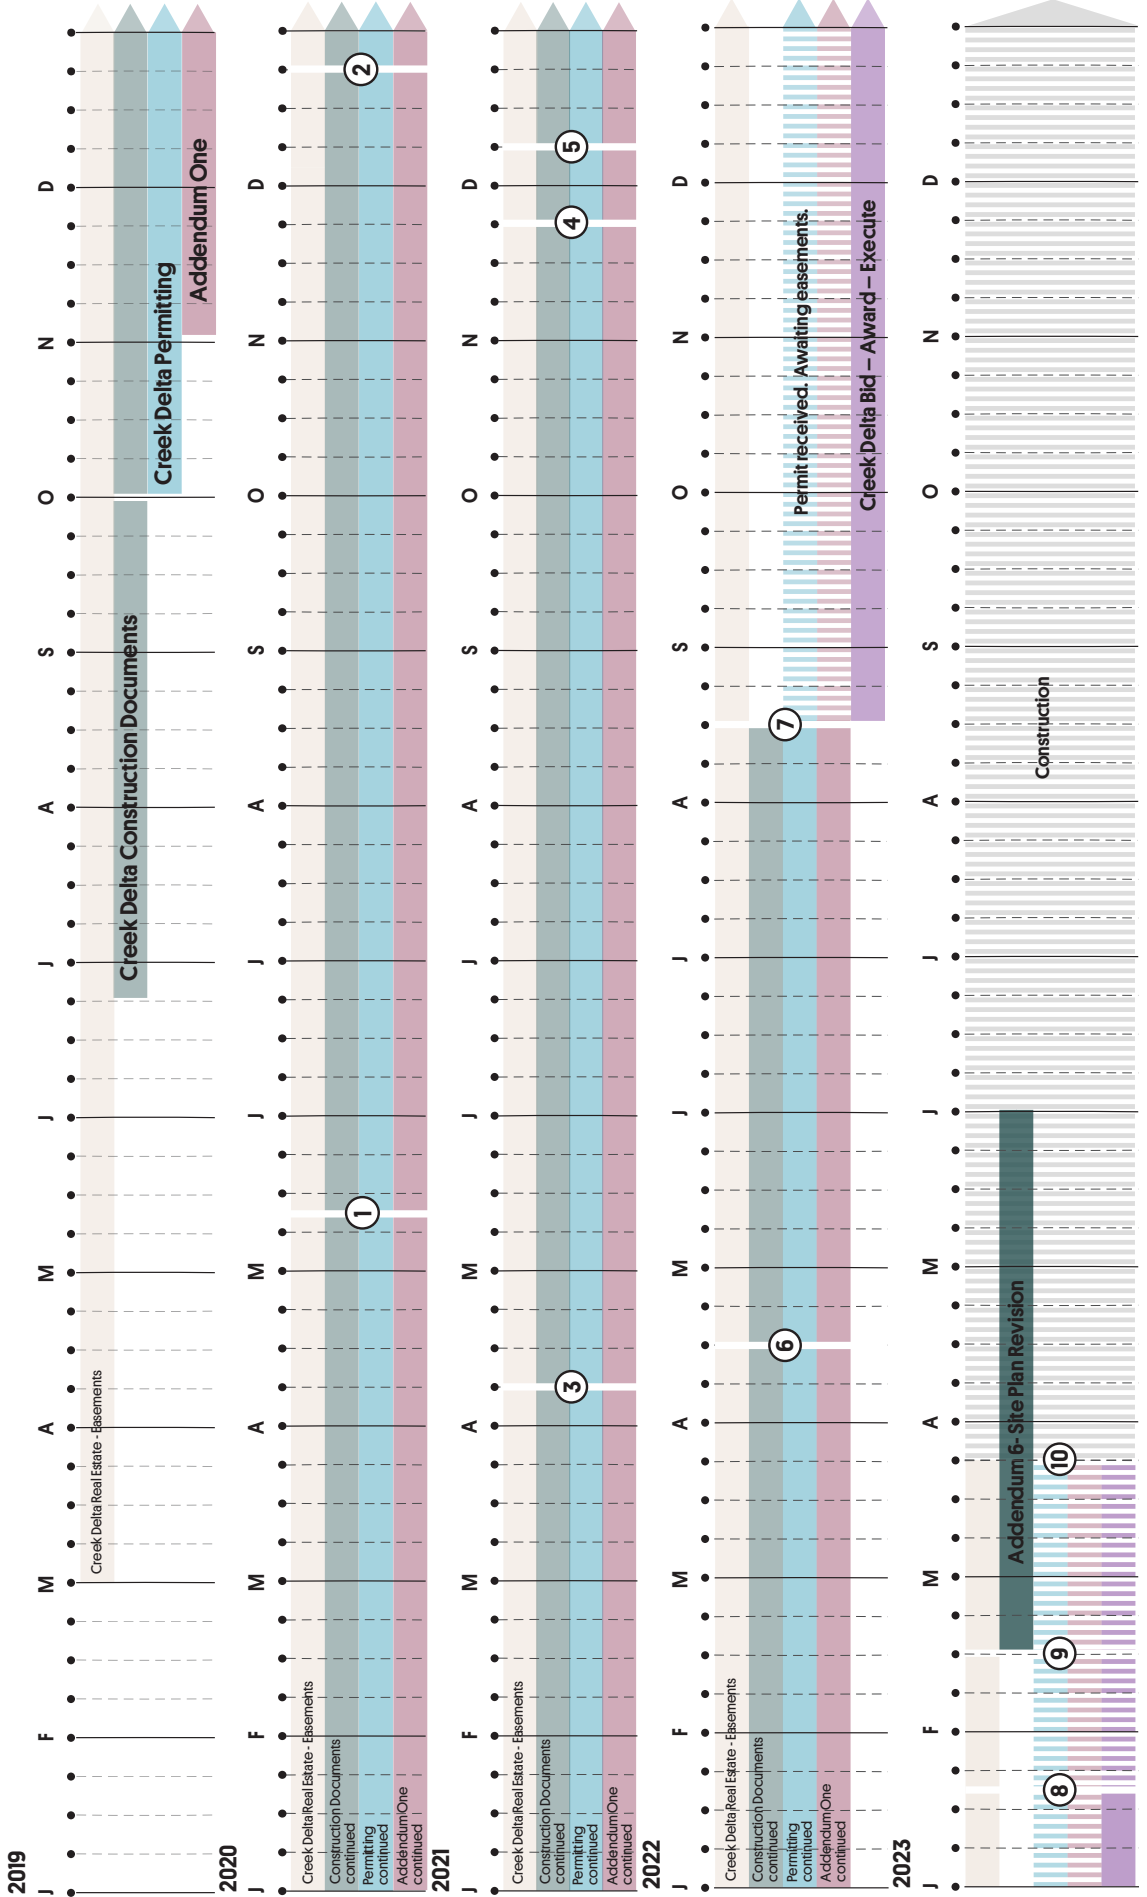

EXHIBIT B: IMPLEMENTATION PLAN

Title: Addendum Six to the Creek Delta Construction Documents, Permitting & Bidding Phase Plan (or "Phase Plan")

Location: Along Waller Creek from Lady Bird Lake to 4th Street
(see Exhibit A, Project Area Diagram)

The Creek Delta Construction Documents, Permitting & Bidding Phase Plan undertakes the work to produce construction documents, the accompanying permitting that goes along with the drawing set, and the bidding coordination work prior to construction (see Exhibit A, Project Area Diagram). The goal of the Creek Delta Construction Documents, Permitting & Bidding Phase Plan is to advance this work in preparation for construction. This Phase Plan only includes professional services as it relates to the design, the construction work will be brought forth in a separate Phase Plan proposal.

