

Council Member Paige Ellis

August 29, 2024 Council Meeting

Item 186 & 187: 5725 W US 290 Eastbound

Motion Sheet

I move to approve the following direction:

The City Manager is directed to evaluate and implement transportation safety solutions surrounding the 5725 W US 290 Eastbound development on Westcreek Drive and Old Fredericksburg Road. In particular, the Manager is directed to evaluate for implementation:

- Speed management on Westcreek Drive, including traffic calming treatments;
- Installation of Pedestrian Hybrid Beacons along Westcreek Drive;
- Addition of Westcreek Drive to the Roadway Capacity Plan and the use of Street Impact Fees for improvements, such as roundabouts;
- Increased parking enforcement;
- Modified no-parking signage, curb bulb-outs, or other remedies to increase pedestrian visibility at crosswalks and shorten crossing distances;
- Installation of concrete curbs or other barriers to prevent illegal parking;
- Protected bicycle infrastructure;
- Additional school crossing guard support; and
- Any other solutions to increase transportation safety.

To identify the most critical transportation safety hazards in this area and evaluate possible solutions, the City Manager is directed to consult with Westcreek Neighborhood residents. If possible, the City Manager shall also consult with the Patton Elementary School community, Small Middle School community, and Lone Star Soccer families that use the adjacent school fields.
