# Our mission is ultimately about the people we serve

## Community Outreach

### How We Connected

Started in **August 2023**, focusing on gathering high-level priorities

**5** stakeholder workshops with a broad cross-section of **40** diverse organizations

**7,512** survey participants

Dedicated webpage

Partnered with leading industry experts

Collaborated with the Electric Utility Commission and Austin City Council

### Top Priorities:

**Reliability**

**Affordability**

**Environmental Sustainability**

**Energy Equity**

# Powering Austin's Clean Energy Future

DRAFT

AUSTIN ENERGY RESOURCE, GENERATION  
AND CLIMATE PROTECTION PLAN TO 2035

# Managing Our “Toolkit”

# Prioritize Customer Energy Solutions

- Lead with Energy Efficiency
- Lead with Demand Response
- Move from Megawatt Reduction to Greenhouse Gas Avoidance
- Promote Beneficial Electrification
- Incentivize Customer-Sited Batteries
- Promote Innovative Local Solar Solutions
- Improve Customer Interconnection Experience

# Develop Local Solutions

- Prioritize Customer Energy Solutions
- Increase Transmission Import Capacity
- Promote Local Utility-Scale Solar
- Include Local Utility-Scale Batteries
- Avoid Retiring Local Generation Prematurely
- Pursue Additional, More Efficient Natural Gas Peaker Units
- Develop Emissions Guardrails for All Peakers
- Incorporate Equity into Siting Considerations
- Protect Local Air Quality
- Focus Customer Programs to Support Neighborhoods
- Maintain Black Start Utility Status

# Continue Our Commitment to Decarbonization

- Carbon Free as a Percentage of Load
- Exit Coal and Reaffirm REACH – *Reduce Emissions Affordably for Climate Health*
- Wind and Solar Outside of Austin Energy's Service Area
- Geothermal, Nuclear and Other Carbon-Free Technologies

# Further Our Culture of Innovation

- Research and Development Partnerships
- Grant and Other Funding Opportunities
- Solar for All
- Solar Standard Offer
- Pilot Geothermal Generation
- Enhance "Virtual Power Plant" Programs and Set Up a Distributed Energy Resources Management System (DERMS)
- Support Vehicle-to-X Opportunities
- Explore Advanced Nuclear Technologies
- Emerging Carbon Capture Technologies

## Building a Bridge to Our Clean Energy Future

Based on intensive stakeholder engagement, modeling, and research, the 2035 Plan puts forward a suite of solutions and technologies to drive these outcomes:

**Cleanest energy portfolio in Texas**

**Industry-leading customer energy solutions**

**Promotes reliability, affordability and sustainability**

**Protects our most vulnerable**

**Resilient to extreme weather**

**Flexible and innovative**

**Built to adapt to changing conditions**

**Community-informed plan**

**Customer Driven.  
Community Focused.<sup>SM</sup>**
