

## CTTC Working Group Membership

In accordance with the CTTC Annual Work Plan, the Community Technology & Telecommunications Commission relies upon (3) functioning Working Groups (WG) of (5) Commissioners or less to meet monthly and advance the outlined objectives of the Commission. With a structured topical focus used to divide the work of the Commission, these meetings allow Commissioners to receive private briefings from City staff and partners on important, but sensitive matters, while also allowing for discussion and deliberation on possible actions which would advance Commission objectives during our regularly scheduled public meetings.

- Digital Inclusion, Civic Engagement, and Strategic Policy Impact
- Knowledge, Information, and Data Stewardship
- Technology, Infrastructure, and Innovation

During our May 2023 Commission meeting (aka 2023 CTTC Work Plan Retreat) we will review the Working Group Chair reports, discuss restructuring the current Working Groups into Committees where possible, and set timelines for each functioning Working Group to report on all activities and findings. If possible please plan to attend in person on May 10th.

The current CTTC Working Group Membership (as of 4/12/2023) is as follows:
