Needs Assessment on Service Needs and Barriers for those in-care and out of care

Year 2 Activity, Literature Review

Q2 Please Rank the suggested literature review topics from 1=most interested

Answered: 2   Skipped: 0

	1 (MOST INTERESTED)	2	3	4	5 (LEAST INTERESTED)	TOTAL	SCORE
Understanding the impact of changing urban neighborhoods, and rising housing cost to HIV healthcare access for PLWH	50.00% 1	50.00% 1	0.00% 0	0.00% 0	0.00% 0	2	4.50
Understanding the impact of cost/knowledge barriers to oral healthcare access for PLWH	50.00% 1	0.00% 0	0.00% 0	50.00% 1	0.00% 0	2	3.50
Understanding the impact and attitudes surrounding telemedicine access related to HIV healthcare	0.00% 0	50.00% 1	50.00% 1	0.00% 0	0.00% 0	2	3.50
Understanding the barriers to healthcare and insurance access	0.00% 0	0.00% 0	50.00% 1	0.00% 0	50.00% 1	2	2.00
Understanding the impact of COVID-19 on HIV Services	0.00% 0	0.00% 0	0.00% 0	50.00% 1	50.00% 1	2	1.50

<u>From responses of 2/4 FASPNA members, Understanding the impact of rising housing costs on HIV Health Care access is the most interested topic by having the highest score.</u> Access the survey here: or visit surveymonkey.com/r/HIVPCY2NA

The populations of interest are Black MSMs, Latinx MSMs, and **Black WSMs** from ages 14-34. Limited information related to transgender and gender diverse persons may be available depending on how various literature define gender.

What does FASPNA think of these suggested topics and populations?

The purpose of the literature review is to serve as a "special study" by compiling existing literature related to identified barriers and needs for PLWH in lieu of resurveying, to further explore a key identified issues from the survey administered in 2022. The focus will be for those who are lost to care or out of care compared to those in care, if possible.

 We hope to use the information compiled to be able to carry out focus groups that will begin planning in April to better understand factors that would help return PLWH to care and keep persons in care.

Access to the system of care analysis and provider capacity and capabilities report is available on request.
