

THE MILLENNIUM

VISION & MISSION

Mission

The Millennium was constructed in 1999 to provide a safe space for recreational and cultural activities for youth and families of the East Austin community. Over time more than 5,000 persons have passed through its doors each month. The venue has been home to sports competitions, film festivals, business expos and job fairs, summer camp, religious celebrations, a local polling center, and hundreds of public and private functions and events.

Vision

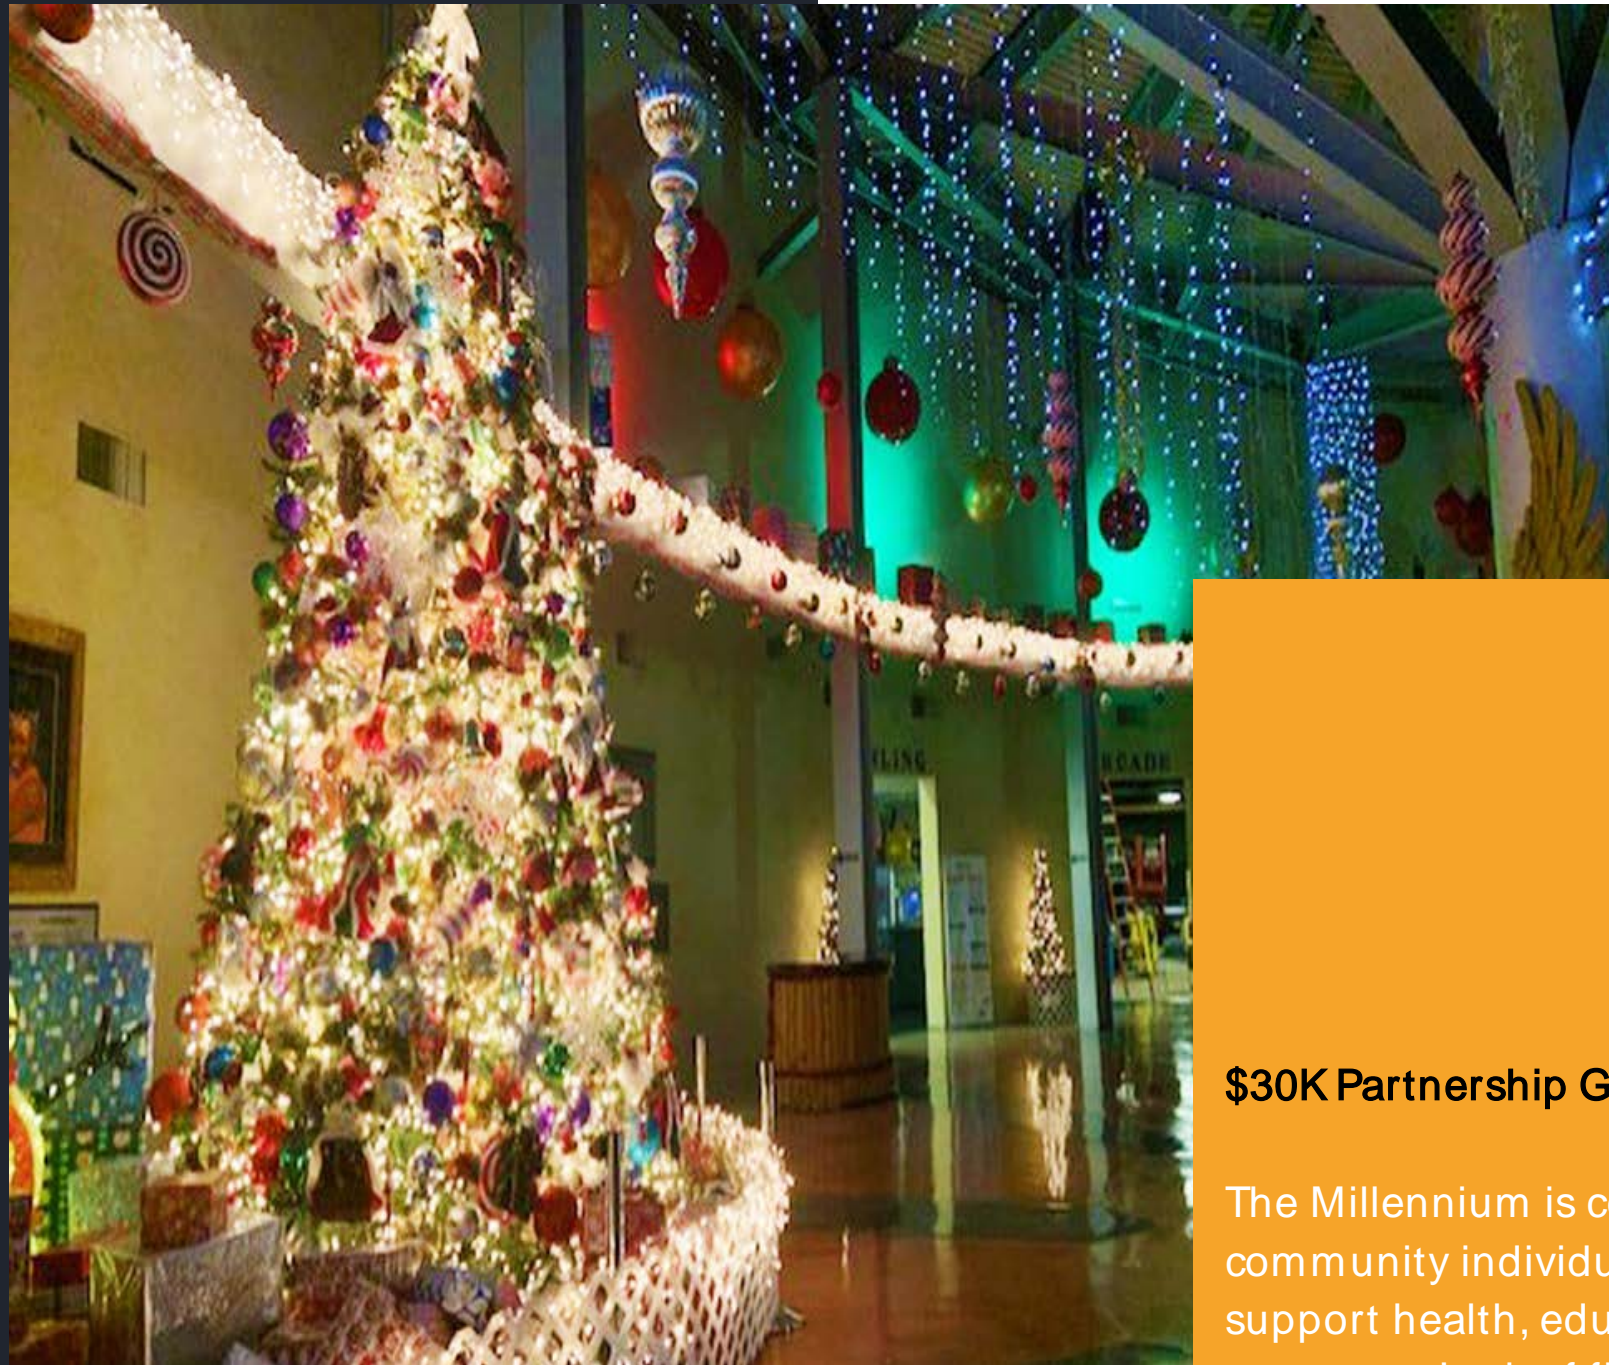

While the original use of the Millennium remains consistent, the facility will seek to expand its programming and resource base in order to further serve the needs of an ever- growing community. Our vision moving forward is based on a stronger integration of economic initiatives, including corporate partnerships, fundraising, and creative resource development will be the key to long term sustainability.

Community Engagement

- Affordable recreational facilities for bowling, roller skating, performing Arts and cinema
- Modern, well kept amenities
- A home for community resources and information (Town Hall Meetings, Voting)
Targeted summer programming for youth
- Purposeful spaces for meetings and programming

OUR CURRENT PROJECT IN 2024

\$30K Partnership Grants

The Millennium is continually approached by community individuals and organizations to support health, educational, and cultural programs. Lack of financial resources often hinders the development of these initiatives. We request \$30K to be dedicated to partnership grant to support requests of this type (including space hire, catering, AV).

\$120K Bowling Center

Bowling equipment at Millennium is more than 50 years old having been received from Bergstrom AFB. It is in need of major upgrades and repair in order to compete with market competitors. Total renovation cost is \$400K. A contribution of \$120K would allow us to complete Phase I, adding lane lighting and bumpers to each of the 16 lanes.
