

RULE NO.: R161-26.22

NOTICE OF RULE ADOPTION

ADOPTION DATE: October 14, 2026

By: Jorge L. Morales, P.E., CFM, Director
Austin Watershed Protection

The Director of Austin Watershed Protection has adopted the following rule pursuant to City Code Chapter 1-2 (*Adoption of Rules*). Notice of the proposed rule was posted on August 5, 2026, and public comment was solicited in the notice. As explained below, the adoption of a rule may be appealed to the City Manager in accordance with City Code Section 1-2-10 (*Appeal of Adopted Rule to City Manager*).

EFFECTIVE DATE OF ADOPTED RULE

A rule adopted by this notice is effective on October 14, 2026.

TEXT OF ADOPTED RULE

A copy of the complete text of the adopted rule is attached to this notice. Adopted rule R161-26.22 contains no changes from proposed rule R161-26.22, which was attached to the Notice of Proposed Rule posted on August 5, 2026.

SUMMARY OF COMMENTS

Austin Watershed Protection received no comments regarding Rule No. R161-26.22.

AUTHORITY FOR ADOPTION OF RULE

The authority and procedure for adoption of a rule to assist in the implementation, administration, or enforcement of a provision of the City Code is provided in City Code Chapter 1-2 (*Adoption of Rules*). The authority to regulate water quality is established in City Code Chapter 25-8 (*Environment*).

APPEAL OF ADOPTED RULE TO CITY MANAGER

A person may appeal the adoption of a rule to the City Manager. **AN APPEAL MUST BE FILED WITH THE CITY CLERK NOT LATER THAN THE 30TH DAY AFTER THE DATE THIS NOTICE OF RULE ADOPTION IS POSTED. THE POSTING DATE IS NOTED ON THE FIRST PAGE OF THIS NOTICE.** If the 30th day is a Saturday, Sunday, or official City holiday, an appeal may be filed on the next day which is not a Saturday, Sunday, or official City holiday.

An adopted rule may be appealed by filing a written statement with the City Clerk. A person who appeals a rule must (1) provide the person's name, mailing address, and telephone number; (2) identify the rule being appealed; and (3) include a statement of specific reasons why the rule should be modified or withdrawn.

Notice that an appeal was filed and will be posted by the City Clerk. A copy of the appeal will be provided to the City Council. An adopted rule will not be enforced pending the City Manager's decision. The City Manager may affirm, modify, or withdraw an adopted rule. If the City Manager does not act on an appeal on or before the 60th day after the date the notice of rule adoption is posted, the rule is withdrawn. Notice of the City Manager's decision on an appeal will be posted by the City Clerk and provided to the City Council.

On or before the 16th day after the City Clerk posts notice of the City Manager's decision, the City Manager may reconsider the decision on an appeal. Not later than the 31st day after giving written notice of an intent to reconsider, the City Manager shall make a decision.

CERTIFICATION BY CITY ATTORNEY

By signing this Notice of Rule Adoption R161-26.22, the City Attorney certifies that the City Attorney has reviewed the rule and finds that adoption of the rule is a valid exercise of the Director's administrative authority.

REVIEWED AND APPROVED:

