

Item No. 37
Amendment 2
Council Member Velásquez
March 6, 2025
Motion Sheet

Proposed Amendment: Watershed Protection Department Reporting on Process and Drainage Criteria Manual Changes

I move to include the following direction:

- The City Manager is directed to have the Watershed Protection Department report back to the Housing & Planning Committee on June 12, 2025, on the process and drainage criteria manual changes that were committed to in the staff report.

Rationale:

- Provides an update on the implementation of previously committed drainage and stormwater management process improvements outlined in Item 37's posted [Staff Report](#).
- Ensures Council has visibility into progress and any outstanding challenges in refining Watershed criteria for small-scale residential development.
- Aligns housing and infrastructure planning to support sustainable residential infill growth.
