Dear Planning Commissoiners,

I'm writing in support of Item 6, NPA-2026-0022.01.SH (Rowen Vale).

One of the most important aspects of this proposal is its location in a high-opportunity area with strong access to jobs, transit, education, and daily needs. These are exactly the places where more Affordable housing is needed. And candidly, these are also the places where proposals like this often draw the most resistance from well-resourced neighbors opposed to change...

It's disappointing to see the project has already reduced its number of homes in response to feedback, yet continues to face opposition. This underscores the broader challenge we face as a city.

You will likely hear requests to delay, postpone, or further dilute this proposal. I hope you'll stay the course and act on it, especially given what looks to be an already packed agenda on the 28th.

I appreciate staff's recommendation and respectfully ask for your support

Thank you for your service and consideration,
Greg

Subject: 206 E. Annie St.

Mr. Tomko & Ms. Meredith,

I am the Chair of Planning & Zoning for SRCC. I have been working with many neighbors in the Travis Heights area concerning the development of the Church at 206 E. Annie St. I first met with the developer in mid-January 2026 to discuss this development. Then again at the home of one of the neighbors in February, then again at our in person meeting for SRCC. And then a couple more at the Church site. The last discussion I had with them, we had them scheduled for our March meeting. They canceled that one and moved it to our April meeting.

I am very unhappy with the proposed development. It is too big for the lot, causing problems with queuing for the PreK, parking, and mobility that O-SDA hasn't yet resolved. Annie St is already a traffic nightmare.

Travis Heights/Fairview Park is a federally protected historical neighborhood. Building a 5 story building with an active business is totally anathema to the 1 and 2 story bungalows with multiple restored homes.

TH has some of the most subsidized housing in Austin. We want to be open, receptive and to help those who need housing, but this is not appropriate or in line with the neighborhood.

Thank you for reading this. We hope this project will be rejected.

Good afternoon, Maureen and Jonathan

Thank you for giving us an avenue of discourse regarding the proposed housing development at the 200 block of Annie Street in Travis Heights; We've had a little bit of time to digest what is about to happen within our neighborhood. The intention behind this project is of good nature and the majority of our smart, open-minded and engaged neighbors have no beef with that. What does shake us to the core is the immense scale pared with institutional design, mixed use of materials and color ways that don't align with the space, the vernacular housing stock that surrounds it and greater neighborhood that this project sits right in the middle of.

If this is our reality, the wish of the City for the good of our community, I think it is reasonable to expect that those of us that are to absorb and accept this project and it's new inhabitants, should also have a voice in how this project presents itself for the long term.

Kind Regards,

I respectfully request that Zoning and Planning staff recommendations to the Planning Commission and Planning Commission action be postponed until key information needed to evaluate the O-SDA request for zoning and Neighborhood Plan changes for the property at 206, 206 ½ and 1710 Brackenridge Street is available. Important questions, several of which were raised, but not answered, at the February 28, 2026, 6 PM Zoom public meeting, are outlined below:

- 1) **Site Plan documenting 65% impervious cover.** Because the proposed O-SDA (Rowan Vale) project includes a Pre-K, City of Austin Ordinance No. 20160623-090¹ applies to this proposal. To comply with ordinance requirements, the educational facility height is limited to 30' and impervious cover is limited to 65%.

The developer is aware that this ordinance applies. O-SDA changed its site plan from a single 5-story building to a two-building complex, with the smaller 3-story building housing the school. O-SDA also has pledged to reduce impervious cover to a compliant 65% (which also would be consistent with a zoning baseline of MF3). Yet, the request for rezoning and the request for amendment to the Greater South River City Neighborhood Plan remain a jump from Civic/SF to MF4.

The only detailed site plan available is part of the O-SDA final submission for 9% Federal Tax Credits to the Texas Department of Housing and Community Affairs (TDHCA).² That Architectural Site Plan states that Impervious Cover exceeds 65% without including any additional impervious cover required for a fenced playground (see playground construction discussion below). Without a new, complete site plan showing impervious cover of 65% or less and thus a change to MF3 Zoning, the project is not in compliance with Ordinance No. 20160623-090 and should not be approved for rezoning.

In addition, the site plan and impervious cover calculations should include the playground that is part of the school and an integral part of the project. Per an O-SDA

¹ <https://services.austintexas.gov/edims/document.cfm?id=257543>

² <https://www.tdhca.state.tx.us/multifamily/docs/imaged/2026-9-challenges/26169.pdf>

statement at a neighborhood meeting, this playground will be used by project residents outside of school hours.³ As O-SDA has also stated at community meetings with the surrounding neighborhood, it will comply with applicable ADA requirements and playground safety guidelines. The Texas Department of State Health Services (TDSHS) Health and Safety Code 756.061 sets standards for playground equipment at schools and child care facilities and all playground equipment purchased with public funds must comply with the US Consumer Product Safety Commission's CPSC) Handbook for Public Play Ground Safety. AISD follows the CPSC standards as does the City of Austin.⁴⁵

Compliance with these standards has significant implications for impervious cover and for impact on the Critical Root Zone of the Heritage Trees on the property. Examples include:

- 1) Playground fencing and gates, which must meet strict safety standards, must be securely anchored, presumably with concrete footings that contribute to impervious cover. Playground equipment would be similarly anchored.
- 2) Shock-absorbing, protective surfacing is recommended under and around elevated playground equipment (typically a 6' use zone) for which a child is unable to maintain contact with the ground during play. This can include solid surface (e.g. rubber mats) or ASTM⁶ tested loose fill that should be maintained at the appropriate depth (e.g. with concreted borders to avoid washing out). These shock absorbing materials thus can increase impervious cover.
- 3) Access to the playground, its equipment and amenities such as picnic tables must be ADA compliant, again potentially affecting impervious cover.

2) Infrastructure Impact

There have been multiple water line breaks in the 1700 block of Brackenridge St in recent months, with repairs sometimes requiring cutting off water to our homes. This is just one example of the very aged infrastructure in the neighborhood surrounding the proposed Rowan Vale project. Will the city be upgrading the existing, aging water lines before the project is built? A similar project, in an area with newer infrastructure, caused multiple water line breaks because of the increased water pressure needed by the multi-story complex. What infrastructure development is necessary/planned to provide adequate utilities for Rowan Vale and other intensive development planned for South Congress?

³ AISD allows community use of playground outside of school hours subject to certain restrictions, e.g. no pets, no alcohol or tobacco,

⁴ <https://www.dshs.texas.gov/public-health-sanitation-program/playground-safety-public-health-sanitation-program>

⁵ https://www.cpsc.gov/s3fs-public/325_PublicPlaygroundSafetyHandbook2025_7-30-25_1.pdf

⁶ <https://www.astm.org>

3) Greater South River City Neighborhood Plan

O-SDA notified the Greater South River City Contact Team (NPCT) after the March 23 meeting. The roles and responsibilities of the NPCT include taking positions on proposed plan amendments.⁷ Will the NPCT be given a reasonable time to evaluate the proposed amendment and its impact on the overall Neighborhood Plan? O-SDA, at its request, is on the agenda for the April 17 SRCC meeting. That will be a key resource for the NPCT.

