This item is on the consent agenda, but the public has never had a chance to have input. I got the back-up on Friday afternoon with Labor Day on Monday. It is very hard to read the back-up since it is 8 ½ by 11 architectural drawings. And I did not get the updated front elevation drawings for fence and landscaping.

Can I get the revised front elevation drawings right away.

I am requesting that this item No.7 be postponed until October 7.

I had no idea this issue was on the table or to be decided by the Landmark Commission, and I am easily available. The contractor cars and truck park on our property with our permission. My concern is the proposed wall/fence. It will change the historic context of the beautiful home that has been so carefully restored. I am not sure I agree with the commission input on this, but would like more information. If this was ever posted as a meeting earlier, neighbors were not given notice. This final step in the design impacts both the home and the neighborhood.
