September 13, 2023 - To be reviewed by the Water & Wastewater Commission

Additional Backup Information

The contract will provide replacement pumps, parts, and service for 22 Cornell pumps in lift stations to ensure raw sewage is pumped to a treatment plant for processing. This contract will reduce the amount of time to complete repairs along with reducing the amount of time to order new pumps as needed to avoid the possibility of a sanitary sewer overflow.

This is a new contract. The requested authorization amount was determined using a departmental estimate based on pricing and forecasted usage.

The contractor is the exclusive authorized distributor of Cornell pumps for sale of products, parts, and services in Texas.

If the city is unable to secure a contract, repairs for failed pumps could be delayed increasing the likelihood of a Sanitary Sewage Overflow which is reportable to the Texas Commission on Environmental Quality and can lead to environmental and health issues for the citizens of the City of Austin.
