Additional Backup Information:

City Council adopted an ordinance on September 30, 2021, to amend City Code Chapter 25-9 (Water and Wastewater) establishing water benchmarking, expanding Reclaimed Water Connection requirements, and adding Onsite Water Reuse requirements. The ordinance also required the City Manager to provide City Council with a report and possible actions for consideration concerning the impact of the requirements for an Onsite Water Reuse System and the expansion of the current Reclaimed Water Connection mandate on housing affordability by September 28, 2023. The required report was provided to City Council on October 25, 2023, along with recommendations for additional code amendments to address impacts to housing affordability from the new requirements. City Council adopted ordinances in November 2023 to defer the effective dates for Reclaimed Water Connection and Onsite Water Reuse requirements for large development projects until April 1, 2024 to allow more time for consideration of the ordinance changes and to establish exemptions to the requirements for certain affordable housing projects.
