Council Committee, Boards and Commission Action:

February 14, 2024 – To be reviewed by the Water and Wastewater Commission.

February 20, 2024 – To be reviewed by the Resource Management Commission.

Additional Backup Information:

This action is one of four proposed Council items related to implementing Austin Water's new "GoPurple Program" to accelerate the expansion of Austin's centralized reclaimed system and onsite reuse. These are essential strategies in Austin's Water Forward plan to meet long-range needs for a secure and sustainable water future.

The requested authorization will allow Austin Water (AW) to continue to administer the Pilot Incentive Program for Onsite Water Reuse Systems and Reclaimed Water system connections, without additional Council approval, and issue reservations of incentives to commercial and multi-family customers during Fiscal Year 2023-2024 for the installation of alternative Onsite Water Reuse Systems and Reclaimed Water system connections up to a total aggregate amount of \$5,600,000 and not to exceed \$500,000 for each project. The incentives will be paid out over multiple years if projects can meet program guidelines and deadlines for the design, construction, and operation of the Onsite Water Reuse Systems or connection to the City's Reclaimed Water System.

On April 22, 2021, Council authorized the initial Pilot Incentive Program for Onsite Water Reuse Systems for Fiscal Year 2020-2021. It has since been reauthorized annually, for subsequent fiscal years. The purpose of this enhanced incentive program is to help promote affordable development and gather additional information on the design, engineering, installation, operation, maintenance, cost, permitting and application of the regulatory guidance needed for the successful implementation of these onsite systems and reclaimed water system connections.

As per current practice, AW staff will continue to provide the requested quarterly reports to the Resource Management Commission that summarizes AW's water conservation rebate and other incentive programs, including incentives for the installation of alternative water reuse systems for large new commercial and multi-family development under this program. For all projects that will exceed \$72,000 in the incentive amount, the reports will also include measures installed, expected savings and potable water offsets, and other relevant data.