Addendum Six to the Creek Delta Construction Documents, Permitting & Bidding Phase Plan includes additional scope items that fit within the existing task categories and did not require an update to the Scope Matrix. The additional services will be tracked as part of the invoicing process.

Michael Van Valkenburgh Associates (MVVA) will lead this effort and coordinate with the appropriate subject expert consultant. The team of subconsultants includes: ACI Consulting (ACI) providing environmental permitting support; Architectural Engineers Collaborative (AEC) providing structural engineering expertise; Altura contributing accessibility expertise; Big Red Dog (BRD/WGI) providing civil engineering expertise and submitting the needed permits for the project; Dwg. Landscape Architects (DWG) providing local landscape architecture, permitting and SITES work; EEA Consulting Engineers (EEA) providing electrical engineering work; ETA contributing the O&M expertise; James Pole contributing the irrigation design; the Lady Bird Johnson Wildflower Center (LBJWC) providing local ecology expertise; LimnoTech acting as the hydrologist; Olsson contributing the soil science expertise; Terracon as the geotechnical engineer; and Tillett providing the lighting design for the project. Working directly with WCC, SpawGlass will be providing preconstruction services including cost estimates at key milestones, Vermeulens Cost Consultants (VCC) will contribute the owner cost estimate work, and Bruce Mau Design (BMD) will do the signage design for the Creek Delta Project. See **Exhibit C** for an Organization Chart and **Exhibit D** for a Scope Matrix that outlines each sub consultants' responsibilities for this Phase Plan.

Creek Delta Construction Documents and Addenda one through five lasted for 164 weeks, permitting ran concurrently. This was followed by a 22 week Bidding & Negotiation period. Addendum Six will add 16 weeks of design scope that will run concurrently with the Construction Phase Plan.

This scope originally included seven (7) trips for MVVA to Austin, Texas aligned with schedule milestones outlined below. Due to the COVID-19 crisis, the number of trips was reduced and replaced with virtual meetings.

KEY MILESTONES

- Project Kick-Off
- Presentation of pre-65% design updates to the Owner Team (COA/WCC)
- 65% Design Submission Preview
- 65% Cost Estimate and Value Engineering
- 90% Design Submission Preview and Owner Team review
- 100% Design Review Submission Preview
- Bidding Review with Client/Contractor

TASK 01: SCOPE OF SERVICES - CONSTRUCTION DOCUMENTATION

GENERAL

- Overall project management administration and QA/QC for design team activities
- Project administration and subconsultant coordination
- Reconcile proposed design with updated survey provided by McGray & McGray in June 2019

MVVA will provide lead project management and be the primary point of contact for the design team, in addition to coordinating among sub-consultants (via weekly, and as-needed team calls) and with COA/WCC. Subconsultants have only scoped internal project management needs. WCC will be the main point of contact for BMD, SpawGlass, and VCC and coordinate meetings as needed with MVVA team and Owner Team.

At the onset of this Phase Plan, MVVA will present a Work Plan which will include the identification of critical decision points anticipated for meeting the project milestones. Included in MVVA's efforts to meet the project milestones, and per MSA section 4.3.1.3, MVVA "shall notify WCC in writing of the date by which WCC's decisions are required in order not to cause a delay."

For all travel to Austin, MVVA will develop a first draft agenda with WCC that will then be distributed and coordinated with the rest of the client team and subs in the effort to both allow for comment review and block out dates on the necessary participants calendars. MVVA will provide bi-weekly status updates that will track project needs, upcoming milestones, owner/client information requests, etc. The final format will be developed at the onset of the CD Phase with owner team participation.