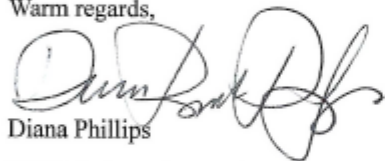

4) Impact on Future Congress Avenue Development

What impact will the school being on the property have on the redevelopment of nearby property on Congress Avenue, i.e. liquor licenses for new businesses? For example, Torchy's Tacos was denied a liquor license because it was so close to Lively Middle School.

One of our neighborhood's key concerns is that this project is "a good square peg in an unworkable round hole." Answers to these questions will help address our concerns.

Thank you in advance for your consideration. Please let me know if you have any questions.

Warm regards,

Diana Phillips

Subject: Re: Rowen Vale | SF-5 promotes affordability while ensuring compatibility

Hi Grant,

The neighborhood can certainly request a postponement if they would like to for whatever reason.

Detailed transportation issues within the bounds of the site will be examined in greater detail during the site plan phase which occurs after the rezoning process.

Staff can not speculate from TDHCA's rankings whether a development will or will not be funded. We have a rezoning request on the table that we are evaluating for a staff recommendation.

I hope this helps,

Subject: Re: Rowen Vale | SF-5 promotes affordability while ensuring compatibility

Jonathan - It appears there are significant Pre-K queuing issues, which apparently may prevent the Rowen Vale project from receiving TDHCA funds and could impair the entire project's economic feasibility. (The project has the lowest score of all applications in Region 7, but is ranked first solely because of its intended Pre-K, as I understand it.)

Affordable housing is a major pillar behind why this proposed rezoning has some merit. If you knew in advance that this project would not be built, I imagine that would change the calculus on rezoning.

Is clarifying these issues an unreasonable basis for delaying a staff recommendation and planning commission meeting?

Best,

Grant

Subject: Rowan Vale project on Annie

Thanks for your time Maureen concerning my objections to the Rowan Vale project on Annie across the street from my property at 1711 Brackenridge. There is no need for me to articulate the many objections as to why this is such a terrible idea. But I would like for your office to include my voice along with my many other neighbors in our attempt to stop the insanity of this project proceeding further and deny the request for rezoning as presented by Rowan Vale.

Thank you for your time and patience on the phone and I just hope that the employees of city hall simple do their job and put and end to this proposal as presented by Rowan Vale.

Thanks and Always the Best

Jim Vincent

Martha,

Please see comments responsive to your letter below.

1. Site Plan Documenting 65% Impervious Cover

A site plan is not required for a rezoning to take place. The impervious cover would be determined during the site planning process which occurs after rezoning. The applicant has stated that they intend to comply with Ordinance No. 20160623-090.

2. Infrastructure Impact

The site is within 500 feet of an Imagine Austin Corridor. Imagine Austin the City's Council adopted Comprehensive 30-year Plan aims to direct growth in a compact and connected manner with more intense infrastructure investments along more dense corridors and within centers. This rezoning request is in line with Imagine Austin.

3. Greater South River City Neighborhood Plan

This case was submitted on February 6, 2026 and a notice of filing was mailed out on February 24, 2026. A city facilitated meeting with the neighborhood took place on March 23, 2026. The neighborhood can certainly request a postponement if they would like to do,

but only the Planning Commission or City Council can grant a neighborhood postponement request, not staff.

4. Impact on Future Congress Avenue Development

State and Local Statutes limiting alcohol sales would continue to apply.

Subject: Re: Re: request for more information regarding Rowan Vale Project and Zoning

Dear Jonathan,

Thank you for copying me on your response to Diana Phillips's letter concerning the proposed Rowan Vale development on East Annie. I want to respond to one of your points.

I recognize that a site plan is not required for re-zoning to take place. But, we are asking questions about impervious cover, about parking and Pre-K queuing, and other such matters because O-SDA is trying to put too big a structure on too small a lot, and everytime they claim to fix one problem, they create another. For example, on the most recent site plan we have received from them. they are not yet down to 65% impervious cover, although they are close. But this new site plan shows that OSDA hopes to receive parking spots on

the City's streets (both Nickerson and Brackenridge), which they were told they could not do by TWP, and it is a site plan that does not mark the existing utility poles in the alley that supply electricity to our homes on East Milton -- poles that will be within 5 ft from of their building, which is too close according to code.

It seems to me that if the purpose of the zoning request is to build a particular building by a particular developer, there is some need to figure out whether the building can be built to fit the requirements of the Zoning regulations they have requested. O-SDA is currently making lots of promises -- about design, about the Pre-K, about Parking and Mobility, about impervious cover, about keeping the building to 50' high -- , and it is unclear that they can do all that they have promised, The lot is too small for the building they want to create, and no promises will fix that.

Also, re the Transportation corridor, I assume you realize that, given Project Connect's recent plans for lightrail stops along S; Congress, one will be at Oltorf St (some .7 miles from the development), and the other, the "SoCo" stop, will be .5 miles in the other direction.

thanks for your efforts,

best

Martha Newman

Subject: Rowan Vale — traffic, safety, and compatibility considerations

Jonathan,

I hope you're doing well. My name is Sean Ransenberg, and I'm writing on behalf of my wife, Cecelia Croman, and our household at 1601 Brackenridge Street, Austin, Texas 78704. Our

home is within 500 feet of the proposed Rowan Vale project, so we experience firsthand how this part of the neighborhood functions day-to-day.

Thank you for your thoughtful engagement with the neighborhood on this case. We know staff has to weigh a number of competing considerations, and we appreciate the care that you and your team bring to that work. Our hope is to share a few practical considerations that may be helpful as staff evaluates this application using the standard framework of compatibility, transition, traffic operations, and safety.

We support affordability as a policy goal. Our concern is whether this particular project, at this particular intensity, is appropriate for this particular lot. In our view, it is not. For that reason, we respectfully ask that staff either recommend against the rezoning or, at a minimum, identify SF-5 as the more compatible alternative.

Traffic Operations and Safety

Traffic operations and safety are our primary concerns. Travis Heights relies on a limited number of streets that function as neighborhood “lifelines,” and those routes are already operating under strain.

The project would add:

- 64 residential units
- An on-site Pre-K
- Only 47 parking spaces

This combination is likely to push parking demand, circulation, and queuing onto Nickerson, Brackenridge, Annie, and nearby streets.

Key concerns:

- Pre-K pickup and drop-off queuing back onto Annie
- Existing weekend and school traffic already creating peak congestion
- Known speeding and cut-through traffic amplifying risk
- Proposed egress onto Nickerson raising visibility and safety concerns

These concerns become more significant when considered alongside near-term infrastructure work, including the South 1st Street Reclaimed Water Main Project. If key routes such as Monroe experience intermittent disruption over the next two years while this

project adds additional congestion and queuing pressure, that combination could materially impact traffic operations, emergency access, and overall neighborhood safety.

While the fire department does not formally weigh in on zoning matters, these conditions highlight broader concerns about how well these streets accommodate emergency vehicles today. Taken together, this raises real questions around access, response times, and reliability of key routes.

