Council Committee, Boards and Commission Action:

Planning Commission: April 23, 2024

Additional Backup Information:

On November 1, 2007, the Austin City Council adopted the North Burnet/Gateway Master Plan as an amendment to the Austin Tomorrow Comprehensive Plan and created the North Burnet/Gateway Overlay District to implement the land use recommendations of the plan. The planning area comprises approximately 2,300 acres in north central Austin that is well-served by transit including a Transit-Oriented Development nodes along the Capital Metro commuter rail line which began service in March 2010.

The North Burnet/Gateway Plan presents a long-term vision for the area to continue to redevelop the existing low density, auto-oriented commercial, warehouse and industrial uses into a higher density urban mixed-use neighborhood that is more pedestrian- and bicycle-friendly and takes advantage of the links to commuter rail transit and the area's key position within Austin's Urban Core. The intent is to allow a significant number of new residents to move into the area to accommodate some of the expected population growth in the region and to provide the associated community and neighborhood services, parks, and public space important to making a great neighborhood. These may include restaurants, small local businesses, retailers, and multi-story, mixed use buildings with direct pedestrian access to public transit. An important element of the plan is to enhance development design quality and create great places where people can live, work, shop, interact and recreate within a walking distance of one another.