DESIGN CRITERIA / REFINEMENT

The design criteria established during Design Development Phase and Design Development Value Engineering will be advanced and refined during the Construction Documentation Phase. These criteria include:

- Channel Form Design: MVVA will coordinate with LimnoTech to ensure design modifications preserve and restore both hydraulic and ecological function. The design team will reference their findings exhibited in the Atlas 14 / Functional Assessment Study. This includes channel form, channel armoring, wetland flood benches, and aquatic habitat features.
- COA/WCC comments from 100% Design Development
- Incorporating of the value engineering recommendations from Design Development
 - Slope and soil simplification

- Stonework simplification
- Stormwater dissipator removal
- Overlook Terrace (switchback) simplification
- Site lighting – manufacturer change
- Outlet Terrace/lawn area modifications
- Removal of all work on east bank just north of Cesar Chavez Street Bridge (slope below restaurant)
- Sapling Terrace removal, slope simplification, and path removal
- Seep simplification (w/path to Fairmont)
- Elevated walkway surface material change
- Integration of adjacent and overlapping systems (for example, soil transitions from planted water quality features to MSE walls)
- Coordination with concurrent effort RE: Palm Park | Creek Delta Utility Reroute Phase Plan
- Design updates following value engineering process from Design Development
 - Palm Park to 4th Street (increase amount of elevated walkway, Seep, Cypress Grove)
 - Overlook Terrace (switchback)
 - Outlet Terrace / Lawn Area
 - East bank just north of Cesar Chavez Street Bridge (slope below restaurant)
- Floodplain Mapping and Atlas 14
 - The design team will reference their findings from the Atlas 14 / Functional Assessment Study completed prior to the start of Construction Documents as a basis for design during this phase. As part of this phase LimnoTech will prepare a floodplain memorandum documenting the potential flood impacts at Creek Delta. A final *No Adverse Impact Statement* will be prepared by LimnoTech based on the 100% design drawings.
- Creek Delta's L.O.W. directly abuts multiple private and public properties. The coordination and integration of these sites with the Creek Delta project is ongoing and this scope will be carried under an allowance as part of the Phase Plan.
- Confirmation of loading criteria for pedestrian bridges and structures
- City of Austin Stormwater Infrastructure:
 - Austin Convention Center Wet Pond: The design, engineering, and documentation to be handled by BRD and DWG, MVVA to provide administrative processing for invoices only. Wet Pond design criteria issued by COA, WPD on May 30, 2019.
 - Atlas 14 Stormwater Outfall Upgrades (Scope is TBD, to be further coordinated with WPD – Local Flood Risk Reduction team)
 - Stormwater In-Line Treatment Upgrades (An allowance will be held by the client group, see below for more details)

In the *Waller Creek Framework Plan*, the design team investigated installing inline options for water quality treatment of the drainage flowing from the City of Austin storm sewer system into Waller Creek. These systems would be proposed at manhole or junction box locations upstream of the creek outfalls and would filter out trash and sediment to collect it prior to these items entering Waller Creek. An allowance has been held in this Phase Plan to design these systems at five (5) locations within the project area. In order to not impact the project schedule, the work associated

with identifying the locations and types of in-line stormwater treatment will require a minimum of two (2) months in order to incorporate into the 65% CD drawing set. The design team assumes this deliverable will be estimated by the CMAR and Vermeulens as part of the 65% submission, followed by client direction on the scope to prepare for 100% Bid Documents.

CONSTRUCTION DOCUMENTATION – DRAWINGS & DELIVERABLES

Drawings will be submitted in .pdf and AutoCAD formats unless otherwise noted. Conversion to other file formats is not included in this scope. 65% Construction Document packages will be submitted to COA/WG for review and to the Construction Manager at Risk (CMAR) SpawGlass and Vermeulens Cost Consulting for pricing and reconciliation. Due to the construction delivery method change from CMAR to CSP after 65% Construction Documents were submitted, 90% Construction Documents will be submitted to the aforementioned parties except Spawglass, which is no longer the CMAR.