We would encourage staff to take a close look at:

- Whether parking demand and Pre-K activity can realistically be contained on-site
- Whether the proposed Nickerson egress is safe under current conditions
- Whether the level of intensity is appropriate given the neighborhood's limited access routes and near-term infrastructure impacts

Compatibility and Transition

From a compatibility and transition standpoint, the nearby MF-3 properties do not appear to be meaningful comparisons for this site. Those parcels are generally adjacent to other multifamily zoning or the park and therefore maintain some level of transition. This lot does not. It is surrounded by SF-3, which makes the compatibility question more significant here.

It also appears important to evaluate the actual intensity being proposed, rather than viewing this solely as a base MF-3 request. A 64-unit, 5-story project with an on-site Pre-K on roughly 0.9 acres is much closer to MF-6 intensity than a typical MF-3 project. Even base MF-3 would be difficult to reconcile with the surrounding SF-3 context, and the actual proposal goes well beyond that.

In our view, the project is not built in proportion to surrounding homes, does not encourage compatibility, and does not provide an adequate transition.

A Path Forward

More broadly, this is not a choice between affordable housing and no affordable housing. Affordable housing can be pursued here in a way that also respects compatibility.

If staff believes some zoning change is warranted, SF-5 would allow additional housing while still providing a more appropriate transition from surrounding single-family uses. If

the applicant’s economics only work at a much higher intensity, we do not believe that should drive staff’s recommendation.

The compatibility and transition reasoning staff used in the Heflin Housing case seems directly relevant here as well.

For these reasons, we respectfully ask that staff either recommend against the rezoning or, at a minimum, provide an alternative recommendation of SF-5.

Thank you again for your time, your consideration, and the work you are doing on this case.

Subject: Neighborhood Planning Case NPA-2026-0022.01.SH (Rowen Vale)
Hi Ms. Meredith,

Thank you for putting together the Virtual Community Meeting on the subject Neighborhood Plan changes.

As one of the nearest neighbors to the site, I wanted to take this opportunity to write in opposition to the proposal. I've attached a letter to that effect.

My apologies in advance for its length (if brevity is the soul of wit, I must be chronically unfunny).

I'll try and give you a call tomorrow or next week so you can put a voice to the name, and I promise to be less verbose on the phone.

Thanks in advance,

Shiva

Re: Neighborhood Planning Case # NPA-2026-0022.01.SH
Zoning Case # C14-2026-0010.SH
Project Name: Rowen Vale

Dear Mr. Tomko and Ms. Meredith,

I'm writing in opposition to proposed changes to the *Greater South River City Combined Neighborhood Plan*, and 206 E Annie St. et al. zoning.

As context, I've lived in Austin for nearly two decades. For the last 11 years, I've owned and resided at 1803 Nickerson St., only 100 feet from the subject site. This is the first time I've written to the City on any matter, and I apologize in advance for the length of this letter.

Our neighborhood welcomes all without discrimination and regardless of socioeconomic status. I have applauded efforts to promote a compact and connected city, including in my own backyard, through reducing lot size minimums, increasing the supply of "missing middle" housing, and promoting transit and larger-scale development along South Congress Ave.

However, I believe the proposed changes are inconsistent with the City's goals and public interest:

1. The proposed changes do not allow for adequate transitions between adjacent land uses.
2. The proposed changes do not align with the City's Growth Concept Map when all relevant factors are considered.
3. The proposed changes do not protect the historic character of the neighborhood.
4. The proposed changes do not meet the neighborhood's urban design guidelines.
5. The proposed changes exacerbate existing parking and traffic issues.

The proposed changes do not allow for adequate transitions between adjacent land uses.

The first goal of all planning and zoning laws should be to ensure harmonious transitions between land uses.

Page 1 of 4

Along with the *GSRCCNP*, the City's comprehensive plan, *Imagine Austin*, is a guiding document for planning and zoning decisions. Per *Imagine Austin* (page A-27), "The Austin City Charter mandates that zoning regulations be in alignment with the comprehensive plan."

Imagine Austin policy LUT P4 guides the City to "... recognize that different neighborhoods have different characteristics, and infill and new development should be sensitive to the predominant character of these communities." The *GSRCCNP* echoes a similar sentiment: "... respect the established neighborhood character and natural assets."

The subject site sits in the interior of a single-family neighborhood. Many of the surrounding homes are roughly a century old, on small lots, and connected by narrow streets that were typical of the time. Both *Imagine Austin* and the *GSRCCNP* require changes to be compatible with that character.

The proposed change asks for MF-3 zoning. However, given the Affordability Unlocked density bonus, the applicant proposes to build at a density of roughly 71 units per acre—more like MF-6 zoning—including a pre-K school. It is impossible to transition from a 1930s-era, 1600 square foot, single-story home like my own, to a five-story MF-6-like development next door, in a way that is sensitive to the character of our community.

The City has consistently recognized the need for appropriate transitions in previous planning and zoning change cases. For example, in Heflin Housing (C14-2023-0117), City staff recommended denying MF-3-NP for a SMART Housing project on 0.49 acres: "Zoning changes should promote compatibility with adjacent and nearby uses... MF-3-NP would not provide an adequate transition between it and adjacent SF-3-NP land uses." In E MLK (C14-2020-0031), development of a 2.64-acre SMART Housing site was capped at 50 units with a 40-foot height limit within 300 feet of single-family zoning. In Gunter Street (C14-2024-0109), a 2.75-acre site was limited to 50 units via conditional overlay.

The proposed changes do not align with the City's Growth Concept Map when all relevant factors are considered.

Imagine Austin's Growth Concept Map defines "activity corridors," including South Congress Ave., to "provide direction for future growth" (page 97). *Imagine Austin* specifically notes that "a corridor's character will depend on factors such as road width, traffic volume, the size and configuration of lots, and existing uses" (page 104).

In both E MLK and Gunter Street, although the sites were either directly on an activity corridor (E MLK Blvd.) or within 550 ft of an activity corridor (Gunter Street, off Airport Blvd.), the City took careful notice of existing land use.

The proposed change—allowing 64 units on just 0.9 acres, not abutting an activity corridor, and surrounded on every side by existing homes—would substantially exceed any prior recommendation, even those made in more favorable locations.

The proposed changes do not protect the historic character of the neighborhood.

Protecting historic character is directed by *Imagine Austin*, the *GSRCCNP*, and good citizenship.

Two *Imagine Austin* policies, LUT P41 and P42, state: “Protect historic buildings, structures, sites, places, and districts in neighborhoods throughout the City,” and “Retain the character of National Register and local Historic Districts and ensure that development and redevelopment is compatible with historic resources and character.” Further, the first goal of the *GSRCCNP* is to “[m]aintain the historic fabric” of the neighborhood.

A 64-unit apartment building replacing a contributing historic structure in a National Register District challenges these requirements. The applicant acknowledges the Historic Landmark Commission must review the project, but the *Imagine Austin* policy calls for retaining character and ensuring compatibility, not merely process compliance.

