Event Date	
Event Type	
Contact	
Location	6 <sup>th</sup> St, Red River to Brazos
Meridian Contact	Caleb Paxton
Objectives	<ul style="list-style-type: none"><li>• Secure access points</li><li>• Protect pedestrian activities</li></ul>
Additional Considerations	

Creation Date

2/6/2023

# Guidance on utilizing the Meridian VSMP:

**Orientation:** Each deployment location is visualized as an aerial view represented in a compass north orientation  followed by a ground-level view represented from the perspective of on-coming traffic (unless otherwise noted). Barriers and beam gates will be deployed with the ramp facing in the direction of the potential threat.

Barrier placement is specifically designed to account for stopping distance as well as to take advantage of adjacent physical structures which will further support effective mitigation.

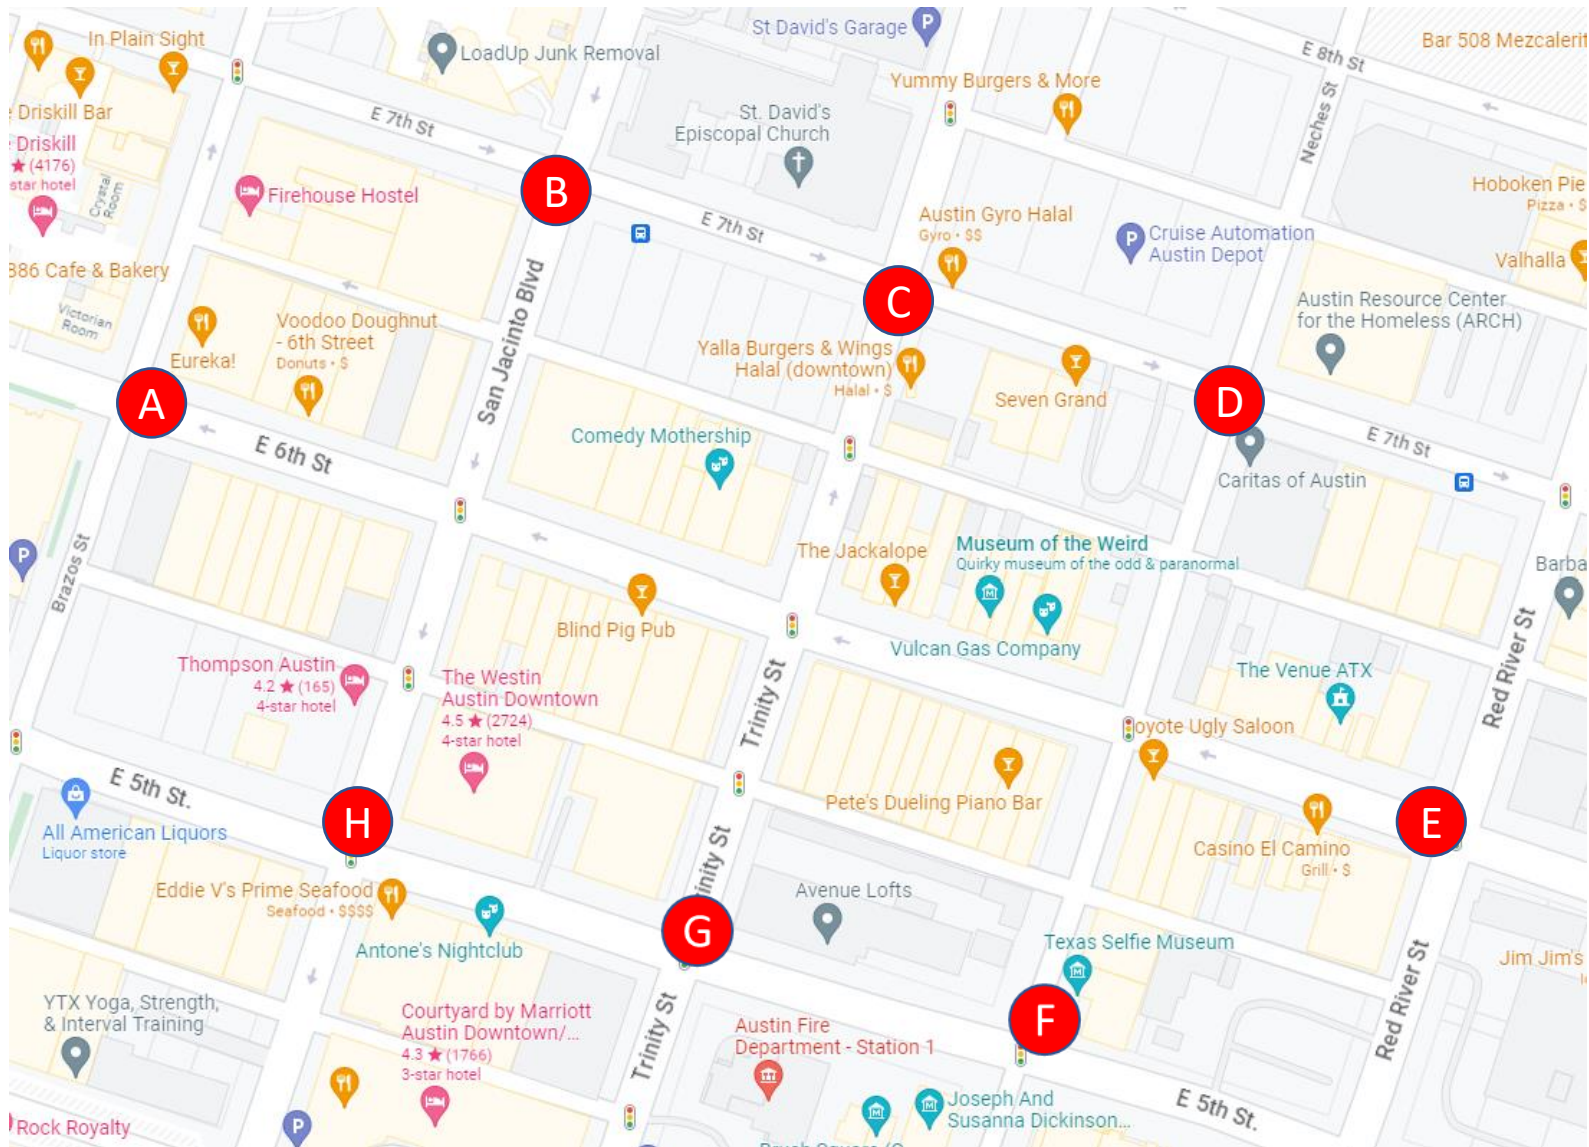

**Please Note:** This Assessment utilizes satellite imagery and street views provided by a third-Party and represents Meridian's estimate based upon incomplete knowledge and a lack of familiarity with the proposed closure locations. Meridian recommends an on-site examination by a Company Representative in order to provide a certified hostile vehicle mitigation plan and solutions.

The Assessment reflects the planned closures at the time of publishing and may be superseded by updated plans. Please ensure that updates are disseminated to the appropriate stakeholders.

This vehicle mitigation plan is created for internal use only by Meridian and its customers. Plans may not be distributed to outside agencies without permission.

# Deployment Locations

SUPPORT@MERIDIAN-BARRIER.COM

434.529.6903

WWW.MERIDIAN-BARRIER.COM

# Location : A 6<sup>th</sup> east of Brazos St

**Distance**  
40 Feet

## Equipment

7 – Barriers  
0 – 4' Cables  
0 – Cable Covers

**Note :** Deployment is subject to change based on site circumstances