The following consultants will produce drawings for the Construction Document phase:

- MVVA (landscape architect and design team lead)
 - Site preparation
 - Layout plans
 - Materials plans
 - Grading plans
 - Soil placement plans
 - Planting plans and schedules
 - Furnishing plans
 - Site details
 - Site sections and elevations
 - Plan enlargement as necessary
- AEC (structural engineer)
 - Existing Butler Trail bridge demolition
 - Existing concrete pad and path demolition
 - Lattice Bridge #1, #2 and #3
 - Elevated walkway in creek South of Cesar Chavez Bridge to Palm Park
 - Elevated walkway from creek to Convention Center Trailhead
 - 3rd St. elevated span
 - 3rd to 4th St. elevated walkways
 - Cypress Grove Bridge
 - Lighting / furnishing foundations
- DWG (local landscape architect)
 - Permit Site Plans
 - Austin Convention Center Wet Pond drawings

- BRD/WGI (civil engineer)
 - PLAT
 - Easement Sheet
 - Existing conditions plans
 - Erosion and Sedimentation Control plans
 - Demolition plans
 - Site Plans
 - Drainage plans and relevant calculations
 - Storm sewer plans and profiles
 - Creek profiles and sections
 - Fire protection and emergency access plan
 - Utility plans
 - Construction details and stormwater seep infrastructure
- Olsson (soil scientist) *to be included with MVVA drawings*
 - Soil profile details
 - Note: Olsson is not required to sign and seal their drawings
- Terracon (geotechnical engineer)
 - Reinforced soil stabilization plans
 - Wall and slope cross sections and details
- EEA (MEP engineer)
 - Site lighting and power plans
 - Fixture and panel schedules
 - Utility reroutes
 - Electrical details
- Tillett (lighting designer) *to be included with MVVA drawings*
 - Lighting layout plan and details
 - Lighting fixture schedule
 - Note: Tillett is not required to sign and seal their drawings
- James Pole (irrigation designer)
 - Irrigation plans
 - Irrigation details
- LimnoTech (hydrologist) *to be included with MVVA drawings*
 - Armoring material layout plans and details
 - Note: LimnoTech will be co-sealing all drawings that support hydraulic design, armoring materials, channel plans, and profiles.

The consultants listed above will also participate in review of the drawing package prior to COA/WCC submission and will provide written comments of their respective design expertise for incorporation into the drawing set. All other consultants will provide sketches, calculations, internal memoranda, etc. for incorporation of their work into the

drawings. ETM will submit a 75% draft, 90% draft, and 100% Operations & Maintenance Manual. Two ½ size hard copies of the drawing set will be printed for COA following the 65%, 90%, and 100% submissions.

After issuance of the bid documents, the consultants listed above will complete the following additional tasks as part of Addendum 6. Revisions to the construction documents and site development permit plans will be made in accordance with the results of the following design tasks:

1. ATD and TxDOT I-35 Expansion – 4th St. Grading
 - Reconfiguration of the 4th Street trailhead to accommodate both existing street elevation and a potential 18-24” rise at that location when the I-35 expansion project is built
 - Adjustments to maintenance stair and access to creek
 - Revisions to the retaining wall at the approach leading to the concrete bridge connecting the 4th St. trailhead to lower creek trail (also known as Cypress Grove Bridge)
 - Utility layout revisions
2. Adjacent Development Coordination (“Waterline” or “98 Red River” development):
 - Resolve conflicts with the 98 Red River existing retaining wall on the east creek bank
 - 98 Red River east bank wall and surface improvements on the west bank related to the following coordination items:
 - Review 98 Red River design elements for coordination with the bid documents.
 - Coordinate drainage, grading, and planting revisions to account for the 98 Red River existing retaining wall and surface/retaining improvements to the upper terrace on the west bank
 - Confirm constructability of project in vicinity of new wall
 - Selective demolition of 98 Red River existing retaining wall to accommodate improvements
 - Maintenance tie-offs and access

CONSTRUCTION DOCUMENTATION – SPECIFICATIONS

MVVA will lead and oversee the production of project specifications. Where possible, the design team will utilize COA and TxDOT standard specifications. Provided the City of Austin will be managing the construction contract, the City specification format must be utilized, and any special specifications must be reviewed and approved. The requirement to utilize COA and TxDOT standard specifications where possible remains, and there is a stronger emphasis on providing justification for using non-standard specifications.