For example, in Waverly North (C14-2025-0034), City staff highlighted the restoration of a historic portion of the property as part of their recommendation. Interestingly, the applicant in that case was the same as in this one. In Waverly North, the applicant rightly valued both the applicable Neighborhood Plan and historic preservation, writing in their cover letter, “This proposal aligns with the goals and vision laid out in the [Neighborhood Plan]... by providing multifamily development that reflects and preserves the historic nature and residential character of the neighborhood.”

The proposed changes do not meet the neighborhood’s urban design guidelines.

The *GSRCCNP* contains urban design guidelines that were developed in consultation with the public. The very first guideline (NC-1) is, “New single family and multi-family construction should be compatible with existing and historic home architecture. Building heights, construction materials, and architectural details should enhance the existing character of the neighborhood.” *Imagine Austin* corroborates this, explicitly requiring the protection and enhancement of streetscapes.

For absolute specificity, the *GSRCCNP* elaborates (NC-5), “Multifamily building facades should express the scale of single-family houses and reflect the scale, height, and appearance of surrounding homes.”

The enormous size of the proposed building, combined with the small area of the site, make it impossible for the development to be compatible with the neighborhood—regardless of budget. The site plan makes clear that setbacks are minimal, that massing will create vertical walls next to sidewalks and adjoining buildings, and that there is no room for the well-designed streetscapes that make for vibrant communities.

To their credit, the applicant has met with neighbors on several occasions and has made some changes to their site and architectural plans. However, design changes cannot create space for compatibility where no space exists.

The proposed changes exacerbate existing parking and traffic issues.

Given the narrow streets surrounding the site, existing resident parking limitations (few houses have driveways or garages), widespread non-resident parking from South Congress Ave., and cut-through access to IH-35, our community is uniquely concerned about parking and traffic.

The *GSRCCNP* has long been explicit about parking and traffic concerns in this area. Recommendations D23 and D24 call to “Identify parking spillover problems from multifamily developments into neighborhoods and support residential-parking-only petitions” and “Discourage any variances or waivers for parking reduction on any new or expanding developments.”

The proposed changes would add considerably to the parking challenges already faced by the neighborhood. The current design calls for 46 parking spaces—a number limited by the size constraints of the site, as detailed above. This is a dubious choice for a 64-unit development intended to serve families who likely own cars (in addition to walking, cycling, or using public transit), especially since apartment residents are not eligible for the Residential Permit Parking program in effect on all surrounding streets.

Traffic is an equally significant matter. In addition to the increased volume of traffic normally associated with 64 units, the development includes a pre-K. The pre-K brings additional traffic pressure, as well as queued cars during drop-off and pick-up. Neither the applicant, nor Transportation and Public Works, have articulated a coherent plan for how this can be accommodated. Continued discussion has raised more issues than it has addressed (such as a prohibited left turn from E Annie St. into the site, a fire hydrant blocking the designated driveway depicted on the site plan, and so on).

Traffic and road capacity have been dispositive factors in City decisions. In Saxon 2 (C14-2024-0099), the recommendation to deny was based on a Neighborhood Traffic Analysis that showed the property would exceed traffic capacity on the small street.

In summary

Given these factors, I respectfully request a recommendation against the proposed changes to the *GSRCCNP* and zoning. That said, the goals of the applicant are laudable, and I would encourage them to work with the City to re-scale their development plans on the site to address the aforesaid issues, or to find a larger site better suited to their planned size.

Sincerely,

Bari Shiva Mayer

Subject: Rowan Nickerson project

Maureen

Jonathan

I was just reading Mayor Watson newsletter and this section jumped out at me. It felt like this is exactly what the Nickerson neighbors have been talking about. We would be happy to accommodate a project that brought 16 units we are just distraught at a 70 something unit project.

Michael Breen

Last week, the Council approved a resolution to develop new zoning tools that allow more types of what's called "Missing Middle" housing. (I'll just say something that needs to be said: housing experts, housing advocates, and housing nerds have more strange names for things than you see in many other policy areas. There. I feel better getting that off of my chest.)

Since I've been trying and failing to come up with a better term, "Missing Middle" housing refers to options that are between single family homes on one end of the spectrum and large apartment complexes on the other. It's housing in the "middle" of the two poles. And, it's "missing" middle because we don't have enough of these developments. We tend to have more of the two poles.

Missing middle developments are usually within the range of 3-16 units and fit better in established neighborhoods because they are lower density than an apartment complex. We have a development down the street from my house that would be described as missing middle.

Subject: rowan vale

my understanding of this project is that the rezoning, though it appears to be a concession, is not. with building 2's height limitation and mf-3's impervious cover requirements, pre-k standards and regs are not met.

there is no change in the size of this building which is in the middle of modest, single family homes....homes which deserve compatibility considerations, neighborhood traffic impact considerations, as well development parking considerations.

what are these people thinking? please deny any zoning or likewise changes until all of these locale considerations are thoroughly met.

sincerely,

brooks kasson

Subject: Please Oppose the Rowan Vale Development- Their PreK Creates a True Queuing, Traffic, and Safety Concern

Dear Jonathan and Maureen,

When the Rowan Vale developers first presented their proposal to the City Council for the initial funding recommendation, they did not include a key part of their current plan: adding a PreK for 40 students on the already crowded development.

As a result, the City Council gave their initial approval on a fundamentally different project than the one we now have before us.

The Rowan Vale development was originally at the bottom of the list for the six projects currently competing for TDHCA credits. They "solved" this last-place issue by reworking their plans and adding a PreK for 40 students onto the already crowded lot, pushing them to the top spot of the six projects. The PreK would be located at the bottom floor of the easternmost 3-story structure along Brackenridge St, with 2 floors of apartments above. **The developer forced the PreK program into this project purely for the tax credit scoring process.**

The most significant issue with the PreK is the queuing for drop off and pickup. Of the 40 students, about 37 would come from families living off site (this is reflective of the builder's own data).

So, where do the 37 cars entering the PreK actually queue when they drop off and pick up their children from school?

According to the developer's plan, cars are expected to queue in the ground floor parking garage of the westernmost building while one of the few staff members walks over and takes children from their parents to the separate PreK building. **This queue will block Rowan Vale residents from pulling out from their parking spots to get to work.** One must keep in mind that these are likely 3-5 year old children, all in car seats or booster seats with backpacks, etc. As a mother of two, I can assure you this is not a quick process.

Additionally, there is another point of congestion -> AFTER the parents drop off their children. (This concern was actually pointed out by TPW). As parents leave the parking garage, they are forced to exit onto Nickerson Street - which has historically had challenges with speed as people cut through the neighborhood to avoid South Congress traffic. There is also paid and Residential Permit Parking on both sides of Nickerson, burdening the exit with extremely limited sight lines. **So, parents will also be required to queue AGAIN at the parking garage exit - as they wait to pull out onto Nickerson, creating a second queue of folks in the garage after the drop off, and blocking additional residential parking spots.**

The queue will undoubtedly spill out onto Annie St., blocking traffic in both directions and posing legitimate safety risks to residents, PreK students, and the middle school children who are already coming through this area for Lively Middle School, located a block away - both during the drop off and the pick up - which also corresponds with morning/evening rush hour commutes to & from work.