Jorge Morales, P.E., CFM., Director
Austin Watershed Protection

Date: 10/06/2026

Deborah Thomas
City Attorney

1.6.4 Structural Control Standard and Criteria for Optional Payment Instead of Structural Controls

- A. **Introduction.** Sedimentation/filtration Green stormwater infrastructure is the primary structural water quality control to reduce non-point source pollution in Urban, Suburban, Water Supply Suburban and Water Supply Rural Watersheds. In the Barton Springs Zone, non-degradation water quality controls are required (Please refer to Section 1.6.9 for design criteria for non-degradation controls). Innovative controls may be acceptable pursuant to Section 25-8-151 of the Land Development Code (Innovative Management Practices). However, these systems must be approved by the Director of the Austin Watershed Protection and Development Review Department (WPDR). The guidelines for several alternative controls are described in Section 1.6.7.
- B. **Criteria for Acceptance of Fee a Payment Instead of Structural Controls.** The City recognizes that incorporating structural water quality control facilities into some urban watershed Urban Watershed land development projects can be difficult. In response to these challenges, Section 25-8-214(C) of the Land Development Code requires the Director to review and accept or deny projects to pay into the Urban Watersheds Structural Control Fund instead of on-site controls. The funds received under this program have and will be used to study, design, implement, and construct urban Urban water quality improvement projects. This program is only for development within an urban watershed Urban Watershed as defined by Section 25-8-2 of the Land Development Code.
- C. **Public Mobility Projects** For public mobility projects only as defined in 25-1-21(89): The optional payment instead of structural controls also applies to watersheds outside of Urban as allowed in LDC Section 25-8-214(F). These include Suburban and Water Supply Suburban and Water Supply Rural. LDC 25-8-214(F) requires the Director to review, accept, or deny projects to pay into the Suburban and Water Supply Structural Control Fund using the Appendix U request form. The funds received under this program are intended to be used to study, design, implement, and construct water quality improvement projects in watersheds outside of the Barton Springs Zone that have been impacted by public mobility projects.
- D. **Urban Watersheds Optional Payment instead of Constructing Structural Controls Fund Acceptance Guidelines for up to One Acre of Impervious Cover**
- a. **Categories for Participation.**
- Type I – The City will strongly consider allowing qualifying developments that are classified as Type I to participate in the fee instead of program. Type I development features include, but are not limited to one or more of the following:
- Commercial development of 1 acre or less;
 - Single family development of subdivisions 2 acres or less;
 - Development with run-off that sheet flows over pervious cover, prior to being concentrated; and
 - Development that is likely to be treated by an existing or future regional water quality facility.
- Type II – The following Type II developments will in most cases be required to satisfy the water quality requirements through the use of on-site water quality controls. Type II development features include, but are not limited to one or more of the following:
- No or minimal existing impervious cover;
 - Substantial redevelopment;
 - Adjacent to an open channel stream; and
 - Within 500 feet of Town Lake.
- b. **Special Conditions.** In addition to the specific criteria given above, the applicant should note the following conditions which could arise:
- Should a regional facility be committed to its maximum capacity, an applicant may (at the City's discretion) increase the capacity through approved modifications. The funding of any such modifications will be the responsibility of the applicant, and shall be credited towards any fees that are required.

- Existing on-site water quality facilities may be removed if the development is approved to participate in the fee instead of program and the WPD approves such removal.

1. A development can pay for up to one acre of impervious cover instead of constructing structural controls if the development:
 - a. is in an Urban Watershed;
 - b. the limits of construction are at least 100 ft away from the centerline of a waterway with a delineated Critical Water Quality Zone (CWQZ);
 - c. the limits of construction do not intersect with the CWQZ of the Colorado River (including Lady Bird Lake); and
 - d. complies with subsection (2) or (3).
2. The following types of development can pay for up to one acre of impervious cover;
 - a. commercial, multifamily residential, or mixed uses on sites of one acre or less; or
 - b. residential site plan development of up to sixteen units on sites of two acres or less; or
 - c. residential subdivision or resubdivision on sites of two acres or less.
3. All other types of development can pay for up to one acre of impervious cover if the Director of Watershed determines:
 - a. the proposed development has site-specific constraints; and
 - b. there are no approved equivalent areas eligible under ECM 1.9.2 to treat onsite.
4. If a development that is eligible under Section 1.6.4.D.1 proposes more than one acre of impervious cover, the development can still pay for up to one acre of impervious cover but must provide structural controls for any remaining impervious cover.
5. This section does not apply to public mobility projects as defined in 25-1-21(89).

ECM 1.6.4 CRITERIA FOR OPTIONAL PAYMENT INSTEAD OF STRUCTURAL WATER QUALITY CONTROLS

e.E. **Participation Payment.** Participation payments are calculated by the applicant at the time of project submittal. The payment schedules can be accessed through the following link: [posted within the Land](#)

Use Review Division. Any increase will be posted at least 30 days prior to enactment. The present payments for participation are listed in Appendix T

- Appendix T: Request for Payment In Lieu of Structural Water Quality Controls in the Urban Watersheds
- Appendix T-2: Request for Payment In Lieu of Structural Water Quality Controls for Residential Projects in the Urban Watersheds
- Appendix U: Request for Payment Instead of Water Quality Controls for Public Mobility Projects Outside of the Barton Springs Zone.

Appendix T, Appendix T-2 and Appendix U and are revised by the annual adjustment factor based on the construction cost index. Participation payments received under this program and calculated using Appendix T or Appendix T-2 will be used by the City to study, design, implement, and construct urban Urban water quality improvement projects. Participation payments received for Public Mobility Projects and calculated using Appendix U will be used in the regulatory watershed from which the payment was made.

After a development is accepted for participation, payments shall be paid in accordance with the following:

Commercial Site Development.

For commercial site development, including public mobility projects, payment (cash or cashier check only) must be made prior to issuance of a development permit.

Single-Family and Duplex Subdivisions.

For single-family subdivisions which do require the construction of streets or drainage facilities, a letter of credit must be posted with the Austin Watershed Protection and Development Review Department in an amount equal to the total participation payment prior to final plat approval. This letter of credit must be replaced by cash prior to construction plan approval. For single-family subdivisions which do not require the construction of streets, payment (cash or cashier check only) must be made prior to final plat approval.

In conjunction with payment, the agreement shown in Appendix T, Appendix T-2, or Appendix U shall be signed and act as a binding agreement between the applicant and the City.
