

**Motion Sheet**

I motion to amend this item as follows:

The City Manager is directed, to the extent feasible, to include the following elements in the proposed contract concerning the 1-year operation of the Marshalling Yard:

- To the extent allowable, out of total funds approved, incorporate funding structures that are based on the achievement of delineated goals for the following:
  - o Utilization of available beds as part of a daily bed management reporting system, and
  - o Successful housing outcomes, including diversion and rapid rehousing,
- Upon reaching 200-bed capacity, the vendor must request and receive authorization by the City to further expand bed capacity, which may be authorized up to 100 additional beds,
- During the final two months of this contract, the City and the vendor will ~~limit~~ prioritize any new referrals to clients who are likely to successfully achieve housing placement by the shelter closure date,
- Requirement that coordinated assessors be available onsite by the date the first client is referred to the shelter,
- Protections for gender safety and privacy, and
- Frequent transportation to and from the facility that is coordinated with transit connections.

The City Manager is further directed to return any unused funds to the original source of funding for this contract, with a prioritization to preserving any funds originally intended for permanent housing capital expanses. ~~re-allocate any unexpended funds approved for this contract to fund capital for permanent supportive housing.~~

The City Manager is further directed to provide quarterly reports to the Public Health Committee on the status of this shelter site.