Please note, that in our conversations with Transportation and Public Works (TPW) on March 2nd, they confirmed that cars are not allowed to queue in the ROW (per the City's Transportation Criteria Manual (TCM)), so queuing there is also not an option. So, the issue remains unsolved.

It should also be noted that Annie St. is a main artery for Fire Engine 6 (located 1 block away) to access IH-35.

In development review practice under the the Transportation Criteria Manual (TCM):

- **Queuing areas must be explicitly shown on the site plan if a use creates predictable vehicle lines.**
- **Queuing is expected to occur in designated internal stacking areas, not in:**
 - **parking spaces,**
 - **parking aisles,**
 - **fire lanes,**
 - **or driveway access points.**

In a recent email to neighbors, in response to our concerns about the PreK queue, one of the developer's staff stated they would have "embedded flexibility to pivot to alternative drop off/pickup models if issues did arise," pointing to another one of their PreK partners that did not have "pre-defined pickup/drop off time at their other locations." Parents need to have a dependable timeframe in the morning before they go to work and in the afternoon after they get off work to rely upon. Most residents that qualify for the Affordable Housing program do not have the luxury of choosing their own schedule - so **this is obviously not a credible solution.**

After multiple meetings with TPW and after reviewing the TCM, it has become increasingly apparent that the developer has failed to demonstrate where the 35+ families will safely queue while they wait to pick up/drop off their children.

A 64-unit development, housing approximately 100 residents, with a PreK for 40 students, plus their PreK staff, plus building staff, all on less than a 1-acre lot does not compute, and should *NOT* be approved for development.

I truly appreciate your time and thoughtful consideration.

Warmly,

Kelly Goodpastor

Subject: Proposed construction of Rowan Vale

Dear Members of the Planning Commission,

I am writing as a concerned resident to express opposition to the proposed MF-3 zoning designation for the development in our historic neighborhood.

To be clear, this is not an opposition to affordable housing. We strongly support the need for more inclusive and attainable housing in Austin. Our concern lies with ensuring that development aligns with the City's adopted plans and respects the character and infrastructure of established neighborhoods.

The City of Austin has already outlined a thoughtful framework for growth through Imagine Austin, the Future Land Use Map (FLUM), and the Austin Strategic Mobility Plan. These plans emphasize directing the highest intensity development to designated activity corridors, while ensuring appropriate transitions into surrounding neighborhoods. **The proposed MF-3 zoning does not follow this guidance.**

Instead, SF-5 zoning would provide a more appropriate balance. It allows for additional housing options—including “missing middle” housing—while maintaining compatibility with the existing single-family neighborhood and local street network. In contrast, MF-3 zoning introduces corridor-level intensity onto a local residential street, which is neither designed nor intended to support that scale.

While the site is within a quarter mile of South Congress, it is not located on the transit corridor itself. Imagine Austin does not call for density to be applied indiscriminately. Rather, it specifically calls for a transition in scale from corridors into neighborhoods. SF-5 zoning fulfills that role as a transitional step, whereas MF-3 represents a level of intensity intended for corridors, not interior neighborhood streets.

Additionally, the Future Land Use Map designates this property as “Civic,” reflecting its long-standing use as a church for approximately 100 years. This designation carries meaning and intent. MF-3 multifamily zoning does not align with a civic designation and represents a substantial shift in both use and intensity. If the FLUM identifies this site as Civic, then zoning should remain consistent with that designation or transition appropriately—such as SF-5 with civic or compatible residential use—rather than introducing MF-3 apartments.

This is ultimately a matter of responsible planning, consistency, and respect for both adopted policy and neighborhood context. We urge you to uphold the City's guiding plans and support zoning that reflects a thoughtful transition rather than an abrupt and incompatible increase in density.

Thank you for your time and consideration.

Sincerely,

Mónica Cenicerros | 506 Leland Street

Subject: OPPOSE the Rowan Vale development- Where do the residents of this affordable housing development park???

Dear Jonathan and Maureen,

Rowan Vale's developer, Megan Lasch, **was unaware that the residents of her future development at 206 E. Annie St. would not qualify for standard RPP passes for the paid and residential parking zones surrounding the lot** when she placed a contract on it. Had she known about this important fact and the ramifications for her residents, would she have put the property under contract for affordable housing?

The Rowan Vale development has 64 units for approximately 100 residents. In their most recent site plan that they sent neighbors this week (the week of March 30th), the site plan lists 55 parking spaces for their residents (with 7 ADA compliant parking spaces for a total of 48 standard parking spaces). **However, of the 48 standard parking spaces offered, the developer placed 9 of those standard spaces on the side streets that are currently hybrid RPP and paid parking spots.** They listed these spots as "existing parallel street parking to be potentially incorporated with future street section."

In the March 2nd mobility meeting with Joseph Al-Hajeri and Curtis Beaty from Transportation Public Works, the developer also included these "potential" on street

parking spots. **The TPW team stated the developer would not be able to count them as part of their parking.**

In the recorded meeting, neighbor Susan Goldberg stated, "A point of clarity is there will be no removal of residential overnight parking for this project." Joseph Al-Hajeri responded, "As far as RPP zones on the street, no, they will stay the same."

The developer heard this and acknowledged the TPW staff comments. However, they kept these spots in the most recent site plan, knowing there is an issue with putting an affordable housing development with limited onsite parking inside a hybrid RPP and paid parking neighborhood.

With the help of the wonderful TPW staff, we understand that the residents at this development would be eligible to buy up to 120 day passes at \$5 each if they wanted to park near their home. These day passes technically would end at midnight, but since the RPP enforcement does not begin until 8:00, they would have a grace period until the next morning. However, if they don't get to their car with a new day pass or to move it by the time enforcement comes after 8:00 am, they are looking at a \$50 ticket per offence. And what happens if they go through all of their day passes? Then they have to pay for hourly parking. **As a result, how is this affordable housing affordable?**

And as TPW staff pointed out, as Project Connect becomes a reality in future years, over 300 parking spots will be removed from South Congress, pushing the parking burden onto the neighboring side streets.

Certainly, more neighboring streets will apply for RPP. If this happens, the Rowan Vale resident's parking woes become even worse, either competing for the more limited paid parking spots/RPP spots or having to walk farther to find a free spot not designated as paid/RPP parking.

We understand there are no longer any parking minimums in Austin, but this is an affordable housing development with a low percentage of on-site parking surrounded by RPP and paid parking; it doesn't make sense. One of the developers, Abby Tatkov, says the residents will "self select" and not have cars. In the City of Austin, 3%-5% of residents don't have cars. Her 'self-select' hope is not a credible solution to this problem.

No one at the mobility meeting, during or since, has been able to show us examples of affordable housing (other than student housing) that is surrounded by paid or RPP parking while also not having adequate parking on-site. I have attached a map from the City of Austin RPP site showing how far residents would have to walk to find free parking. As you will see, to find free parking, Rowan Vale residents will need to walk to Drake where other

I am a resident of Brackenridge St in Travis Heights and wanted to send along a note of concern regarding the zoning changes on the 200 block of East Annie due to the proposed construction of the Rowan Vale housing development.