The consultants that will contribute directly to this effort (either through selection of appropriate standard specifications or project-specific modifications) will be:

- MVVA (landscape architect and design team lead)
- DWG (local landscape architect)
- AEC (structural engineer)

- BRD/WGI (civil engineer)
- Olsson (soil scientist)
- Terracon (geotechnical engineer)
- EEA (MEP engineer)
- Tillett (lighting designer)
- James Pole (irrigation designer)
- LBJWC (ecologist)

Consultants who will be involved in the review and comment on discipline-specific specification for potential issues of consistency and coordination with local codes, practices, permitting approvals will be:

- BRD/WGI (civil engineer)
- DWG (local landscape architect)
- Altura (registered accessibility specialist)
- LimnoTech (hydrologist)

A hard copy of the specifications will be printed for COA following the 65%, 90%, and 100% submissions.

In addition to drawings and specifications, the design team will be providing supplemental information in the form of technical memos, reports and manuals to be included in the Construction Documentation package. The consultants contributing to this effort are:

- Altura (registered accessibility specialist)
- ETM Associates (operations & maintenance)
 - Waller Creek Site Management Manual (version already started for Waterloo)
 - Note: In addition to the Creek Delta specific section, this includes an update to the main body submitted for Waterloo Park
- LimnoTech (hydrologist)
 - Basis of Design Memo
 - Floodplain memorandum
 - CLOMR (Conditional Letter of Map Revision)
- Tillett (lighting design)
 - Light fixture package
- Terracon (geotechnical engineer)
 - Geotechnical report (completed under previous phase plan)

Hard copies of all reports, memos, and manuals will be printed for COA following their respective submissions.

TASK 02: SCOPE OF SERVICES – COST ESTIMATION / VALUE ENGINEERING

The Design Team shall be provided with a reconciled cost estimate and an approved budget prior to the start of the CD Phase. In order to track the cost impact of post Design Development modified scope, the design team will develop pricing exhibits as necessary for the Construction Manager at Risk, SpawGlass, to cost estimate prior to the 65% submission. Vermeulens also will review and comment on the exhibits.

The period for cost estimate review and value engineering will occur within seven (7) weeks of the submission of the 65% Construction Documents to the Owner Team and Construction Manager at Risk (SpawGlass). This period can be broken out into the following timeframes:

- Owner Team Review Period / SpawGlass Estimate / Vermeulens Estimate
- Design Team Review and Estimate Reconciliation
- Value Engineering / Approval to Proceed

This task includes review of two (2) cost estimates at the 65% submissions: one to be provided by Vermeulens, the cost consultant, and one to be provided by SpawGlass. The MVVA team will participate in one (1) round of value engineering, during which a maximum of one (1) pricing scenario for a specific design alternative (e.g. CIP concrete vs. stone block retaining walls) and related systems (e.g. foundations, adjacent slope stabilization work, railings) will be provided. Items identified for value engineering will be incorporated into subsequent deliverables.

Additionally, a cost estimate will be provided at the same time as the submission of the 90% and 100% Construction Documents. In accordance with City of Austin project manual standards, Vermeulens will be preparing a bid form utilizing the City's standard template. Each bid item will correspond with an approved City standard or special specification. MVVA will support Vermeulens with the preparation of the bid form to ensure the correct specifications are being referenced and to provide assistance with quantity takeoffs.

