Presentation Outline

- ACT Plan 101
- Process and Deliverable
- Public Engagement Process and Results
- Next Steps/Timeline
- Questions

What is the ACT Plan?

- Study of transportation connections to, from, and within downtown
- Multimodal in nature
- Reviews existing plans, including:
 - Great Streets Master Plan (2001)
 - Downtown Access and Mobility Plan (2002)
 - Downtown Austin Plan Transportation Framework Plan (2008)
 - Downtown Austin Plan (2011)
 - Downtown Austin Parking Strategy (2018)
 - Austin Strategic Mobility Plan (2019)

Goals

- Identify feasible options to accommodate recognized needs
- Coordinate with Project Connect, I-35 Capital Express Central, future growth
- Communicate to public the ultimate plans for right-of-way downtown
- Create implementation plan
- Develop community support for build out of surface-level projects

Why Now?

- Began in 2019 → Paused in 2020 → Restarted in early 2022
- Update with latest on:
 - I-35 Capital Express Central (including cap-and-stitch)
 - Project Connect
 - 2016/2020 Mobility Bond efforts
- Identify actionable items for:
 - City and public agencies
 - Input for ATP and TxDOT
 - DAA, partners, and stakeholders
- Understand funding required
- Action Item 87 in the ASMP

PROJECT | 5

SW Jefferson / Columbia / Madison

Project Highlights

Multiple bus lines use Columbia and Jefferson to connect from Goose Hollow to the Hawthorne Bridge. These streets are also critical east/west connections through downtown Portland for cars and trucks. The proposed project would improve transit reliability and speed by adding a Bus and Turn lane and bus stop improvements. Traditional bike lanes would also be provided.

Estimated Cost: \$3,000,000

Benefits

BUSINESS ACCESS & TRANSIT LANES

Transit priority BAT lanes on Jefferson and Columbia will allow the buses to access and get through downtown, relieving a major pinch point in the transit system.

CROSSING IMPROVEMENTS Pedestrian crossing improvements can improve safety and increase the likelihood that people driving will stop for people crossing the street.

BIKE LANE Moving the bike lane on Madison will eliminate weaving with the buses.

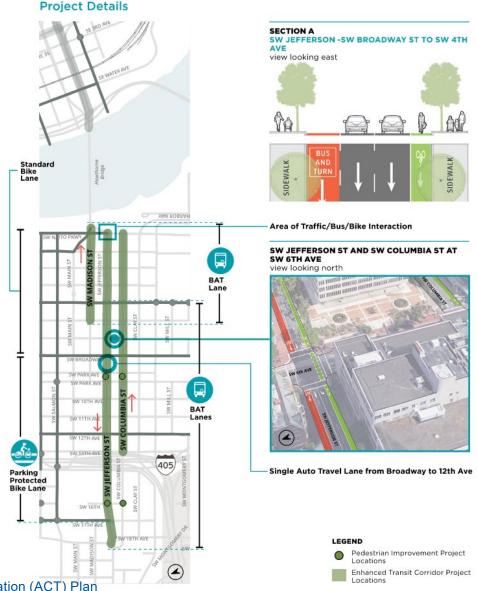

BIKEWAY Portions of the bikeway connections from the Hawthorne Bridge will be protected. Separating people biking on Madison from other vehicles will improve safety for all roadway users.

PEOPLE MOVING CAPACITY Changes in street design would increase the number of people that the street could accommodate by +74%.

Key Considerations

- To accommodate the BAT lane from 1st to 5th Avenues on SW Madison, all parking would be removed.
- To accommodate the BAT lane from 4th Avenue to Broadway on SW Jefferson, parking on the north side would be removed.
- · From 12th Avenue to Collins Circle, SW Jefferson could accommodate the protected bike lane, BAT lane and two travel lanes.
- To accommodate a BAT lane and bike lane on SW Columbia, some parking on the south side of the street would be removed. Most parking on the north side of SW Columbia would be retained.

- Focused on feasible design solutions that have broad community consensus
- Identify funding needs and other barriers to implementation
- Coordinate improvement phasing with Project Connect and I-35 Capital Express Central construction
- Identify quick wins and complements to other on-going mobility projects

Public Engagement

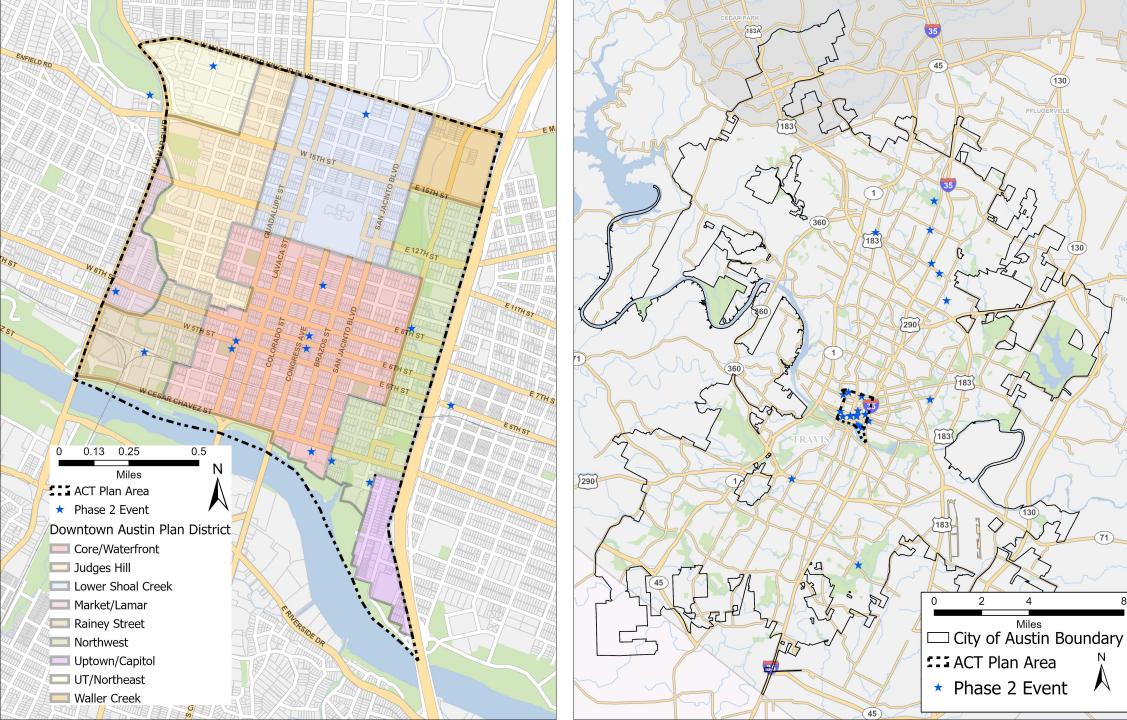

- Working with Downtown Austin Alliance
- More than 80 Downtown stakeholders
- Public events, pop-ups, and community meetings
- Integration with other Downtown focused projects and programs (e.g., Palm District, Project Connect, etc.)
- Geographic coverage of Downtown based on Downtown Austin Plan
- Identification of 20 different focus populations