I support affordable housing, and many of the positives of this project resonate with me. However, I have broad concerns about the approach of the development company and the impact to the character of the neighborhood. I wanted to highlight a particular concern regarding the neighborhood infrastructure, which I do not believe supports the change of zoning for this project.

A key concern for me is the traffic and parking stress this development would add to the (already busy) residential neighborhood. At peak times (weekends, rush hour), the streets cannot support current traffic patterns and parking can be challenging.

While South Congress is an appealing destination, it does not have amenities that make a non-car lifestyle easy. A development without adequate parking seems unreasonable. There are many families living in the vicinity of the development (including mine with three young boys) and there should be consideration taken into the safety for pedestrians and cyclists with the added pressure on the traffic grid.

Thank you for your consideration.

Best,

Leslie Olsovsky

Subject: Re: Rowen Vale_Scale and Degree

Last thing!

I wanted to send over one more thought. I was looking at some cool "missing middle" affordable housing in Mueller and noticed a higher density affordable housing project (see below). It is of a similar scale as the proposed Rowen Vale project. It is in a part of Mueller with a bunch of single family homes but it is thoughtfully sited across a thoroughfare and some shared green space, not right in the middle of the homes. I'm sure there are airtight deed restrictions that would prevent that from happening but it seems like homeowners in an old neighborhood like ours should be able to count on the same sort of restrictions given our zoning category, neighborhood plan and FLUM.

The RV location is akin to the front half of the Hernandez, Eberly, McBee block with McBee being Annie.

Obviously planning can't be this perfect with infill development (like RV) but the image shows that the City of Austin knows how density should work.

Separately, weren't neighborhood plans the City's idea?

I read (on the AI) that the City Council basically mandated neighborhoods to work with the Planning Department on these plans in 1997 as part of then Mayor Kirk Watson's "smart growth" agenda.

Thanks for taking in all of this information and giving it your consideration.

I very much appreciate it.

Regards

-William

Subject: Rowan Vale Proposed Development

April 6, 2026

Dear Mr. Tomko and Ms. Meredith,

I'm writing in reference to the proposed Rowan Vale affordable housing development under consideration at the intersection of Annie St/Nickerson St./Brackenridge St.

I have resided at 1807 Nickerson St. since 1991; my husband has resided here since 1980. We have witnessed the tremendous growth of Austin and the surrounding changes in the neighborhood, which thus far have managed to preserve the safety and amazingly quiet atmosphere just 1 block east of the S. Congress corridor.

I've attended meetings with the developers and appreciated the sharing of information both by city staff and the developer team. I want to share our concerns about this particular project in its current proposed site. Along with most of my neighbors I believe the project as proposed is not consistent with the history and stated priorities of the Neighborhood Plan or the current designation of this site which is zoned for civic use.

Rather than leap to a 64 unit highly dense project with extremely limited parking in an already over congested street, I would support the zoning designation that strives to achieve a more moderate level of increased density most suitable to this location (SF5 zoning). I would seriously lament this neighborhood street becoming a heavily trafficked and dangerous corridor, especially with two schools, including a proposed pre-school in its midst.

I applaud the city of Austin's efforts to prioritize affordable housing by increasing density but do not believe it has to happen in the way it is proposed. I offer the outstanding and award-winning Mueller development as an excellent example of something much more habitable for all residents.

The decision before the planning commission regarding the requested zoning changes could set a lasting precedent that would have implications across the city. I appreciate your consideration of the impacted area in your recommendation.

Sincerely,

Catherine Capers

Subject: Fwd: Watson Wire: In the Middle of It All

Dear Maureen and Jonathan,

Thank you for your attention to this matter. I know you have heard from many of my neighbors and I just want to also record my objection for the Rowan Vale Development which is near my home.

I am Stephanie Hunter and my address is 1804 Nickerson St. My husband is Michael Breen and I know he also sent his objection by email.

While not against affordable housing, I am against a project of this size going into our established single family home neighborhood. We already have huge parking issues in our neighborhood and this no doubt would exacerbate it.

I agree with Mayor Watson's thoughts on this and would welcome the "missing middle" for this property.

Again, I object to the Rowan Vale Development.

Thank you.

Sincerely,

Stephanie Hunter

Subject: OPPOSITION LETTER re Case Number: C14-2026-0010.SH (200 E. Annie St)

Case Number: C14-2026-0010.SH

Maureen,

I am writing to respectfully, but vehemently, urge you to oppose the Neighborhood Plan amendment and re-zoning of the 200 block of East Annie St. being requested by O-SDA Industries, LLC (“O-SDA”).

Please hear this: I am an advocate and avid supporter of affordable housing. However, I cannot and will not support O-SDA’s project at 200 E. Annie St. as currently proposed and the Land Use / Planning Commission and City Council should not support it either.

Why you should oppose the Neighborhood Plan amendment and re-zoning of the 200 block of East Annie Street:

1. Rowan Vale is an egregiously under-researched project. A few examples.
 - A. During an in-person neighborhood meeting, in response to questions regarding Rowan Vale’s proposed child-care center, the O-SDA representatives explained that O-SDA included the child-care center in its application as a well-known industry strategy used to ‘fast-track’ the application for approval. The O-SDA representative also noted that O-SDA had conducted no preliminary research prior to application submission (or by the time our neighborhood meeting took place two months after submission) on whether the 200 E. Annie site could safely and successfully and reasonably support a child-care facility, who they would contract the child-care out to, where on the site the facility would be located or any of the other things that would come along with a project of this nature (thinking: dedicated areas for 3 and 4 year old drop-off and pick-up, teacher parking, adequate protected play areas, thoughtful ingress/egress planning – to name just a few considerations). Reminder: this child-care facility is in addition to the high-density, 70 unit, apartment building proposed for this small (less than 1 acre) site. We were told that the child-care logistics were things that O-SDA would spend the time thoroughly researching only once their application was approved...

- B. If a large, for-profit company is attempting to enter a historically significant neighborhood to develop the tallest building in the entire neighborhood (even including all buildings on retail and hospitality-focused South Congress) and, in order to build this high-density housing complex, that developer must seek not only a zoning change but also a neighborhood plan exception, it would stand to reason that the City of Austin, including our Land Use / Planning Commission and our City Council, should expect (*and demand*) at least a basic level of research, understanding and thoughtfulness about the site and what it's capable of. These should be preliminary requirements, *not afterthoughts*. A preschool creates peak hour traffic for pick-up/drop-off queuing, and O-SDA's careless proposal to combine MF-3 density with a preschool on a local residential street is unworkable, and disrespectful to everyone impacted by this project – existing neighbors, future neighbors, the proposed residents of Rowan Vale – everyone.
 - C. An additional anecdotal example to demonstrate the lack of research and understanding at play here: In O-SDA's initial application, they cited Tiny Grocer as the grocery store that their affordable housing tenants would utilize. Tiny Grocer is a treasured part of our South Congress community but, for the average person, the premium prices and micro-supply make it a humorous resource to cite for anyone's weekly grocery needs.
2. 200 E. Annie Street is not like other O-SDA projects.
- A. This site is not even 1 acre. It is surrounded on all four sides by two lane roads. Due to street parking being universally permitted and utilized by residents and visitors to SOCO, the neighborhood's two-lane roads function in practice as one-lane roads where we, the residents of Travis Heights, dodge and dive and patiently wave oncoming drivers through in order to make our way through the neighborhood. Our neighborhood streets are oversaturated with cars as it stands today... This site is too small, and the infrastructure surrounding the site is inadequate, to properly support a 70+ unit (as originally proposed by O-SDA) high-rise high-density apartment complex, not to mention to accommodate parking for the multiple tenants residing in each unit, parking for a child-care center, daily parking for teachers and parents, a secure toddler drop-off area, a suitable place for queuing parents during pick-up time, space for trash/recycling areas and heating/cooling units sufficient to service a complex of this size... the list of logistical red flags goes on. Zoning intensity should correspond to the street

network. MF-3 zoning is not appropriate or advisable on local, residential streets that function as one-lane roads a majority of the day. This is exactly why there are zoning restrictions in play. Rowan Vale is exactly what our City's zoning restrictions are in place to protect against.