Once design work is complete, the Design Team and Sponsor Team will work directly with the Contractor to price and value engineer the design solutions proposed in Addendum 6. These efforts will be covered in a separate Phase Plan for Confluence Construction.

TASK 03: SCOPE OF SERVICES – PERMITTING / SITES / O&M PLANNING / SIGNAGE

PERMITTING

BRD/WGI will be leading the COA site development "D" permit effort with support from DWG. ACI will be leading the United States Army Corps of Engineers (USACE) permitting effort. AEC, Terracon, and MVVA will be providing the supporting drawings for the COA permit. Additional sub-consultants are scoped as needed to provide supporting information to all permitting efforts.

City of Austin

- COA Permit (Site Development "D" Permit) – The permit will have two phases. Phase 1 is from Lady Bird Lake to the south face of the Cesar Chavez Bridge; Phase 2 is from the south face of the Cesar Chavez bridge to 4th Street
 - Austin Utility Location & Coordination Committee (AULCC)
 - Downtown Austin Project Coordination Zone (DAPCZ)
 - Quality Management Division (QMD)
 - Functional Assessment for Floodplain Health
 - Environmental Resources Inventory (ERI)

- All applicable jurisdictional requirements including but not limited to Utility Criteria Manual (UCM), Drainage Criteria Manual (DCM), Austin Fire Department (AFD), Environmental Criteria Manual (ECM)
- Variances are anticipated for this project and may include but not limited to the Land Use Development Code and Environmental Criteria Manual. This list will develop further as permitting is underway
- Public advocacy presentations included but not limited to COA Design Commission, COA Parks Board, COA Planning Commission Subcommittee, COA Planning Commission, and Downtown Austin Alliance
- License Agreements – Memorandum of Understanding / Declaration of Use will be required for any non-standard construction in the ROW
- Building Permit
 - Building Permits for bridges, structures, and walls >4' tall
 - Statement of Special Inspections (SSI)

State of Texas

- Texas Parks and Wildlife Plan and Permit Application (TPWD)
- Stormwater Pollution Prevention (SWPP)
- Texas Department of Licensing and Regulation (TDLR)

Federal

- United States Army Corps of Engineers (USACE) – NW27 and NW25
- Federal Emergency Management Agency (FEMA) Endangered Species Act Compliance Letter
- Texas Historical Commission (THC) Coordination
- Sect. 106 Compliance – Cultural Resources
 - Texas Antiquities Code (TAC)
- Conditional Letter of Map Revision (CLOMR)

SITES CERTIFICATION

Creek Delta will be undergoing SITES certification. DWG Landscape Architects will be the project administrator and primary point of contact helping to document and compile the credit requirements. The City of Austin Parks and Recreation Department (PARD) will be providing technical support and guidance. The SITES certification process will have a total of two submissions to GBCI. The first, scoped within the Phase Plan, will occur at the 90% CD deliverable – the other at the end of construction (substantial completion) and is not included here but will be included in a future construction phase plan for Creek Delta. The minimum certification level will be Silver.

O & M Planning

ETM will take the lead on further development of the Waller Creek Site Management Manual. Their scope includes: coordination of maintenance responsibility of the development of the Creek Delta site in the Construction Documentation phase; incorporation of SITES credit requirements; refinement of maintenance strategy, roles and responsibilities, maintenance facility needs, and access points; and the finalization of the O&M costs.

MVVA will integrate the O&M paths that have been scoped as part of Addendum Three into the construction documents and ensure that access is provided to all areas of the creek.

SIGNAGE

Occurring concurrently with Creek Delta CDs Bruce Mau Design (BMD) will be developing the signage design for the project. This work will build upon the Waller Creek Signage Master Plan and the Waterloo Park Signage design. BMD has three (3) trips planned as part of the Creek Delta scope. Two trips will occur at milestone points during CDs and one trip will occur during bidding. MVVA will take an active role in the oversight of the development of signage strategies as well as provide guidance for how signage is incorporated into the context of the Creek Delta and integrated into the proposed site furnishings. This will include reviews of signage and wayfinding strategies as they relate to the Creek Delta site including BMD deliverable review / comment. There are no MVVA deliverables associated with this scope.

The design team will make any necessary updates to the permit documents as it relates to the modifications outlined in the new scope for Task 1. This work will happen concurrent with the Construction services outlined in a separate Phase Plan.

TASK 04: SCOPE OF SERVICES – BIDDING AND NEGOTIATION

Participation in the bidding and negotiation process for the landscape portion of the project, including the following:

- Assistance with Project Manual Section 00400 Statement of Bidder's Experience.
- Preparation of addenda as required to clarify documents and to respond to contractor's inquiries about the drawings during bidding
- Pre-bid conferences will be attended by DWG (local landscape architect)

Bidding and negotiation for the Confluence Phase is already complete. The design scopes outlined in Task One above will be priced and negotiated directly with the Contractor as part of a separate Phase Plan for Confluence Construction. No bidding and negotiation services are outlined in Addendum 6.

EXHIBIT C: PROJECT BUDGET

ADDENDUM SIX TO THE CREEK DELTA CONSTRUCTION DOCUMENTS, PERMITTING & BIDDING PHASE PLAN			
<i>As of 02/01/23, see Pay Request #32</i>	Addendum Five Budget	Addendum Six Proposed Additional Funding	Addendum Six Total Budget
1. Construction Documents, Permitting & Bidding:			
Professional Service Fees (MVVA Team) -	\$ 3,677,837	\$ 360,665	\$ 4,038,502
Signage Consulting Fees (BMD)	\$ 90,253	--	\$ 90,253
Preconstruction Services Fees (SpawGlass)	\$ 20,000	--	\$ 20,000
Cost Consulting Fees (VCC)	\$ 95,100	--	\$ 95,100
McGray & McGray Surveying	\$ 63,574	--	\$ 63,574
Total CDs, Permitting & Bidding:	\$ 3,948,243	\$ 360,665	\$ 4,308,908
2. Allowances + Cost Overrun			
Permit Fee Allowance	\$ 247,720	--	\$ 247,720
Utility Provider Design Allowance	\$ 20,000	--	\$ 20,000
Survey Allowance	\$ 30,000	--	\$ 30,000
Trees Care Allowance	\$ 8,076	--	\$ 8,076
Geotechnical Boring Allowance	\$ -	--	\$ -
Soils Testing Allowance	\$ -	--	\$ -
Emerging Development Allowance	\$ 39,978	--	\$ 39,978
Stormwater Infrastructure Allowance	\$ 54,118	--	\$ 54,118
O+M and M&CC Paths Allowance	\$ -	--	\$ -
Allowances Total:	\$ 399,892	\$ -	\$ 399,892
Cost Overrun Reserve:	\$ 0.00	\$ -	\$ 0
SUMMARY			
1. Construction Documents, Permitting & Bidding	\$ 3,948,243	\$ 360,665	\$ 4,308,908
2. Allowances + Cost Overrun	\$ 399,892	\$ -	\$ 399,892
TOTAL:	\$ 4,348,135	\$ 360,665	\$ 4,708,800

Funding Splits	Addendum Five to the Creek Delta Construction Documents, Permitting & Bidding Phase Plan	Proposed Addendum Six	Revised Total	Amounts invoiced to date (through 02/03/23, Pay Request #32)			
				Construction Documents, Permitting & Bidding	Allowances & Cost Overrun Reserve	Total invoiced to date	Amount Remaining
PARL	\$ 560,720	\$ -	\$ 560,720	\$ 511,353	\$ 39,021	\$ 550,373	\$ 10,347
WPD	\$ 3,453,606	\$ -	\$ 3,453,606	\$ 3,061,642	\$ 332,004	\$ 3,393,646	\$ 59,961