- B. O-SDA developed and operates Aria Grand, another 70-unit affordable housing complex, less than 1 miles from the proposed 200 E. Annie site. This Aria Grand complex is located at 1800 S I-35 Frontage Rd., and benefits from access to/from Woodland Ave. and I-35. Aria Grand is appropriately located for a development of its size and scale. It did not require Neighborhood Plan amendment to develop because it was not diametrically opposed to any zoning or neighborhood restrictions and it was not built to tower over a property line it shares with one and two story single-family homes. *None of these same facts are true about O-SDA's Rowan Vale proposal.* To develop Rowan Vale would require an express exception to the established zoning parameters and neighborhood plan that Travis Heights home owners have respected and lawfully abided by for generations. Why should a large developer, who does not care enough about the potential project to do basic site research prior to application submission, be freely afforded a benefit that local, tax-paying home owners are not? O-SDA would argue they deserve an exception because they are building critical affordable housing (...despite there being a 10-15% vacancy at the Aria Grand complex less than 1 mile away...). While I am in full support of affordable housing at 200 E. Annie St. *it must be of appropriate scale and supported by suitable infrastructure.* When asked in neighborhood meetings why O-SDA would not consider building town homes consistent with current zoning restrictions or even a lower-density apartment complex on this site, we heard from the O-SDA representatives that if Rowan Vale is not developed to the towering and inappropriate size currently proposed then it becomes a bottom-line issue (i.e., it would not make O-SDA the profit they feel they deserve) and they would not pursue the 200 E. Annie St. site if it had less than the requested number of units.
3. A precedent concern; rewarding blatant disregard for the established rules and guidelines.
 - A. It is my understanding that O-SDA has failed to properly notify the Greater South Austin Neighborhood Plan's designated contacts who are supposed to make a recommendation before the City acts on a matter like the exceptions

sought by Rowan Vale. This failure to notify could be an oversight or it could be that this procedural step was not a high-enough priority to motivate O-SDA to satisfy its obligations and abide by the rules. Whether it is a lack of attention to detail or a lack of respect – or both – these deficiencies are traits of O-SDA I have consistently observed throughout this process so far. There is a pattern of O-SDA seeking exceptions to the rules instead of making efforts to abide. Rowan Vale could be a promising development but 200 E. Annie St. is not the right site for it.

- B. Rowan Vale is a careless attempt to re-zone an entire neighborhood and to overhaul a decades-old Neighborhood Plan. If an exception is granted in this instance, there is precedent formed that can, and will, be used by developers even less diligent than O-SDA in the future. The lack of respect for the checks and balances critical to a healthy, functioning local government and the little-to-no diligence efforts to ensure safe, reliable and sustainable streets and neighborhoods at play in this proposal should raise red flags for the Land Use / Planning Commission and the City Council.

As such, I respectfully request that you reject O-SDA's request for a Neighborhood Plan amendment and re-zoning of the 200 block of East Annie Street. O-SDA has not proven itself to be a responsible, respectful or thoughtful participant in our collective efforts to create more affordable housing where it is needed and where it can be successfully, safely and meaningfully incorporated into our Austin community. Simply put: the Rowan Vale proposal is unreasonable and unworkable in its size/scale on the 200 E. Annie St site. It would create serious safety and logistical concerns for pedestrians and cyclists, for the existing home owners, for the new tenants of Rowan Vale, for the toddlers at the day care, for the parents and teachers of those toddlers, and for the nearly 1000 children going to and from the middle school, with its own particularized traffic patterns and density considerations, that is located less than 1 block from the proposed site. This is not the project that the citizens of Austin, including the affordable housing tenants, want or deserve.

Sincere thanks for your consideration.

Penelope Shumway

Comments: THAT THERE ARE 2 SEPARATE CASES FOR THIS 'PACQU' SAYS A GREAT DEAL, THIS PROJECT SEEMS VERY 'FORCED' AND THE PEOPLE ACTIVELY LIVING HERE ARE FEELING 'ROCKED' BY A PROJECT OF THIS SCALE SET AMONGST 1-2 STORY HISTORICAL HOMES IN UDDERHOUSES.

Subject: NPA-2026-0022.01.SH OBJECTION

I am writing to object to the request to amend our neighborhood plan to rezone 206 and 206 1/2 E Annie St and 1710 Brackenridge St from Civic to Multifamily.

This property is bordered on all sides by single family homes, and the developer Rowen Vale proposes to build a massive apartment block on the lot if it is rezoned. The design they have proposed is over 50 feet high, has a facade with multiple mismatched materials, and a cavernous first-floor garage which all add up to an eyesore for anyone unfortunate enough to have to live near it or walk by it daily. Houses on its north literally would be in its shadow. Rezoning this property to multifamily and then packing 50-odd units on it is not in keeping with the scale and character of the neighborhood. It is simply designed to make the project financially feasible for the developer.

Furthermore, in order to make their numbers “work”, the developers have included a pre-K to obtain additional government incentives. This will cause traffic congestion in the middle of the neighborhood; plus, we already have a pre-K a few blocks away at Travis Heights Elementary, from which the pre-K would potentially siphon.

I strongly believe that our neighbors should not be subjected to this horrendous building plan simply to profit these developers. I believe the property would be better utilized in another civic use or by building smaller homes more in scale with the neighborhood.

Sincerely,

Jennifer and Paul Parks

1811 Drake (within 500 feet of the subject property)

Subject: 205 E Milton LLC concerns for rezoning of the 200 block of East Annie street

Dear Jonathan and Maureen,

My name is D’Anne Hiskey, and I am the owner and manager of an LLC property located at 205 East Milton Street, directly behind the proposed development site on the 200 block of East Annie Street.

My home is a contributing property within the Fairview Park/Travis Heights National Historic District, and I care deeply about preserving the character, scale, and integrity of this neighborhood.

As a homeowner in this district, I have personally invested in preserving its integrity. When making improvements to my home, I hired a historical architect to ensure that all additions remained consistent with the character and standards of the neighborhood. This was a significant investment, but one I chose to make because I believe in protecting the historic fabric and thoughtful scale of this community.

I am writing to express my concern regarding the proposed rezoning of this site to support the construction of Rowan Vale, a 64-unit, 3 to 5 story affordable housing development.

I want to begin by saying clearly that I am not opposed to affordable housing. I believe it is an important and necessary part of a thriving city. My concern is not the mission, but

whether this particular location, scale, and zoning are appropriate and consistent with the City's adopted plans.

As someone who lives directly behind this site, I will experience firsthand the impact of placing a large, multi-story development on a local residential street within a historic district. The height and density represent a dramatic and incompatible shift from the surrounding single-family homes and historic properties.

I am especially concerned about traffic, safety, and parking. Our streets are narrow, and many residents, including myself, depend on street parking. Introducing this level of density will significantly increase congestion, strain parking availability, and create unsafe conditions for children, pedestrians, and cyclists.

Annie Street functions as a local residential street, not a corridor or collector. Zoning intensity should reflect that reality. This level of multifamily zoning introduces a scale of density that is not appropriate for this type of street and will lead to ongoing congestion and safety concerns.

Additionally, the inclusion of a preschool alongside this level of density creates further risk. Preschool drop-off and pick-up times generate concentrated peak-hour traffic and queuing. Combining this with a 64-unit development on a local street will result in traffic patterns that are inconsistent with the intended function of the neighborhood and increase danger for families.

The Future Land Use Map designates this property as Civic, reflecting its long-standing use as a church. Rezoning to multifamily represents a significant departure from that designation and introduces a level of intensity that is not aligned with the surrounding neighborhood or planning guidance. A more appropriate approach would allow for additional housing while maintaining compatibility with the neighborhood.

I am not opposing affordable housing. I am advocating for responsible placement and zoning that aligns with Imagine Austin, the Future Land Use Map, and the Austin Strategic Mobility Plan, all of which emphasize appropriate transitions from corridors into established neighborhoods.

As a homeowner, neighbor, and steward of a historic property, I ask that you carefully consider the long-term impact of this rezoning, not just in theory, but in the daily lived reality of those of us directly adjacent to this site.

Thank you for your time and thoughtful consideration.

Sincerely,
D'Anne Hiskey

Subject: Re:Zoning Case No. C14-2026-0010.SH; Neighborhood Plan Case No. NPA-2026-0022.01.SH

Dear Planning Commission and Staff,

On behalf of the South River City Citizens (SRCC) Neighborhood Association, I am writing to respectfully request a postponement of the Planning Commission hearing currently scheduled for April 14, 2026, related to the proposed development at 206 Annie Street.

Please find our formal letter attached, which outlines specific concerns regarding recent changes to the zoning application, requested entitlements and waivers, and the timing of the Neighborhood Traffic Analysis. As detailed in the attached correspondence, residents have only recently received key information and have not had adequate time to fully evaluate the potential impacts or provide meaningful input.

We are requesting that this case be postponed to allow for proper review, transparency, and community engagement consistent with the intent of the planning process.

We appreciate your consideration and are happy to coordinate further as needed.

Thank you for your time and attention to this matter.

Very truly yours,
Mary Fealkoff
President, South River City Citizens (SRCC) Neighborhood Association

Hi Jonathon,

Thank you for giving us a selection of dates for the postponement. We would like to have the postponement be the **June 9th date that you offered.** Thank you again for all your help and working with SRCC on this matter.

Mary

Received, however the maximum number of days a postponement request can be requested for is 60 days. So, your options (within 60 days) are:

- April 28, 2026
- May 12, 2026
- May 26, 2026 (we have been asked not to schedule cases on this date because it is an election day and the meeting will most likely be cancelled)
- June 9, 2026

Please let me know which day the neighborhood would like to revise their request to and I will let the applicant know to see if they agree to the request or not. I will circle back with the neighborhood once I have heard back.

Thank you,

Jonathan Tomko, AICP

Subject: Re: Case numbers: C14-2026-0010.SH for Zoning and NPA-2026-0022.01.SH for the neighborhood plan.

Dear Ms. Meredith and Mr. Tomko,

Before tomorrow's Planning Commission meeting I am writing in opposition to the proposed rezoning and development plan for **200 E. Annie St.** I am a long-time resident of Travis Heights and I own and live at **1606 East Side Drive.** From the time I moved to Austin to attend MCC through 2007 when I purchased this home, I dreamed of living in Travis Heights. Like so many who live here, I love this neighborhood and its historic homes.

I believe the Rowen Vale proposal conflicts with the City's plans, policies, and precedents—particularly as it relates to development within the **Travis Heights/Fairview Park National Register Historic District.**

I ask staff and decision-makers to evaluate this request against:

1. the adopted Neighborhood Plan and FLUM consistency standards (including whether there are truly “changed conditions” that justify an amendment and whether the proposal meets the plan's goals and objectives);
2. the City of Austin Historic Design Standards (March 2021), which guide work in National Register districts and evaluate location/setbacks, orientation, and scale/massing/height; and
3. the City's compatibility framework intended to limit height and setback impacts near single-family areas.

In my view, the proposal fails these tests—particularly on **scale/massing/height, setback pattern, and neighborhood compatibility.**

Key inconsistencies that require clear findings

- Staff acknowledges the Plan's compatibility requirement and that the neighborhood believes this proposal is not compatible, yet still recommends approval. I request a clear finding—based on measurable criteria—of how this project meets compatibility expectations in a National Register Historic District.

- The request is framed as **MF-3**, but the City’s own materials describe how **Affordability Unlocked** can make it functionally equivalent to **MF-5** height/massing. That gap between the label and the real-world outcome undermines the premise that this is a moderate, compatible change.
- Staff recognizes the site is within a National Register Historic District, yet the recommendation does not demonstrate how scale/massing/setbacks will maintain historic context—especially if development bonuses significantly increase height.
- The recommendation relies on anticipated public benefits and layered subsidies, but even staff notes some funding requests have not yet been submitted/received. Major zoning/NPA changes should not hinge on benefits that are not finalized.
- Citywide goals matter, but they do not eliminate the requirement to demonstrate site-level compatibility within an adopted neighborhood plan area and historic district.

Specific concerns

- **Inappropriate design and massing**
 - The sheer size and limited setbacks are shocking.
 - The design is not compatible with existing home architecture and not in keeping with the established scale of the district.
 - The setbacks proposed are minimal and do not reflect the established pattern of development.
- **Parking and traffic impacts**
 - The allotment of parking spaces is inadequate.
 - Increased traffic in a historic district with narrow streets is unsafe and unwise.
 - Our streets are already strained; we are effectively at or over capacity.
- **Incentives / tax credits**
 - The proposed public incentives feel inequitable given the scale of the project and its impacts on the surrounding historic district.

There are better options for this site. Our community would be supportive of a different approach that respects the historic district while advancing Austin’s housing goals. Mayor Watson is correct: “Let’s work towards being a city that more people can afford, and do it in a way that **adds to our existing neighborhoods.**”

The Travis Heights/Fairview Park National Register Historic District shines with pride and a commitment to upholding our history. This Rowen Vale proposal is simply **too much building on too little land** for this location.

Thank you for your consideration.

Sincerely,

Marie Case
